There are totally three versions of 1z0-1075-25 practice materials which are the most suitable versions for you: PDF, Software and APP online versions. We promise ourselves and exam candidates to make these Oracle Manufacturing Cloud 2025 Implementation Professional 1z0-1075-25 Learning Materials top notch. So if you are in a dark space, our Oracle 1z0-1075-25 exam questions can inspire you make great improvements.

The TestKingIT is committed to making the Oracle 1z0-1075-25 exam preparation journey simple, smart, and swift. To meet this objective the TestKingIT is offering 1z0-1075-25 practice test questions with top-rated features. These features are updated and real 1z0-1075-25 exam questions, availability of Oracle 1z0-1075-25 Exam real questions in three easy-to-use and compatible formats, three months free updated 1z0-1075-25 exam questions download facility, affordable price and 100 percent Oracle Manufacturing Cloud 2025 Implementation Professional 1z0-1075-25 exam passing money back guarantee.

## Quiz 2026 Oracle 1z0-1075-25: Oracle Manufacturing Cloud 2025 Implementation Professional – Efficient Exam Testking

We boost the professional and dedicated online customer service team. They are working for the whole day, week and year to reply the clients' question about our 1z0-1075-25 study materials and solve the clients' problem as quickly as possible. If the clients have

any problem about the use of our 1z0-1075-25 Study Materials and the refund issue they can contact our online customer service at any time, our online customer service personnel will reply them quickly. So you needn't worry about you will encounter the great difficulties when you use our 1z0-1075-25 study materials.

## Oracle Manufacturing Cloud 2025 Implementation Professional Sample Questions (Q19-Q24):

### NEW QUESTION # 19

A manufacturing plant has two shifts of eight hours each for the work center WCI: day shift and night shift. You associate four units each of the resources R1, R2, R3, and R4 to WCI. The customer wants to assign all units of R2 available for day and night shift. What is the correct sequence of steps to achieve this?

- A. Associate R2 with WCI > Select the Available 24 Hours check box > Go to the Resource Availability region > Enter 2 in the Day Shift column > Enter 2 in the Night Shift column.
- B. Associate R2 with WCI > Deselect the Available 24 Hours check box > Go to the Resource Availability region > Enter 4 in the Day Shift column > Enter 4 in the Night Shift column.
- C. Associate R2 with WCI > Deselect the Available 24 Hours check box > Go to the Resource Availability region > Enter 2 in the Day Shift column > Enter 2 in the Night Shift column.
- **D. Associate R2 with WCI > Select the Available 24 Hours check box > Go to the Resource Availability region > Enter 4 in the Day Shift column > Enter 4 in the Night Shift column.**

**Answer: D**

Explanation:

In Oracle Manufacturing Cloud, to assign all units of resource R2 across both day and night shifts for the work center WC1, follow these steps:

- \* Associate R2 with WC1 - This step ensures that the resource R2 is linked to the work center.
- \* Select the Available 24 Hours check box - By selecting this option, you indicate that the resource is available for both shifts across the full 24-hour period.
- \* Enter 4 in the Day Shift and Night Shift columns - Inputting 4 units in both shifts ensures that all units of R2 are available for use during the entire day and night shifts.

Oracle Manufacturing Cloud guides explain the Resource Availability configuration for multi-shift operations, where the Available 24 Hours setting controls resource availability across shifts.

### NEW QUESTION # 20

Which three statements are true about the main areas of Managerial Accounting?

- **A. Cost method can be defined with granularity down to individual items.**
- B. Supply Chain Orchestration automatically selects the correct process based on user-defined Subledger Accounting rules when a supply creation is initiated.
- **C. Receipt Accounting is the application that performs accrual accounting for all types of receipts.**
- **D. Landed Cost Management gives organizations financial visibility into their extended supply chain costs.**

**Answer: A,C,D**

Explanation:

In Oracle Manufacturing Cloud and related financial applications, managerial accounting plays a significant role in tracking and managing costs across supply chain and manufacturing activities. The following is a breakdown of the correct statements:

\* Statement A : Receipt Accounting is the application that performs accrual accounting for all types of receipts - Receipt Accounting is a crucial module in Oracle Cloud that supports the tracking of costs and performs accruals related to receipts. This includes processes such as procurement receipts, interorganization transfers, and supplier shipments. This allows organizations to recognize and account for the expenses associated with these receipts.

Oracle Cloud SCM Documentation for Receipt Accounting outlines how the system manages accruals and matches them with purchase orders and invoices.

Statement B : Landed Cost Management gives organizations financial visibility into their extended supply chain costs - Landed Cost Management is designed to capture additional costs that arise during the transportation, handling, and processing of goods. This includes costs like shipping, insurance, and customs duties. By including these in the overall cost, it provides a more comprehensive view of the actual costs of goods in the supply chain.

Reference : Oracle Fusion SCM Guide, "Landed Cost Management," describes how it aggregates various indirect supply chain

costs to give better financial visibility.

Statement D : Cost method can be defined with granularity down to individual items - In Oracle Manufacturing Cloud, costing methods can be assigned not only at the organization level but also at a granular level down to individual items. This provides flexibility in defining different costing strategies for different products depending on their nature, manufacturing process, or market conditions.

Reference : Oracle Manufacturing Cloud User Guide explains the flexibility in configuring cost methods at different organizational and item-specific levels.

Incorrect Statements:

Statement C : Supply Chain Orchestration automatically selects the correct process based on user-defined Subledger Accounting rules when a supply creation is initiated - While Supply Chain Orchestration automates various supply chain processes, it does not select processes based on Subledger Accounting rules.

The orchestration system is more focused on managing and coordinating supply chain processes rather than determining accounting rules.

### NEW QUESTION # 21

A Production Supervisor queries a work order, WO-1025, from the Manage Work Orders page. On the Entering Edit Work Order: WO-1025 page, the supervisor finds a General Information, Operations, and History tab, but no Reservations tab. What are two reasons for the Reservations tab not being displayed for WO-1025?

- A. It is not a Plan-to-Produce work order.
- **B. It is not a Configured Item work order.**
- C. It is not a Pick-to-Order work order.
- **D. It is not a Back-to-Back work order.**
- E. It is not a Drop-Ship work order.

**Answer: B,D**

Explanation:

In Oracle Manufacturing Cloud, the Reservations tab on the Edit Work Order page is displayed only for specific types of work orders that require reservations of components or materials. The absence of the Reservations tab in work order WO-1025 indicates that the work order is not one of the following types:

\* Configured Item Work Order (A) : Configured items are typically built based on specific customer requirements, and reservations of components are often necessary. Since WO-1025 is not a configured item work order, the Reservations tab is not shown.

\* Back-to-Back Work Order (E) : Back-to-back work orders are linked to sales orders and require reservations of materials to fulfill the specific demand. Since WO-1025 is not a back-to-back work order, the tab is not displayed.

Incorrect options:

\* B, C, D : Drop-Ship, Pick-to-Order, and Plan-to-Produce work orders do not typically require reservations in the same way as configured or back-to-back orders, which is why they are not the reasons for the absence of the Reservations tab.

Oracle Cloud documentation on work order types and the Reservations tab explains the conditions under which reservations are required and when the tab is displayed.

### NEW QUESTION # 22

Two work definitions are created in the application: one for Engine Finished Good and the other for Pallet Finished Good. The Engine Finished Good item should have Pallet Finished Good as one of its components.

How can you establish the relationship between the Pallet and Engine work definitions?

- **A. Create a subinventory to serve as the completion subinventory for yielding Pallet, and then use the same subinventory to serve as the supply subinventory of Pallet in the work definition created for Engine.**
- B. Assign a higher priority to the work definition created for Engine and a lower one to the work definition for Pallet.
- C. The two work definitions can be tied through Project or Selban numbers.
- D. Work definition versions can be used to tie the work orders.

**Answer: A**

Explanation:

To establish a relationship between the work definitions of Engine Finished Good and Pallet Finished Good, you can create a common subinventory. This subinventory will serve as the completion subinventory for the Pallet Finished Good and the supply subinventory for the Engine Finished Good. This ensures that the Pallet Finished Good is completed in one process and is then available as a component for the Engine Finished Good.

\* Subinventory Linking : Using a common subinventory ties the output from one work definition as an input to another. The Pallet becomes an inventory item that is consumed in the production of the Engine.  
Oracle Manufacturing Cloud ' s documentation on work definitions and inventory setups explains how subinventories are used to link different stages of production.

### NEW QUESTION # 23

You are implementing project-driven supply chain functionality. You need to set up movement requests to issue or transfer project material to manage the inventory associated with projects and tasks.

Which two are types of movement requests to issue or transfer project material?

- A. Pick transactions Interfaced by the project costing project and task using the project material, common Inventory, or Inventory from another project.
- **B. Transfer project material from one subinventory to another.**
- C. Create a movement receipt line with the Project Costing widget.
- **D. Perform manual pick for such movement requests using the project material, common inventory, or inventory from another project.**

**Answer: B,D**

Explanation:

When setting up movement requests in a project-driven supply chain, you need to manage inventory associated with specific projects and tasks. The two correct types of movement requests in this context are:

\* Statement A : Transfer project material from one subinventory to another - This is a standard type of movement request in Oracle Cloud, allowing project materials to be transferred between subinventories.

It is essential for managing inventory tied to specific projects and tasks, ensuring that materials are available where needed for project execution.

Oracle Fusion SCM Cloud: Inventory Management Guide describes how material transfers can be executed between subinventories, including project-based transfers.

Statement D : Perform manual pick for such movement requests using the project material, common inventory, or inventory from another project - Manual picking for project-specific material is another supported operation. It allows users to perform manual picks from various sources, such as project material, common inventory, or even inventory from other projects.

Reference : Oracle Project-Driven Supply Chain documentation explains how manual picks can be configured to source inventory based on project requirements.

Incorrect Statements:

Statement B : Pick transactions are not interfaced specifically by project costing. Although project costing is relevant for tracking costs, it is not the driving factor behind pick transactions.

Statement C : There is no concept of creating a movement receipt line with the " Project Costing widget " in Oracle Manufacturing Cloud.

### NEW QUESTION # 24

.....

I would like to find a different job, because I am tired of my job and present life. Do you have that idea? How to get a better job? Are you interested in IT industry? Do you want to prove yourself through IT? If you want to work in the IT field, it is essential to register IT certification exam and get the certificate. The main thing for you is to take IT certification exam that is accepted commonly which will help you to open a new journey. And you must be familiar with Oracle 1z0-1075-25 Certification test. To obtain the certificate will help you to find a better job. What? Do you have no confidence to take the exam? It doesn't matter that you can use our TestKingIT dumps.

**Reliable 1z0-1075-25 Study Notes:** <https://www.testkingit.com/Oracle/latest-1z0-1075-25-exam-dumps.html>

However, TestKingIT Reliable 1z0-1075-25 Study Notes is the only website whose exam practice questions and answers are developed by a study of the leading IT experts's reference materials, Our 1z0-1075-25 study materials are specially prepared for you, Oracle Exam 1z0-1075-25 Testking Our material is comprehensive, and the price is reasonable, In order to reflect our sincerity on consumers and the trust of more consumers, we provide a 100% pass rate guarantee for all customers who have purchased 1z0-1075-25 study quiz.

For example, you might want to group the tiles for all of the Office apps into a Microsoft Office group, If you are going through our 1z0-1075-25 Preparation material thoroughly, then you will be able to get the best results.
