Pegasystems PEGACPBA24V1 Exam Syllabus Topics:

| Topic | Details |
|---------|--|
| Topic 1 | <ul style="list-style-type: none">• User Experience: This domain assesses skills of UX Designers and Frontend Developers in configuring user interface elements. Candidates learn to group fields to create views, add or remove fields, configure portal content, adjust form appearance, visibility, and controls for an improved user experience. |

| | |
|---------|--|
| Topic 2 | <ul style="list-style-type: none"> • Application Development: This section evaluates skills of Pega Business Architects and Developers in application development. It covers the roles and skills of a Pega Business Architect, identification of project stakeholders, and benefits of Pega's Center-out™ business architecture. Candidates learn about App Studio's value, understand rules, rulesets, classes, and the role of generative AI. The domain also covers Pega's CI • CD pipeline with Deployment Manager, use of collaboration tools, managing application development with user stories, feedback, and bug tracking, and using tools like Case Type Backlog and Estimator for project scoping. |
| Topic 3 | <ul style="list-style-type: none"> • Case Management: This domain targets Case Designers and Process Architects and explores designing a case lifecycle, including setting case statuses and adding instructions for tasks. Candidates demonstrate ability to configure service level agreements with urgency, goals, and deadlines, and manage routing of assignments to users, work groups, or queues. This section also includes configuring email correspondence, identifying duplicate cases, adding optional actions and automating workflow decisions using conditions. Candidates learn to pause and resume case processing, skip stages or processes, configure child cases, use automation shapes appropriately, and create and manage user teams. |
| Topic 4 | <ul style="list-style-type: none"> • Data and Integration: This section measures skills of Data Analysts and Integration Specialists focusing on configuring data objects, relationships, and records. Candidates learn to capture and present data through fields and views, create calculated values, validate data with business logic rules, manipulate application data including setting default property values, and configure data transforms. |

Pegasystems Certified Pega Business Architect 24 Sample Questions (Q128-Q133):

NEW QUESTION # 128

When an auto accident claim is resolved in the Resolve stage, email notifications must be sent automatically to the adjuster who inspected the car, to the insured party, and to the insurance agent who verified the claim.

How do you configure the resolve process to support this requirement?

Response:

- A. Route an Approval step to the required parties.
- B. Add a Send Email step as an optional action.
- **C. Add a Send Email step and include all required parties.**
- D. Route the email to all the recipients in a Collect Information step.

Answer: C

NEW QUESTION # 129

To determine how to process a loan application, you configure an application to evaluate an applicant's credit score for a mortgage loan Case.

- If the credit score of the applicant is >700, the Case goes immediately to underwriting.

- If the credit score of the applicant is <500, the applicant is sent an email denying the loan application.
- Otherwise, the Case requires a follow-up review by a loan officer.

Which flow correctly captures the business decisions described?

Response:

- A.
- B.
- C.
- D.

Answer: A

NEW QUESTION # 130

Identify the name of Pega's business architecture design that aligns human intelligence and process automation with business logic to deliver high-value software solutions.

- A. Customer-centric
- B. Pega Express
- C. Business-first
- D. Center-out

Answer: D

Explanation:

The name of Pega's business architecture design that aligns human intelligence and process automation with business logic to deliver high-value software solutions is Center-out.

* Center-out Design:

* This approach focuses on designing the core business logic and processes first (the "center") and then extending outwards to include the user interface (UI) and channels.

* By centering on the core logic, Pega ensures that the most critical aspects of the business process are well-defined and robust. This approach supports scalability and adaptability as the system grows and evolves.

NEW QUESTION # 131

Consider this requirement for a business transaction: An employee submits a request to purchase equipment. The request is sent to the manager for review and approval.

- If approved, the request is forwarded to the Fulfillment department.
- If the manager rejects the request, it is sent back to the employee for reconciliation or cancellation.
- The Fulfillment department will process the request if the requested items are in stock.

Select the case life cycle design that most closely follows the guidelines for identifying and naming stages.

Response:

- A. Option C
- B. Option D
- C. Option B
- D. Option A

Answer: D

NEW QUESTION # 132

As part of a purchase order case, after someone completes a purchase, a confirmation email is sent. How do you design the case life cycle to send the email?

Response:

- A. As part of the stage configuration
