To fulfill this objective the ITexamReview are offering top-rated and real CrowdStrike Falcon Administrator (CCFA-200b) practice test questions in three different formats.

CrowdStrike Falcon Administrator Sample Questions (Q119-Q124):

NEW QUESTION # 119

How would an installation token be configured if the Falcon Sensor was installed on a Red Hat Enterprise Linux host?

- A. `sudo /opt/CrowdStrike/falconctl -s --cid= --provisioning-token=ABCD1234`
- B. `sudo /opt/CrowdStrike/falconctl -s -t ABCD1234`
- C. `sudo yum install --cid= --provisioning-token=ABCD1234`
- D. You will be prompted to enter the installation token during the install if it is required

Answer: A

NEW QUESTION # 120

An analyst has reported they are not receiving workflow triggered notifications in the past few days. Where should you first check for potential failures?

- A. Workflow Execution log
- B. Custom Alert History
- C. Workflow Audit log
- D. Falcon UI Audit Trail

Answer: A

Explanation:

The Workflow Execution log in the Workflow Management option allows you to view the status and results of workflow executions triggered by detection events. You can filter the log by workflow name, status, start and end time, and detection ID. You can also view the details of each execution, including the actions performed, the output received, and any errors encountered. This log can help you troubleshoot potential failures or issues with your workflows.

NEW QUESTION # 121

Your leadership wants controls in place for immediate action on any Overwatch detections. What should you do to ensure the host is contained quickly and notifies the appropriate staff?

- A. Create a Fusion SOAR workflow to trigger on an Overwatch detection and set it to block the detection
- B. Create a Fusion SOAR workflow to contain the host and email the Overwatch team
- C. Create a Fusion SOAR workflow using the Overwatch playbook to contain the host and email the SOC team
- D. Create a Fusion SOAR workflow to create a detection for Overwatch and email the SOC team

Answer: C

NEW QUESTION # 122

What is the purpose of the Default Sensor Policy?

- A. Used to reset all sensor settings to Default.
- B. Tests the sensor configuration settings before deployment.
- C. A mechanism to deploy the oldest supported version of the Falcon Sensor.
- D. Acts as a "catch all" policy if no other Sensor Policies are applied.

Answer: D

Explanation:

The purpose of the Default Sensor Policy is that it acts as a "catch all" policy if no other Sensor Policies are applied. A Sensor Policy is a policy that defines the detection and prevention settings for the Falcon sensor on a host. You can create and assign custom Sensor Policies to different hosts or groups in your environment. However, if a host is not assigned to a specific Sensor Policy, it will inherit the settings from the Default Sensor Policy. The Default Sensor Policy is a "catch-all" policy that is enabled by default and has the "Malware Protection" feature turned on. You can modify the settings of the Default Sensor Policy, but you cannot delete or disable it.

NEW QUESTION # 123

When creating new IOC's in IOC management, which of the following fields must be configured?

- A. Hash, Description, Filename
- **B. Hash, Platform and Action**
- C. Hash, Action and Expiry Date
- D. Filename, Severity and Expiry Date

Answer: B

Explanation:

When creating new IOC's in IOC management, the administrator must configure the Hash, Platform and Action fields. The Hash field is the value of the IOC, such as MD5, SHA1 or SHA256. The Platform field is the operating system that the IOC applies to, such as Windows, Linux or Mac. The Action field is the action that Falcon will take when detecting the IOC, such as Detect, Block or Allow. The other fields are either optional or not available.

NEW QUESTION # 124

.....
