## Sample Questions (Q147-Q152):

### NEW QUESTION # 147

The term social age refers to

- A. the mean age of an individual's comparative group in a social context.
- B. the social roles and expectations related to an individual's age.
- C. a society's level of maturity compared with other cultures.

**Answer: B**

Explanation:

Social age refers to the social roles and expectations assigned to individuals based on their age. For example, society expects certain behaviors or achievements at certain ages, such as starting school, marrying, or retiring. It is one of several ways of conceptualizing age, alongside chronological, biological, and psychological age.

### NEW QUESTION # 148

What is an example of advocating on behalf of the counseling profession?

- A. providing pro bono counseling services at a small organization
- B. attending a state-level professional counseling conference
- C. practicing cultural competence when meeting with clients

**Answer: B**

Explanation:

Attending a state-level professional counseling conference is an example of professional advocacy. Such participation allows counselors to stay informed about legislation, professional issues, and advancements in the field, and to contribute to the development of the profession. Professional advocacy also includes lobbying for the profession, involvement in professional organizations, and participating in policy-making that affects counselors and clients.

### NEW QUESTION # 149

The coefficient of determination, which is found by computing the square of the correlation coefficient between two sets of scores, represents the

- A. maximum possible reliability coefficient for either measure.
- B. percentage of variance in one variable predictable from the other variable.
- C. percentage of error variance unique to each of the variables.

**Answer: B**

Explanation:

The coefficient of determination is the square of the correlation coefficient ( $r^2$ ) and represents the proportion of variance in one variable that can be predicted from the other variable. For example, an  $r$  of .50 yields an  $r^2$  of .25, meaning 25% of the variance in one variable can be predicted from the other.

### NEW QUESTION # 150

The major criticism associated with single-subject or case study experimental designs is that the results from them are limited in regard to

- A. external validity.
- B. baseline stability.
- C. cause and effect.

**Answer: A**

Explanation:

A main criticism of single-subject or case study designs is their limited external validity, meaning the findings cannot be easily generalized to larger populations. While these designs are strong for generating hypotheses and in-depth understanding, they lack broad applicability.

**NEW QUESTION # 151**

Which action best helps a counselor address systemic inequities through group counseling?

- A. Use the same curriculum for all groups to ensure that members receive the same information.
- B. Focus group session on less contentious topics rather than barriers that impact the group.
- C. **Facilitate group discussions to help members explore their identities and address barriers.**

**Answer: C**

Explanation:

To address systemic inequities, counselors are encouraged to facilitate group discussions that allow members to explore their identities, share their experiences, and address barriers. Creating a safe space to discuss issues related to oppression and marginalization promotes empowerment and supports group members in processing their experiences. "Group counseling that intentionally explores cultural identities and systemic barriers is essential for promoting equity and inclusion." Reference: Helwig, A. A. (2020). CPCE Study Guide and Review; Gladding, S. T. (2018). Counseling: A Comprehensive Profession (8th Edition).
