CCSK Practice Quiz

Congratulations!

You've completed the quiz. Check below to see your score.

Sample: CCSK Test Prep Program

1. Which essential characteristic enables greater use of immutable infrastructure? (select the best answer)

1. Broad network access
2. ☒ Elasticity
3. Measured service
4. On-demand self-service
5. Resource Pooling

The best answer is Elasticity. Although on-demand self service plays a critical role in enabling the elasticity, page 109 of the guidance states "Elasticity enables greater use of immutable infrastructure."

2. Containers provide security isolation.

1. True
2. ☒ False

This statement is false. Guidance page 98 states: "Containers don't necessarily provide full security isolation, but they do provide task segregation." Virtual machines typically do provide security isolation. Putting tasks of equivalent security context on the same set of physical or virtual hosts will provide greater security segregation.

3. What relevant industry best practices can be used to develop a cloud governance framework?

1. Cloud Controls Matrix (CCM)
2. ANSI x9-69
3. EU GDPR
4. RFC 2022
5. ☒ A and C

As long as you spend less time on the game and spend more time on learning, the CCSK study materials can reduce your pressure so that users can feel relaxed and confident during the preparation and certification process on the CCSK exam. It is believed that many users have heard of the CCSK Latest preparation materials from their respective friends or news stories. Our CCSK exam questions are valid and reliable. So why don't you take this step and try on our CCSK study guide? You will not regret your wise choice.

The CCSK exam is a globally recognized certification that validates an individual's understanding of cloud security concepts and best practices. CCSK exam is designed for individuals who are responsible for cloud security within their organizations and covers a broad range of topics. CCSK Exam is delivered online, is available in multiple languages, and is open-book. The CCSK exam is an excellent way for individuals to demonstrate their expertise and knowledge in cloud security.

Free PDF CCSK Test Questions Pdf & The Best Methods to help you pass Cloud Security Alliance CCSK

There are rare products which can rival with our products and enjoy the high recognition and trust by the clients like our products. Our products provide the CCSK test guide to clients and help they pass the test CCSK certification which is highly authorized and valuable. Our company is a famous company which bears the world-wide influences and our CCSK Test Prep is recognized as the

most representative and advanced study materials among the same kinds of products. Whether the qualities and functions or the service of our product, are leading and we boost the most professional expert team domestically.

Cloud Security Alliance CCSK: Certificate of Cloud Security Knowledge (v4.0) exam is a certification that focuses on cloud security. CCSK exam is designed to provide professionals with a comprehensive understanding of cloud security and its various aspects. CCSK Exam is intended to help professionals in the field of cloud computing to develop a strong understanding of the security risks and threats associated with cloud computing, as well as the best practices for mitigating these risks.

Cloud Security Alliance Certificate of Cloud Security Knowledge (v4.0) Exam Sample Questions (Q87-Q92):

NEW QUESTION # 87

Use elastic servers when possible and move workloads to new instances.

- **A. True**
- B. False

Answer: A

NEW QUESTION # 88

Which of the following storages is typically used for swap files and other temporary storage needs and is terminated with its instance?

- A. Content Deliver
- B. Object based Storage
- **C. Ephemeral Storage**
- D. Raw Storage

Answer: C

Explanation:

Ephemeral storage: This type of storage is relevant for SaaS instances and exists only as long as its instance is up. It is typically used for swap files and other temporary storage needs and is terminated with its instance.

NEW QUESTION # 89

Which of the following statements best describes an identity federation?

- **A. The connection of one identity repository to another**
- B. Identities which share similar attributes
- C. A group of entities which have decided to exist together in a single cloud
- D. A library of data definitions
- E. Several countries which have agreed to define their identities with similar attributes

Answer: A

NEW QUESTION # 90

Which cloud-based service model enables companies to provide client-based access for partners to databases or applications?

- **A. Platform-as-a-service (PaaS)**
- B. Software-as-a-service (SaaS)
- C. Desktop-as-a-service (DaaS)
- D. Infrastructure-as-a-service (IaaS)
- E. Identity-as-a-service (IDaaS)

Answer: A

NEW QUESTION # 91

What is a primary benefit of implementing Zero Trust (ZT) architecture in cloud environments?

- **A. Reduced attack surface and simplified user experience.**
- B. Increased attack surface and complexity.
- C. Eliminating the need for multi-factor authentication.
- D. Enhanced privileged access for all users.

Answer: A

Explanation:

Zero Trust (ZT) security architecture is a modern cloud security approach that operates on the principle of "Never Trust, Always Verify." Primary Benefits of Zero Trust in Cloud:

- * Minimizes Attack Surface
- * Traditional security models assume trust within an internal network.
- * Zero Trust eliminates implicit trust and enforces continuous verification of user identities.
- * Reduces the risk of data breaches, insider threats, and lateral movement attacks.
- * Strong Authentication & Access Controls
- * Multi-Factor Authentication (MFA) & Just-in-Time (JIT) access are mandatory in Zero Trust models.
- * Uses context-based access policies (device, location, behavior analytics) to enforce adaptive security.
- * Micro-Segmentation & Least Privilege Access
- * Restricts access to only necessary applications, minimizing lateral movement in cloud environments.
- * Micro-segmentation isolates workloads, reducing the impact of breaches.
- * Cloud-Native Zero Trust Integration
- * Cloud providers (AWS, Azure, Google Cloud) offer Zero Trust Network Access (ZTNA) solutions.
- * Cloud Security Posture Management (CSPM) continuously scans cloud environments for security compliance.

This aligns with:

- * CCSK v5 - Security Guidance v4.0, Domain 12 (Identity, Entitlement, and Access Management)
- * Zero Trust Cloud Security Architecture (CSA Zero Trust Working Group).
