Salesforce Order Management Administrator Accredited Professional 認定 AP-219 試験問題 (Q83-Q88):

質問 # 83

What does the number of Fulfillment Orders created depend upon?

- A. Fulfillment Location, Delivery Method and Number of Payments
- B. Fulfillment Location, Delivery Charges and Quantity
- C. Fulfillment Location, Recipient Address and Quantity
- **D. Fulfillment Location, Delivery Method and RecipientAddress**

正解: D

解説:

The number of Fulfillment Orders created depends on three factors: Fulfillment Location, Delivery Method and Recipient Address. These factors determine how the Order Items are grouped and allocated to Fulfillment Orders based on routing rules and inventory availability. For example, if an order has two items that can be fulfilled from different locations, or have different delivery methods or recipient addresses, then two Fulfillment Orders are created for that order. 質問 # 84

A company's service team should not see Process Exceptions on any Order Summaries. How can an administrator meet these requirements?

- A. Modify the Order Summary page layout to remove visibility to the Process Exception component for Service team profiles
- B. Add a filter to the Process Exception component on the Order Summary lightning record page to hide the component for the service team's Profile
- **C. Create a copy of the Order Summary lightning record page for the service team and remove the Process Exceptions component. Activate the lightning record page by profile for all Service team profiles.**
- D. Modify the service team profiles to remove access to the lightning component and all associated Apex classes

正解: C

質問 # 85

An admin is observing a flow and needs to watch all of the variables changing as the process executes, but nothing like this is being displayed. What did the developer forget to enable?

- A. Show execution details
- **B. Show the details of what's executed and render flow in Lightning Runtime**
- C. Show execution details inline
- D. Show the details of what's executed and render flow in Lightning Experience

正解: B

質問 # 86

Once the administrator has activated the integration between B2C Commerce and Order Management, orders being placed by customers will be sent to Order Management if the order status is set to which two values?

- **A. New**
- B. Open
- C. Drafted
- **D. Active**
- E. Created

正解: A、D

解説:

Once the administrator has activated the integration between B2C Commerce and Order Management, orders being placed by customers will be sent to Order Management if the order status is set to Active or New. These are the two order statuses that indicate that an order has been created or confirmed by a customer, and that it needs to be processed by Order Management.
