

NSE8_813 Valid Exam Simulator | Exam NSE8_813 Reviews

Our experts are well-aware of the problems of exam candidates particularly of those who can't manage to spare time to study the NSE8_813 exam questions due to their heavy work pressure. Hence, our NSE8_813 study materials have been developed into a simple content and language for our worthy customers all over the world. What is more, you will find there are only the keypoints in our NSE8_813 learning guide.

Fortinet NSE 8 - Recertification Exam Sample Questions (Q41-Q46):

NEW QUESTION # 41

Refer to the exhibit.

```

FS448D-A (LAG-1) # show
config switch trunk
  edit "LAG-1"
    set mode lacp-active
    set mclag-icl enable
    set members "port13" "port14"
  next
end

FS448D-B (LAG-2) # show
config switch trunk
  edit "LAG-2"
    set mode lacp-active
    set mclag-icl enable
    set members "port13" "port14"
  next
end

FortiGate-A # show switch-controller managed-switch
config switch-controller managed-switch
  edit FS448D-A
    config ports
      edit "LAG-3"
        set type trunk
        set mode lacp-active
        set mclag enable
        set members "port15"
      next
    end
  next
  edit FS448D-B
    config ports
      edit "LAG-3"
        set type trunk
        set mode lacp-active
        set mclag enable
        set members "port15"
      next
    end
  next
end

```

Given the configuration shown in the exhibit, which two statements are true? (Choose two.)

- A. LAG-3 on switches on FS448D-A and FS448D-B may be connected to a single 802.3ad trunk on another device.
- B. port13 and port14 on FS448D-A should be connected to port13 and port14 on FS448D-B.

- C. LAG-1 and LAG-2 should be connected to a 4-port single 802.3ad trunk on another device.
- D. LAG-1 and LAG-2 should be connected to a single 4-port 802.3ad interface on the FortiGate-A.

Answer: A,B

NEW QUESTION # 42

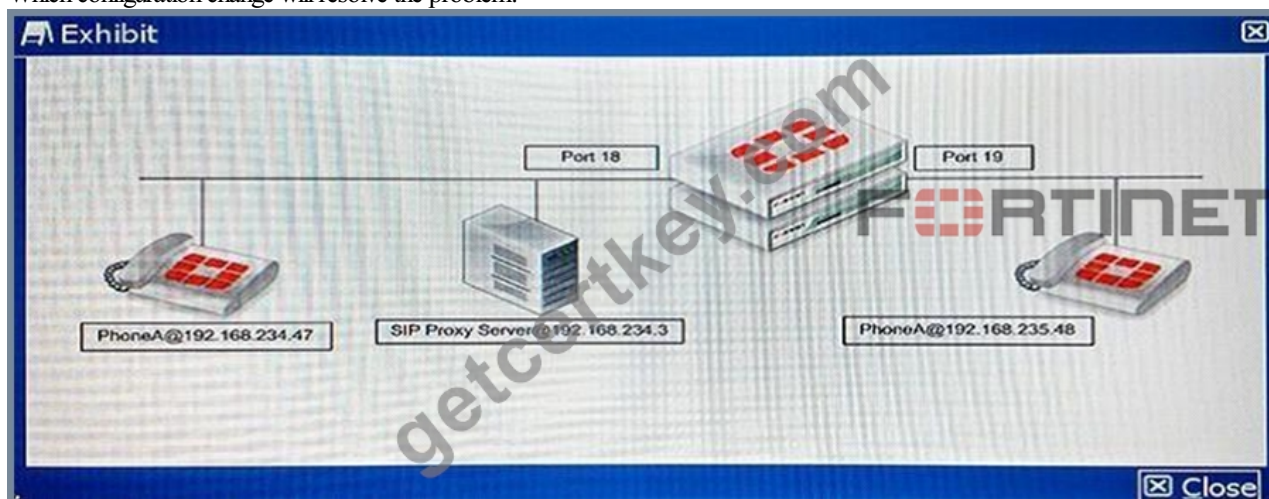

You are hosting Web applications that must be PCI DSS compliant. The Web applications are protected by a FortiWeb. Compliance will be tested during the quarterly security review. In this scenario, which three FortiWeb features should you use? (Choose three.)

- A. the config system advanced set weak_enc disable end command.
- B. Auto-learning
- C. Vulnerability Scan
- D. Syn Cookie
- E. Credit Card Detection

Answer: C,D,E

NEW QUESTION # 43

Referring to the exhibit, users are reporting that their FortiPhones ring but when they pick up, the cannot hear each other. The FortiPhones use SIP to communicate with the SIP Proxy Server and RTP between the phones. Which configuration change will resolve the problem?

```

config firewall policy
edit 1
set srcintf port19
set dstintf port18
set srcaddr 192.168.235.0/24
set dstaddr 192.168.234.0/24
set action accept
set schedule always
set service SIP
set utm-status enable
set voip-profile default
next
end

```

- A.

```

config system settings
set sip-tcp-port 5060
end

```

- B.

```

config firewall policy
edit 1
set srcintf port18
set dstintf port19
set srcaddr 192.168.234.3/24
set dstaddr 192.168.235.0/24
set action accept
set schedule always
set service SIP
set utm-status enable
set voip-profile default
next
end

```

- C.

```

config voip profile
  edit default
    config sip
      set ips-rtp disable
    end
  end
end

```

- D. ~~end~~:RTINET.

Answer: D

NEW QUESTION # 44

A customer with a FortiDDoS 200F protecting their fibre optic internet connection from incoming traffic sees that all the traffic was dropped by the device even though they were not under a DoS attack. The traffic flow was restored after it was rebooted using the GUI.

Which two options will prevent this situation in the future? (Choose two.)

- A. Move the internet connection from the SFP interfaces to the LC interfaces.
- B. Replace with a FortiDDoS 1500F.
- C. Create an HA setup with a second FortiDDoS 200F.
- D. Change the Adaptive Mode.

Answer: B,C

Explanation:

B is correct because creating an HA setup with a second FortiDDoS 200F will provide redundancy in case one of the devices fails. This will prevent all traffic from being dropped in the event of a failure.

D is correct because the FortiDDoS 1500F has a larger throughput capacity than the FortiDDoS 200F. This means that it will be less likely to drop traffic even under heavy load. The other options are incorrect.

NEW QUESTION # 45

A customer is planning on moving their secondary data center to a cloud-based IaaS. They want to place all the Oracle-based systems on Oracle Cloud, while the other systems will be on Microsoft Azure with ExpressRoute service to their main data center. They have about 200 branches with two internet services as their only WAN connections. As a security consultant you are asked to design an architecture using Fortinet products with security, redundancy, and performance as a priority.

Which two design options are true based on these requirements? (Choose two.)

- A. Systems running on Azure will need to go through the main data center to access the services on Oracle Cloud.
- B. Use FortiGate VM for IPSEC over ExpressRoute, as traffic is not encrypted by Azure.
- C. Branch FortiGate devices must be configured as VPN clients for the branches' internal network to be able to access Oracle services without using public IPs.
- D. Two ExpressRoute services to the main data center are required to implement SD-WAN between a FortiGate VM in Azure and a FortiGate device at the data center edge.

Answer: B,C

Explanation:

ExpressRoute supports a couple of encryption technologies to ensure confidentiality and integrity of the data traversing between your network and Microsoft's network. By default traffic over an ExpressRoute connection isn't encrypted.

NEW QUESTION # 46

.....

Getcertkey real Fortinet NSE8_813 Exam Dumps are ideal for applicants who are busy in their routines and want to do quick preparation for the Fortinet NSE8_813 certification test. We guarantee that our actual Fortinet NSE 8 - Recertification Exam (NSE8_813) questions will be enough for you to prepare successfully for the Fortinet NSE 8 - Recertification Exam (NSE8_813) examination.
