20 to 30 hours practicing on the platform which provides simulation problems, can let them have the confidence to pass the Health-Cloud-Accredited-Professional exam, so little time great convenience for some workers. It must be your best tool to pass your exam and achieve your target.

Salesforce Health Cloud Accredited Professional Sample Questions (Q38-Q43):

NEW QUESTION # 38

A payer needs to implement a program to address the rising healthcare expenses and ensure affordable care for its members. The payer aims to strike a balance between quality care and managing the cost of care effectively by streamlining its approval processes for care requests.

Which capability in Health Cloud helps the payer accomplish this?

- A. Utilization Management
- B. Integrated Care Management
- C. Intelligent Appointment Management
- D. Provider Network Management

Answer: A

Explanation:

Step 1: Requirement Analysis

* Payer needs to manage healthcare expenses while ensuring quality, affordable care.

* Seeks to streamline approval processes for care requests.

Step 2: Utilization Management in Health Cloud

Utilization Management (UM) provides workflows and automation for reviewing, approving, or denying care requests. This supports balancing cost controls with quality care through evidence-based review processes.

Extract:

"Utilization Management helps payers manage costs and ensure members receive appropriate care by streamlining the review and approval process for pre-authorizations and care requests." Administer Health Cloud - Utilization Management Step 3: Review of Options

* A. Utilization Management: Directly addresses care request review, cost, and quality balance.

* B. Provider Network Management: Focuses on managing provider networks, not utilization/cost review.

* C. Intelligent Appointment Management: For scheduling only.

* D. Integrated Care Management: Focuses on care coordination, not cost/approval workflow.

NEW QUESTION # 39

While a consultant is implementing Integrated Care Management for a customer, the customer requests that a change is made to the Care Plan creation wizard.

Which underlying component should the consultant customize to achieve this?

- A. Field Sets
- B. Flow
- C. FlexCard
- D. OmniScript

Answer: D

Explanation:

The underlying component that the consultant should customize to achieve this is OmniScript. OmniScript is a component in OmniStudio that allows the consultant to create guided scripts or wizards for users to follow. OmniScript can be used to create the Care Plan creation wizard, and it can be customized using various elements, such as steps, prompts, inputs, outputs, and actions.

NEW QUESTION # 40

A provider wants to get a comprehensive view of a patient's prescriptions, including history, to improve health outcomes. Which Health Cloud capability should a consultant leverage to assist the provider?

- A. Integrated Care Management

- B. Intelligent Appointment Management
- **C. Medication Management**
- D. Virtual Care

Answer: C

Explanation:

To get a comprehensive view of a patient's prescriptions, including history, to improve health outcomes, a consultant should leverage the Medication Management capability in Health Cloud. Medication Management is a feature that helps providers and care coordinators manage the medication regimen of their patients, helping to improve patient safety and reduce healthcare costs. Medication Management allows providers and care coordinators to develop a curated list of current medications, review medications with the patient, make clinical decisions and recommendations based on the review, and communicate the recommendations to the patient and the patient's prescriber. Intelligent Appointment Management, Integrated Care Management, or Virtual Care are not capabilities that can fulfill this use case.

NEW QUESTION # 41

Which data model is used to represent information via standard object and record types on standard objects to manage how care is covered?

- A. Benefit data model
- **B. Coverage data model**
- C. Health Insurance data model
- D. Plan data model
- E. Payer data model

Answer: B

Explanation:

Coverage data model (B) is the data model that is used to represent information via standard object and record types on standard objects to manage how care is covered. Health Insurance data model (A), Payer data model, Plan data model (D), and Benefit data model (E) are not valid data models in Health Cloud.

NEW QUESTION # 42

Which solution includes pre-built APIs, connectors, implementation templates, and a prescriptive end-to-end reference architecture to enable EHR connectivity and power a patient 360 from any HER into HC using HL7 V2 or FHIR standards?

- A. Shield
- B. Tableau CRM for HealthCare
- **C. Mulesoft Accelerator for HealthCare**
- D. Specialty vendors

Answer: C

NEW QUESTION # 43

.....
