CCFA-200b Hot Questions | CCFA-200b 100% Exam Coverage

If you want to start your learning as quickly as possible, just choose us, we can do this for you. Our CCFA-200b study materials is famous for instant download, and you can get the downloading link and password within ten minutes after purchasing, if you don't receive, you can ask our service stuff for help. Besides, CCFA-200b Exam Dumps of us contain both questions and answers, and you can check the answer when you finish practicing. CCFA-200b study materials are also have certain questions and it will help you to pass the exam successfully.

CrowdStrike Falcon Administrator Sample Questions (Q120-Q125):

NEW QUESTION # 120

What best describes the relationship between Sensor Update policies and Operating Systems?

- A. Windows and Mac share Sensor Update policies. Linux requires its own set of policies based on the different kernel versions
- B. Sensor Update policies are not Operating System specific. One policy can be applied to all Operating Systems
- **C. A Sensor Update policy must be configured for each Operating System (Windows, Mac, Linux)**
- D. Windows has its own Sensor Update policies. But Mac and Linux share Sensor Update policies

Answer: C

Explanation:

The option that describes the relationship between Sensor Update policies and Operating Systems is that a Sensor Update policy must be configured for each Operating System (Windows, Mac, Linux). This option is essentially a repetition of question 141 and its answer.

Sensor Update policies are specific to each operating system type, as different operating systems have different sensor versions, features, and requirements. Therefore, you need to create and assign separate Sensor Update policies for each operating system type in your environment.

NEW QUESTION # 121

Even though you are a Falcon Administrator, you discover you are unable to use the "Connect to Host" feature to gather additional information which is only available on the host. Which role do you need added to your user account to have this capability?

- A. Falcon Investigator
- B. Remediation Manager
- **C. Real Time Responder**
- D. Endpoint Manager

Answer: C

Explanation:

The Real Time Responder role allows users to use the "Connect to Host" feature to gather additional information from the host, such as running processes, registry keys, files, etc. The other roles do not have this capability.

NEW QUESTION # 122

How can you find a list of hosts that have not communicated with the CrowdStrike Cloud in the last 30 days?

- A. Under Host setup and management, choose the Host Management page. Set the group filter to "Inactive Sensors"
- **B. Under Host setup and management > Managed endpoints > Inactive Sensors. Change the time range to 30 days**
- C. Under Host setup and management, choose the Disabled Sensors Report. Change the time range to 30 days
- D. Under Dashboards and reports, choose the Sensor Report. Set the "Last Seen" dropdown to 30 days and reference the Inactive Sensors widget

Answer: B

Explanation:

The administrator can find a list of hosts that have not communicated with the CrowdStrike Cloud in the last 30 days by going to Host setup and management > Managed endpoints > Inactive Sensors. Then, change the time range to 30 days. This will show the host name, last seen date, sensor version and group name for each inactive host. The other options are either incorrect or not available.

NEW QUESTION # 123

Why do Sensor Update policies need to be configured for each OS (Windows, Mac, Linux)?

- **A. Sensor Update policies are OS dependent**
- B. To bundle the Sensor and Prevention policies together into a deployment package
- C. This is false. One policy can be applied to all Operating Systems
- D. To assist with auditing and change management

Answer: A

Explanation:

Sensor Update policies need to be configured for each OS (Windows, Mac, Linux) because Sensor Update policies are OS dependent. A Sensor Update policy is a policy that controls how and when the Falcon sensor is updated on a host. Sensor Update policies are specific to each operating system type, as different operating systems have different sensor versions, features, and requirements. Therefore, you need to create and assign separate Sensor Update policies for each operating system type in your environment.

NEW QUESTION # 124

After successfully installing Falcon on a new employee's laptop, you notice that the machine is assigned the default prevention policy instead of the custom prevention policy you created. You verify that the Falcon sensor is functioning properly, and you confirm that the custom policy is enabled and successfully running on more than 1,000 other Falcon hosts.

What is the likely cause of this issue?

- A. A host-based firewall rule is preventing the custom policy from applying successfully
- B. A prompt to apply the new prevention policy was manually declined
- C. Falcon requires a 24- hour waiting period to apply custom policies to newly installed hosts
- D. The laptop is not a member of a host group assigned to the custom policy

Answer: D

NEW QUESTION # 125

.....

I believe that a lot of people working in the IT industry hope to pass some IT certification exams to obtain the corresponding certifications. Some IT authentication certificates can help you promote to a higher job position in this fiercely competitive IT industry. Now the very popular CrowdStrike CCFA-200b authentication certificate is one of them.
