Compared with other training materials, why ExamsLabs's CheckPoint 156-315.82 exam training materials is more welcomed by the majority of candidates? First, this is the problem of resonance. We truly understand the needs of the candidates, and comprehensively than any other site. Second, focus. In order to do the things we decided to complete, we have to give up all the unimportant opportunities. Third, the quality of the product. People always determine a good or bad thing based on the surface. We may have the best products of the highest quality, but if we shows it with a shoddy manner, it naturally will be as shoddy product. However, if we show it with both creative and professional manner, then we will get the best result. The ExamsLabs's CheckPoint 156-315.82 Exam Training materials is so successful training materials. It is most suitable for you, quickly select it please.

When you grasp the key points to attend the 156-315.82 exam, nothing will be difficult for you anymore. Our professional experts are good at compiling the 156-315.82 training guide with the most important information. They have been in this career for over ten years, and they know every detail about the 156-315.82 Exam no matter on the content but also on the displays. Believe in our 156-315.82 practice braindumps, and your success is 100% guaranteed!

The three versions are all good with same questions and answers; you can try to use the version of our 156-315.82 Guide materials that is suitable for you. Our 156-315.82 exam questions have many advantages, I am going to introduce you the main advantages of our 156-315.82 study materials, I believe it will be very beneficial for you and you will not regret to use our 156-315.82 learning guide.

CheckPoint Check Point Certified Security Expert - R82 Sample Questions (Q79-Q84):

NEW QUESTION # 79

Which process is responsible for the code generation and compilation of legacy dump files?

- A. Inspect Engine
- B. Stateful Compiler
- C. CPM
- **D. FWM**

Answer: D

Explanation:

For legacy dump files, the Firewall Management process handles the policy code generation and compilation on the Management Server, creating the compiled policy that is then installed on the gateways.

NEW QUESTION # 80

ElasticXL Cluster provide a better administrator experience and performance then the legacy ClusterXL. The Single Management Object (SMO) provides IP access for use in management communication, and policy installation, simplifying the management process. How many IP addresses are used for the management communication? Which statement is true?

- A. 1 single IP address
- B. 2 IP addresses
- C. 3 IP addresses
- D. 4 IP addresses

Answer: A

Explanation:

The Single Management Object (SMO) uses one single IP address for all management communication and policy installation with the ElasticXL cluster, providing a simplified and consistent management interface regardless of the number of cluster members.

NEW QUESTION # 81

Which Management Server Process receives an install command if it comes to install a policy?

- A. The CPWD process invokes the install function.
- B. The CPM process is involved in installing a policy to the gateway.
- C. The FWD process is involved in installing a policy.
- D. The FWM process is involved in installing the policy.

Answer: B

Explanation:

In R8x architecture, the Check Point Management process receives the policy installation request from SmartConsole and orchestrates the entire installation workflow, including preparation of the policy package and coordination with other processes for compilation and transfer to the gateway.

NEW QUESTION # 82

Choose the right command to export management database with logs and log indexes.

- A. `$FWDIR/bin/upgrade_tools/migrate export -x <file>`
- B. `$FWDIR/scripts/migrate_server export -v <target version> -x <file>`
- C. `$FWDIR/bin/upgrade_tools/migrate export -l <file>`
- D. `$FWDIR/scripts/migrate_server export -v <target version> -n <file>`

Answer: B

Explanation:

The command `$FWDIR/scripts/migrate_server export -v <target version> -x <file>` exports the management database along with logs and log indexes, creating a comprehensive package for migration or backup purposes.

NEW QUESTION # 83

Alice knows about the Check Point Management HA installation from Bob and needs to know which Check Point Security Management Server is currently in "Active" state. Alice uses the Check Point SmartConsole tool. Which Check Point Console is needed to lookup for the Management High Availability status?

- A. SmartUpdate -> Package Repository -> Management High Availability
- B. Gaia Portal -> Overall View -> Management High Availability
- C. SmartView Tracker -> Log Search "Mgmt HA Status"
- D. Check Point SmartConsole -> Applications Menu -> Management High Availability

Answer: D
