The most attractive thing about a learning platform is not the size of his question bank, nor the amount of learning resources, but more importantly, it is necessary to have a good control over the annual propositional trend. The PEGACPSSA25V1 quiz guide through research and analysis of the annual questions, found that there are a lot of hidden rules are worth exploring, plus we have a powerful team of experts, so the rule can be summed up and use. The Certified Pega Senior System Architect 25 prepare torrent can be based on the analysis of the annual questions, it is concluded that a series of important conclusions related to the qualification examination, combining with the relevant knowledge of recent years, then predict the direction which can determine this year's exam. PEGACPSSA25V1 test material will improve the ability to accurately forecast the topic and proposition trend this year.

Pegasystems Certified Pega Senior System Architect 25 Sample Questions (Q24-Q29):

NEW QUESTION # 24

A bank wants to add a qualification process to an account opening case type. In this qualification process, users select the type of account to open by answering a set of questions.

Once the user selects the type of account to open, the application advances to a second process to capture identifying information. Only after the user provides identifying information is the case saved to the database.

Which configuration option satisfies this requirement?

- A. Add a Persist Case shape to the starting flow.
- B. Defer the case save using the Obj-Save method.
- C. Instantiate the case as a temporary case.
- D. Configure a screen flow as the starting flow for the case.

Answer: C

NEW QUESTION # 25

Which two steps do you perform to update the logo in a portal header?

(Choose Two)

- A. Upload the new image to a binary file record.
- B. Update the portal header to reference the new image.
- C. Reference the image in the portal skin.
- D. Reference the image in the application record.

Answer: A,B

NEW QUESTION # 26

In the following example, the Purchasing, PurchasingInt, and Inventory rulesets are configured for application validation. MyCo and MyCoInt are configured for ruleset validation. The prerequisites for MyCo are MyCoInt and Inventory. The prerequisite for MyCoInt is Pega-ProcessCommander.

Which of the following two statements are correct? (Choose Two)

- A. Rules in MyCo can reference rules in Purchasing.
- B. Rules in MyCoInt can reference rules in MyCo.
- C. Rules in Purchasing can reference rules in Inventory.
- D. Rules in Inventory can reference rules in MyCo.

Answer: C,D

NEW QUESTION # 27

A health plan application includes a process for surgical procedure requests. Currently, there is an evaluation subprocess in which a physician reviews the diagnosis and enters the recommended procedure and its urgency. The request then advances to a medical director who analyzes the feedback and approves the appropriate procedure.

The health care organization has created a new requirement, which states that three physicians can perform the evaluation independently. Only two evaluations are necessary to advance the case to the medical director.

In order to allow the three physicians to review the orders in parallel, how would you configure the process?

- A. Add a Split For Each shape, add a list of physicians, and call the evaluation process.
- B. Add a Split Join shape, add a list of physicians, and call the evaluation process.
- C. Add a Split Join shape, add a list of physicians, and call the surgical procedure request process.
- D. Add a cascading approvals shape that is called by the evaluation subprocess.

Answer: A

NEW QUESTION # 28

An application displays a list of product categories. Some product categories are common to all case types. The remaining product categories vary by case type. How do you configure the list values?

- A. Circumstance the property by case type. Configure each circumstance with a local list of the appropriate list values.
- **B. Create the property in the class group. Create field value rules for the list values in the appropriate class.**
- C. Specialize the property for each case type. Configure each property with a local list of appropriate values.
- D. Create a property in the class group with a local list of common values. Specialize the property for each case type with a local list of the unique values.

Answer: B

NEW QUESTION # 29

.....
