Browsers including MS Edge, Internet Explorer, Safari, Opera, Chrome, and Firefox support this CCII Practice Exam. Additionally, this Certified Cyber Intelligence Investigator (CCII) (CCII) test is supported by operating systems including Android, Mac, iOS, Windows, and Linux.

McAfee Certified Cyber Intelligence Investigator (CCII) Sample Questions (Q50-Q55):

NEW QUESTION # 50

Often, "information sharing" and "intelligence sharing" are used interchangeably by persons who do not understand the subtleties-yet

importance-of the distinction.

- A. True
- B. False

Answer: A

Explanation:

Information sharing refers to the exchange of raw data among agencies or organizations. Intelligence sharing, on the other hand, means processed and analyzed data that provides actionable insights. In cyber intelligence investigations, intelligence sharing ensures that classified or sensitive data is properly handled and disseminated to relevant stakeholders.

NEW QUESTION # 51

Operational intelligence is considered:

- A. Information that can be used for military operations
- B. Actionable intelligence about long-term threats that is used to develop and implement preventive responses

Answer: B

Explanation:

Operational intelligence is real-time or near-term intelligence used for ongoing operations. It helps:

Law enforcement agencies prevent crimes through surveillance and monitoring.

Businesses and governments detect cybersecurity threats before they escalate.

Counterterrorism teams assess risks and respond rapidly to threats.

Operational intelligence is different from strategic intelligence, which focuses on long-term analysis of trends and threats.

NEW QUESTION # 52

A public IP address is assigned to every computer that connects to the Internet where each IP is unique.

- A. True
- B. False

Answer: A

Explanation:

A public IP address is globally unique and assigned to devices connected directly to the Internet. It enables direct communication between devices and services across the web. Unlike private IPs, public IPs are exposed and can be tracked in cyber investigations.

NEW QUESTION # 53

Planning and resource allocation provides information to decision-makers about the changing nature of threats.

- A. True
- B. False

Answer: A

Explanation:

Threat intelligence is constantly evolving, requiring agencies and organizations to adjust their strategies and allocate resources effectively. Planning ensures that:

Financial and human resources are directed to high-risk areas.

New cybersecurity defenses are developed to counter emerging threats.

Law enforcement operations are proactive rather than reactive.

For example, intelligence agencies monitor terrorist networks, cybercrime groups, and organized fraud rings to adjust their priorities accordingly.

NEW QUESTION # 54

It is NOT important to capture the URLs of a potential suspect's social media account.

- A. False
- B. True

Answer: A

Explanation:

Capturing URLs of a suspect's social media profile is critical in cyber investigations. URLs serve as unique identifiers for accounts, enabling forensic investigators to revisit, verify, and cross-check information. Without them, evidence may be lost due to profile deletions, username changes, or restrictions. Digital forensic guidelines emphasize the importance of preserving URLs for court-admissible evidence.
