Our accurate, reliable, and top-ranked UiPath UiPath-ADPv1 exam questions will help you qualify for your UiPath UiPath-ADPv1 certification on the first try. Do not hesitate and check out excellent UiPath UiPath-ADPv1 Practice Exam to stand out from the rest of the others.

### UiPath (ADPv1) Automation Developer Professional Sample Questions (Q55-Q60):

#### NEW QUESTION # 55

When installing UiPath Studio, which of the following actions require administrator privileges?

- A. Administrator privileges are required for installing the robot in user mode.
- B. Administrator privileges are required for installing the robot in both service mode and user mode.
- **C. Administrator privileges are required for installing the robot in service mode.**
- D. Administrator privileges are not required for installing UiPath Studio.

**Answer: C**

#### NEW QUESTION # 56

What do the percentages from the Test Explorer panel represent?

□

- A. Percent of test data run.
- **B. Passing percent.**
- C. Correctness of the code percent.
- D. Coverage percent.

**Answer: B**

Explanation:

The percentages from the Test Explorer panel represent the passing percent of the test cases that are executed.

The Test Explorer panel shows the status of each test case, the total number of test cases, the number of passed test cases, the number of failed test cases, and the passing percent. The passing percent is calculated by dividing the number of passed test cases by the total number of test cases and multiplying by 100. For example, if there are 10 test cases and 8 of them pass, the passing percent is 80%. References: Test Explorer

#### NEW QUESTION # 57

What is the correct execution order of the State activity sections?

instructions: Drag the Description found on the "Left" and drop on the correct Execution Order found on the "Right"

□

**Answer:**

Explanation:

□

#### NEW QUESTION # 58

A developer configured the properties for a Click activity as shown below:

□ What happens if the activity cannot find its target at runtime?

- A. An exception is thrown after 10 seconds.
- B. The next activity is executed after 10 seconds.
- C. An exception is thrown after 10 milliseconds.
- D. The next activity is executed after 10 milliseconds.

**Answer: A**

Explanation:

The Click activity has a property called TimeoutMS. This property specifies the amount of time (in milliseconds) to wait for the activity to be executed before an error is thrown. In this case, the TimeoutMS property is set to 10000 milliseconds (10 seconds). Therefore, if the activity cannot find its target at runtime, an exception will be thrown after 10 seconds.

#### NEW QUESTION # 59

A developer needs to design a process using the REFramework, but without Orchestrator Queues. Which is the correct order of actions the developer needs to do in the Get Transaction Data state in this case?

- A. 1. Remove the Get Transaction Item activity from GetTransactionData workflow.  
2. Add a Read Range activity in GetTransactionData workflow to read the data from a local Excel file.  
3. Add the logic required to read the data source only one time.  
4. Add the logic required to retrieve only one row from read data each time.  
5. Add the logic required to check if all rows/transaction items from the read data have been processed.
- B. 1. Remove the Get Transaction Item activity from GetTransactionData workflow.  
2. Add a Read Range activity in GetTransactionData workflow to read the data from a local Excel file.  
3. Add the logic required to read the data source only one time.  
4. Add the logic required to retrieve only one row from read data each time.
- C. 1. Remove the Get Transaction Item activity from GetTransactionData workflow.  
2. Add a Read Row activity in GetTransactionData workflow to read the data from a local Excel file.  
3. Add the logic required to read the data source only one time.  
4. Add the logic required to check if all rows/transaction items from the read data have been processed.
- D. 1. Remove the Get Transaction Item activity from GetTransactionData workflow.  
2. Add a Read Row activity in GetTransactionData workflow to read the data from a local Excel file.  
3. Add the logic required to read the data source only one time.  
4. Add the logic required to retrieve only one row from read data each time.  
5. Add the logic required to check if all rows/transaction items from the read data have been processed.

**Answer: A**

Explanation:

- \* The correct order of actions in the Get Transaction Data state is:
- \* Remove the Get Transaction Item activity from the GetTransactionData workflow.
- \* Add a Read Range activity in the GetTransactionData workflow to read the data from a local Excel file.
- \* Add the logic required to read the data source only one time.
- \* Add the logic required to retrieve only one row from read data each time.
- \* Add the logic required to check if all rows/transaction items from the read data have been processed.
- \* This sequence ensures that the data is read once, processed row by row, and checks for completion.

#### NEW QUESTION # 60

.....

There are a lot of leading experts and professors in different fields in our company. The first duty of these leading experts and professors is to compile the UiPath-ADPv1 exam questions. In order to meet the needs of all customers, the team of the experts in

our company has done the research of the UiPath-ADPv1 study materials in the past years. As a result, they have gained an in-depth understanding of the fundamental elements that combine to produce world class UiPath-ADPv1 practice materials for all customers.
