Customization feature of this format allows you to change time limits and questions numbers of mock exams.

## McAfee Certified Cyber Intelligence Investigator (CCII) Sample Questions (Q74-Q79):

### NEW QUESTION # 74

Federal law enforcement can only gather proprietary information concerning an incident in the following ways:

- **A. All of the above**
- B. Federal grand jury subpoena
- C. Court order
- D. Search warrant
- E. Request for voluntary disclosure of information

**Answer: A**

Explanation:

Federal law enforcement agencies must obtain legal authorization to access proprietary information. The methods include:

Voluntary disclosure- When a company voluntarily shares data with law enforcement.

Court order- Issued by a judge to access specific records.

Grand jury subpoena- Used to compel testimony or evidence.

Search warrant- Required for seizing electronic evidence.

Unauthorized access violates privacy laws, including the Fourth Amendment in the U.S..

**NEW QUESTION # 75**

How many social networks does an average person have?

- **A. 0**
- B. 2.5
- C. 1
- D. 2
- E. 3

**Answer: A**

Explanation:

Studies indicate that the average user maintains accounts across multiple platforms, typically four major social networks. The figure may fluctuate based on demographics and technological adoption. Social media investigations often consider cross-platform analysis to assess a target's online footprint.

**NEW QUESTION # 76**

What is the general modus operandi for thieves selling & transporting stolen goods?

- **A. Many thieves had around 20-30 people and retail outlets where they felt they could "safely" sell stolen goods.**
- B. Boosters are the best at selling counterfeit goods.
- C. Fences liked to sell goods out of their houses.

**Answer: A**

Explanation:

Organized retail theft groups operate in networks, using multiple people (20-30 members) to steal and distribute goods. These stolen goods are typically:

Sold through legitimate-looking businesses to avoid detection.

Funneled into black markets or international criminal enterprises.

Sold online through fake accounts or social media marketplaces. Understanding this modus operandi helps law enforcement track and dismantle organized retail crime rings.

**NEW QUESTION # 77**

Which of the following is the most effective method for verifying a suspect's online identity?

- A. Relying on unverified third-party information
- **B. Checking multiple social media accounts for consistency**
- C. Using a single source for confirmation
- D. Assuming identity based on email address alone

**Answer: B**

Explanation:

Comprehensive and Detailed In-Depth Explanation: Verifying an online identity requires cross-referencing multiple sources to establish consistency in:

\* Username patterns across different platforms.

\* Profile photos and metadata analysis.

\* Publicly available records and connections.

Using a single source or unverified third-party data can lead to false positives, making multiple-source verification a key practice in cyber investigations.

### NEW QUESTION # 78

A worm is almost similar to a virus, except that it doesn't need the execution of any executable file to get activated.

- A. True
- B. False

**Answer: A**

Explanation:

A computer worm is a type of self-replicating malware that can spread without human intervention. Unlike viruses, worms: Do not require a host file or user action to execute.

Exploit security vulnerabilities to spread across networks.

Can cause widespread damage by consuming system resources and spreading rapidly.

Famous worms include ILOVEYOU, Stuxnet, and WannaCry, which caused billions in damages worldwide.
