

# FCSS\_SDW\_AR-7.6 - Reliable FCSS - SD-WAN 7.6 Architect Latest Exam Cost

P.S. Free 2026 Fortinet FCSS\_SDW\_AR-7.6 dumps are available on Google Drive shared by DumpsReview: [https://drive.google.com/open?id=1sUHHNBKvK7zpawDtEd\\_1cDW5S-vr7L6o](https://drive.google.com/open?id=1sUHHNBKvK7zpawDtEd_1cDW5S-vr7L6o)

Many candidates failed exam before. They have no confidence for next exam and they also hesitate if they have to purchase valid FCSS\_SDW\_AR-7.6 brain dumps materials or if dumps are actually valid. Now I advise you download our free demo before you are determined to buy. Our free demo is a little of the real test, you can see several questions answers and explanations. You will know the validity of Fortinet FCSS\_SDW\_AR-7.6 Brain Dumps materials.

According to different kinds of questionnaires based on study condition among different age groups, we have drawn a conclusion that the majority learners have the same problems to a large extent, that is low-efficiency, low-productivity, and lack of plan and periodicity. As a consequence of these problem, our FCSS\_SDW\_AR-7.6 test prep is totally designed for these study groups to improve their capability and efficiency when preparing for FCSS\_SDW\_AR-7.6 Exams, thus inspiring them obtain the targeted FCSS\_SDW\_AR-7.6 certificate successfully. Our FCSS\_SDW\_AR-7.6 question torrent can play a very important part in helping you achieve your dream.

## FCSS\_SDW\_AR-7.6 Practice Materials & FCSS\_SDW\_AR-7.6 Training Guide Torrent - DumpsReview

We have authoritative production team made up by thousands of experts helping you get hang of our FCSS\_SDW\_AR-7.6 study question and enjoy the high quality study experience. We will update the content of FCSS\_SDW\_AR-7.6 test guide from time to time according to recent changes of examination outline and current policy. Besides, our FCSS\_SDW\_AR-7.6 Exam Questions can help you optimize your learning method by simplifying obscure concepts so that you can master better. Furthermore with our FCSS\_SDW\_AR-7.6 test guide, there is no doubt that you can cut down your preparing time in 20-30 hours of practice before you take the exam.

## Fortinet FCSS - SD-WAN 7.6 Architect Sample Questions (Q67-Q72):

### NEW QUESTION # 67

Which two statements correctly describe what happens when traffic matches the implicit SD-WAN rule? (Choose two.)

- A. Traffic does not match any of the entries in the policy route table.
- B. The session information output displays no SD-WAN service id.
- C. The traffic is distributed, regardless of weight, through all available static routes.

- D. FortiGate flags the session with `may_dirty` and `vw1_default`.
- E. Traffic is load balanced using the algorithm set for the `v4-ecmp-modesetting`.

Answer: A,B

Explanation:

When traffic matches the implicit SD-WAN rule, no specific SD-WAN service is applied, so the session information output does not show an SD-WAN service ID.

The implicit SD-WAN rule is considered only when no matching entry is found in the policy route table.

### NEW QUESTION # 68

Refer to the exhibits.

You use FortiManager to configure SD-WAN on three branch devices.

The screenshot displays the FortiManager configuration interface for SD-WAN. It is divided into two main sections: 'SD-WAN Zones' and 'SD-WAN Rules'.

**SD-WAN Zones Configuration:**

ID	Interface	Gateway	Cost	Priority	Status	Installation Target
virtual-wan-link						
underlay						
1	port1	\$(sdwan_port1_gw)	0	1	Enable	
2	port2	0.0.0.0	0	1	Enable	
WAN3						
3	port4	\$(sdwan_port4_gw)	0	1	Enable	1 Device in Total branch1_fgt (root)
HUB1						
4	HUB1-VPN1	0.0.0.0	0	1	Enable	
5	HUB1-VPN2	0.0.0.0	0	1	Enable	
6	HUB1-VPN3	0.0.0.0	0	1	Enable	

**SD-WAN Rules Configuration:**

ID	Name	Outgoing Interface	Outgoing Service	Outgoing Interface	Outgoing Service	Status
1	Critical-DIA	LAN-r	Salesforce, Microsoft	port1, port2	any	Enable
2	Non-Critical-DIA	LAN-r	Facebook, LinkedIn, Game	port2	any	Enable
3	Corp	LAN-r	Corp-net	HUB1-VPN1, HUB1-VPN2, HUB1-VPN3	any	Enable
	sd-wan	All	All	Source IP	All	any

**FortiManager error message**

Install Wizard - Validate Devices (3/4)

Task finished with **errors**.

Installation Preparation Total: 4/4. Success: 3. Warning: 0. Error: 1. Show Details

Ready to Install  
Only successfully validated device may be installed. Please confirm and click "Install" button to continue.

Device Name	Status	Action
branch1_fgt	Copy Failed	Log
branch2_fgt	Connection Up	
branch3_fgt	Connection Up	

**View Install Log**

```
Copy device global objects
Copy objects for vdom root
Commit failed:
error -999 - - (from Template Group Corp-SOT_Branch) (in Template branches)
invalid ip - prop[gateway]: ip4class(${sdwan_port1_gw}) invalid ip addr
```

When you install the device settings, FortiManager prompts you with the error "Copy Failed" for the device branch1\_fgt. When you click the log button, FortiManager displays the message shown in the exhibit.

There are two different ways to resolve this issue. Based on the exhibits, which methods could you use? (Choose two.)

- A. Review the per-device mapping configuration for metadata variables
- B. Do not define installation targets for SD-WAN members.
- C. Specify the gateway of the SD-WAN member port1 with an IP address or use the default value.
- D. Update the management IP address of branch1\_fgt.

**Answer: A,C**

Explanation:

Specify the gateway of the SD-WAN member port1 with an IP address or use the default value → The error log shows invalid ip - prop[gateway]: ip4class(\${sdwan\_port1\_gw}) invalid ip addr, meaning the variable \${sdwan\_port1\_gw} does not have a valid mapping. Assigning a valid IP address or default value for the gateway resolves this error.

Review the per-device mapping configuration for metadata variables → The issue is tied to how the metadata variable \${sdwan\_port1\_gw} is mapped for branch1\_fgt. If this device does not have the variable properly defined in per-device mapping, the configuration will fail. Correcting the mapping ensures that the install works.

#### NEW QUESTION # 69

(As an IT manager, you want to delegate the installation and management of your SD-WAN deployment to a managed security service provider (MSSP). Each site must maintain direct internet access and be secure. You expect significant traffic flow between the sites and want to delegate as much of the network administration and management as possible to the MSSP.

Which two MSSP deployment blueprints address your requirements? Choose two answers.)

- A. Install the hub and spokes on the customer premises, and enable the MSSP to manage the SD-WAN deployment using FortiManager with a dedicated ADOM.
- B. Install a dedicated hub on the MSSP premises for the customer, and install the spokes on the customer premises.
- C. Use a shared hub on the MSSP premises and a dedicated hub on the customer premises, and install the spokes on the customer premises.
- D. Use a shared hub on the MSSP premises with a dedicated VDOM for the customer, and install the spokes on the

customer premises.

**Answer: B,D**

Explanation:

Your requirements map to two key MSSP goals described in the FCSS SD-WAN 7.6 blueprint patterns:

Delegate as much administration and management as possible to the MSSP

This is best achieved when the hub security and SD-WAN control point is located on the MSSP premises, because the MSSP can centrally operate the core enforcement and overlay control. Both option B (dedicated hub at MSSP) and option D (shared hub at MSSP with customer isolation) meet this requirement.

Each site must maintain direct internet access (DIA) and be secure, with significant site-to-site traffic. In Fortinet SD-WAN MSSP designs, spokes can still use local breakout for DIA while also building secure overlays for inter-site traffic. Placing the hub at the MSSP enables centralized security services and scalable inter-site connectivity management while preserving DIA where required. Options B and D support this operating model.

Why the other options do not best match:

A includes a dedicated hub on the customer premises, which reduces how much the MSSP can centralize and operate from its own environment, so it does not maximize delegation.

C places both hub and spokes on the customer premises. While the MSSP can manage using a dedicated ADOM, this blueprint does not align as strongly with "delegate installation and management" to the MSSP as the designs where the hub is hosted and operated from the MSSP premises.

Therefore, the two MSSP deployment blueprints that address your requirements are B and D.

#### **NEW QUESTION # 70**

Refer to the exhibit.

You want to configure SD-WAN on a network as shown in the exhibit.

The network contains many FortiGate devices. Some are used as NGFW, and some are installed with extensions such as FortiSwitch, FortiAP, or Forti Extender.

What should you consider when planning your deployment?

- A. You must build multiple SD-WAN topologies. Each topology must contain only one type of extension.
- **B. You can build an SD-WAN topology that includes all devices. The hubs must be devices without extensions.**
- C. You can build an SD-WAN topology that includes all devices. The hubs can be FortiGate devices with Forti Extender.
- D. You must use FortiManager to manage your SD-WAN topology.

**Answer: B**

Explanation:

In Fortinet SD-WAN, hubs should not have extensions like FortiSwitch, FortiAP, or FortiExtender installed, as these can affect hub functionality and scalability. While all device types can be included in the topology, the hubs must be "clean" FortiGate devices without such extensions to ensure proper ADVPN and overlay management.

Fortinet SD-WAN Reference Architecture Guide 7.4 - Hub requirements

#### **NEW QUESTION # 71**

Refer to the exhibit.

```

config system sdwan
  config health_check
    edit "DNS"
      set server "4.2.2.1" "4.2.2.2"
      set detect-mode active
      set protocol ping
      set embed-measured-health enable
      set members 3 4
      config sla
        edit 1
          set link-cost-factor latency
          set latency-threshold 100
        end
      next
    end
  end
end

```

The exhibit shows the health-check configuration on a FortiGate device used as a spoke. You notice that the hub FortiGate doesn't prioritize the traffic as expected.

Which two configuration elements should you check on the hub? (Choose two.)

- A. This performance SLA uses the same members.
- B. The performance SLA is configured with set embedded-measure accept.
- C. The performance SLA uses the same criteria.
- D. The performance SLA has the parameter priority-out-sla configured.

**Answer: B,C**

Explanation:

The hub must use a performance SLA with the same criteria as the spoke's health check. The spoke's health check is using ping (protocol ping) and measuring latency (link-cost-factor latency). For the hub to use the data sent by the spoke, its performance SLA must be configured to measure the same metrics. If the hub is looking for jitter or packet loss, it will not use the latency data sent by the spoke.

When a spoke sends embedded health data, the hub FortiGate must be configured to receive and use it. This is done by setting set embedded-measure accept within the performance SLA configuration on the hub. This setting explicitly tells the hub to trust and use the performance metrics received from the remote FortiGate (the spoke). Without this setting, the hub will likely ignore the embedded health data and rely on its own health checks, which could lead to incorrect traffic prioritization.

## NEW QUESTION # 72

.....

We have three versions of our FCSS\_SDW\_AR-7.6 certification guide, and they are PDF version, software version and online version. With the PDF version, you can print our materials onto paper and learn our FCSS\_SDW\_AR-7.6 exam study guide in a more handy way as you can take notes whenever you want to, and you can mark out whatever you need to review later. With the software version, you are allowed to install our FCSS\_SDW\_AR-7.6 Guide Torrent that operate in windows system. With the online version, you can study the FCSS\_SDW\_AR-7.6 guide torrent wherever you like as it can used on all kinds of electronic devices.
