Salesforce Health Cloud Accredited Professional Sample Questions (Q113-Q118):

NEW QUESTION # 113

A bug is assigned to a developer stating that when an address contains data in the Address Line 2 field, the FlexCard display adds an additional line, causing formatting issues.

How should the developer handle this in a DataRaptor without changing the underlying data structures?

- A. Create a new Turbo Extract DataRaptor to trim the Address data in both fields.
- B. Add a Load DataRaptor to write the data into one new custom field.
- C. Replace the Extract DataRaptor with a Transform DataRaptor to convert the data as needed.
- **D. Modify the Extract DataRaptor to concatenate the address fields by using a formula.**

Answer: D

NEW QUESTION # 114

A customer is implementing Intelligent Appointment Management in Health Cloud to eliminate swivel chair to other scheduling systems.

Which two connectivity options should a consultant leverage as the scheduling engine?

Choose 2 answers

- A. Business Rules Engine
- B. Scheduler for Industries
- **C. Salesforce Scheduler**
- **D. Electronic Health Record (EHR) System**

Answer: C,D

NEW QUESTION # 115

Bloomington Caregivers would like to display patient information from both Salesforce standard objects and data from an external system.

Which three Health Cloud features should a consultant recommend the company use to display this on the patient record page?

Choose 3 answers

- A. Visualforce Pages
- **B. FlexCards**
- C. Salesforce Flows
- **D. DataRaptors**
- **E. Integration Procedures**

Answer: B,D,E

Explanation:

Step-by-Step Explanation:

Health Cloud Best Practice for Displaying Internal and External Data:

FlexCards (part of OmniStudio) can display data from multiple sources in a unified view on a patient record.

Integration Procedures connect to external systems and bring in data (e.g., from EHRs or other sources).

DataRaptors extract and transform Salesforce data for display and use in FlexCards.

Salesforce Documentation Reference:

"FlexCards can display internal Salesforce data and call Integration Procedures or DataRaptors to bring in external or standard object data."

- OmniStudio Standard Guide

"Integration Procedures are used to retrieve and update data from external systems and can be invoked directly from FlexCards or OmniScripts."

- OmniStudio Integration Procedures

"DataRaptors map Salesforce data to and from FlexCards and Integration Procedures, enabling seamless display of patient information."

- OmniStudio DataRaptors

Other Options:

Salesforce Flows: Good for automation but not for real-time display of combined external and internal data on record pages.

Visualforce Pages: Legacy solution, not recommended for modern Health Cloud patient page display, and does not natively integrate with OmniStudio tools.

Reference:

OmniStudio Standard Guide

OmniStudio Integration Procedures

OmniStudio DataRaptors

NEW QUESTION # 116

Bloomington Caregivers has decided to expand its Health Cloud implementation to include a Crisis Support Center.

Which two steps should an administrator take as part of the implementation?
