Answer: B

Explanation:

The correct answer is:

C . Basic guidance like help menus and tooltips ☐

☐ Explanation

According to SAP's documentation, when WalkMe is embedded within SAP applications (such as SuccessFactors or S/4HANA), users are provided with contextual, in-app guidance features-including smart walkthroughs, tooltips, task lists, and on-demand help menus. These are considered "basic guidance" rather than the full breadth of WalkMe's platform capabilities.

☐ Why the other options are incorrect

* A. The full suite of WalkMe features

Embedded WalkMe content delivers a subset focused on guidance-not the full product suite.

* B. Comprehensive analytics and insights

While analytics are available in the platform, they are not part of the embedded content. Those insights are part of the broader WalkMe offering outside the embedded scope.

Customized training and adoption flows are built and managed in the full WalkMe platform-not included in the out-of-the-box embedded offering.
