In addition to the PDF questions TestPassed offers desktop FCP_FAZ_AN-7.4 practice exam software and web-based FCP - FortiAnalyzer 7.4 Analyst (FCP_FAZ_AN-7.4) practice exam, to help you cope with FCP - FortiAnalyzer 7.4 Analyst (FCP_FAZ_AN-7.4) exam anxiety. These Fortinet FCP_FAZ_AN-7.4 Practice Exams simulate the actual Fortinet FCP_FAZ_AN-7.4 exam conditions and provide you with an accurate assessment of your readiness for the FCP_FAZ_AN-7.4 exam.

Fortinet FCP - FortiAnalyzer 7.4 Analyst Sample Questions (Q36-Q41):

NEW QUESTION # 36

What can the CLI command # diagnose test application oftpd 3 help you to determine?

- A. What devices and IP addresses are connecting to FortiAnalyzer
- B. What logs, if any, are reaching FortiAnalyzer
- C. What devices are registered and unregistered
- D. What ADOMs are enabled and configured

Answer: A

NEW QUESTION # 37

When managing incidents on FortiAnalyzer, what must an analyst be aware of?

- A. Severity incidents rated with the level High have an initial service-level agreement (SLA) response time of 1 hour.
- B. You can manually attach generated reports to incidents.
- C. The status of the incident is always linked to the status of the attach event.
- D. Incidents must be acknowledged before they can be analyzed.

Answer: B

Explanation:

In FortiAnalyzer's incident management system, analysts have the option to manually manage incidents, which includes attaching relevant reports to an incident for further investigation and documentation. This feature allows analysts to consolidate information, such as detailed reports on suspicious activity, into an incident record, providing a comprehensive view for incident response.

Let's review the other options to clarify why they are incorrect:

Option A: You can manually attach generated reports to incidents

This is correct. FortiAnalyzer allows analysts to manually attach reports to incidents, which is beneficial for providing additional context, evidence, or analysis related to the incident. This functionality is part of the incident management process and helps streamline information for tracking and resolution.

Option B: The status of the incident is always linked to the status of the attached event This is incorrect. The status of an incident on FortiAnalyzer is managed independently of the status of any attached events. An incident can contain multiple events, each with

different statuses, but the incident itself is tracked separately.

Option C: Severity incidents rated with the level High have an initial service-level agreement (SLA) response time of 1 hour. This is incorrect. While incidents have severity levels, specific SLA response times are typically set according to the organization's incident response policy, and FortiAnalyzer does not impose a default SLA response time of 1 hour for high-severity incidents.

Option D: Incidents must be acknowledged before they can be analyzed.

This is incorrect. Incidents on FortiAnalyzer can be analyzed even if they are not yet acknowledged. Acknowledging an incident is often part of the workflow to mark it as being actively addressed, but it is not a prerequisite for analysis.

NEW QUESTION # 38

You have recently grouped multiple FortiGate devices into a single ADOM. System Settings > Storage Info shows the quota used. What does the disk quota refer to?

- A. The maximum disk utilization for the FortiAnalyzer model
- B. The maximum disk utilization for the ADOM type
- C. The maximum disk utilization for all devices in the ADOM
- D. The maximum disk utilization for each device in the ADOM

Answer: C

NEW QUESTION # 39

If a hard disk on FortiAnalyzer that supports hardware RAID fails, what can be done on FortiAnalyzer?

- A. No need to do anything because the disk will self-recover.
- B. Shut down FortiAnalyzer and replace the disk.
- C. Run execute format disk to format and restart the FortiAnalyzer device.
- D. Hot swap the disk.

Answer: D

NEW QUESTION # 40

How do you restrict an administrator's access to a subset of your organization's ADOMs?

- A. Assign the default Super_User administrator profile
- B. Set the ADOM mode to Advanced
- C. Configure trusted hosts
- D. Assign the ADOMs to the administrator's account

Answer: D

NEW QUESTION # 41

.....
