

Pass-Sure 100% Free PL-600–100% Free New Braindumps Sheet | Reliable PL-600 Real Exam

P.S. Free 2026 Microsoft PL-600 dumps are available on Google Drive shared by It-Tests: <https://drive.google.com/open?id=15zk7riw6fuCoJLXqQc6etfyNi3s8ojP9>

You can also be a part of this wonderful community. To do this you just need to pass the PL-600 certification exam. Are you ready to accept this challenge? Looking for the proven and easiest way to crack the Microsoft PL-600 Certification Exam? If your answer is yes then you do not need to go anywhere. Just download It-Tests Microsoft Power Platform Solution Architect exam questions and start Microsoft Power Platform Solution Architect exam preparation without wasting further time.

Candidates who pass the Microsoft PL-600 certification exam will demonstrate a deep understanding of the Microsoft Power Platform and its capabilities. They will have the skills to design and implement solutions that meet the unique needs of their organization, using tools such as Power Apps, Power Automate, and Power BI. Microsoft Power Platform Solution Architect certification is ideal for professionals who want to enhance their career prospects in the field of business application development and automation, and for organizations looking to hire individuals with the skills and knowledge to design and implement solutions on the Microsoft Power Platform.

Microsoft Power Platform is a suite of tools that allows businesses to analyze, automate, and streamline their operations. It includes a range of applications, such as Power BI, Power Apps, and Power Automate, that can be used to create customized solutions that meet specific business needs. With the PL-600 Certification, professionals can demonstrate their proficiency in using these tools to create effective solutions that drive business growth and success.

Free PDF 2026 Newest PL-600: New Microsoft Power Platform Solution Architect Braindumps Sheet

Obtaining a certificate has many benefits, you can strengthen your competitive force in the job market, enter a better company, and double your wage etc. PL-600 exam bootcamp of us will help you get the certificate successfully. With experienced experts to edit and verify, PL-600 exam dumps are high quality and accuracy. You can pass the exam just one time. In addition, PL-600 Exam Bootcamp contain both questions and answers, and you can check the answer easily. Free update for 365 days is available. Our system will send the latest version of PL-600 exam dumps to you automatically.

Microsoft PL-600 exam is designed to certify the skills and knowledge of professionals who want to work as Microsoft Power Platform Solution Architects. PL-600 exam is ideal for individuals who want to validate their expertise in designing, developing, and implementing solutions that leverage the Microsoft Power Platform. PL-600 Exam covers topics such as data modeling, user experience design, automation, integrations, security, and compliance. Passing PL-600 exam demonstrates that the candidate has the skills and knowledge required to design and implement solutions that meet business requirements using the Microsoft Power Platform.

Microsoft Power Platform Solution Architect Sample Questions (Q92-Q97):

NEW QUESTION # 92

A client plans to implement Microsoft Power Platform solutions.

The client identifies the following requirements for handling opportunities:

- * Users must follow the same set of steps each time they process opportunities
- * For opportunities with values greater than \$20,000, a follow-up date and second contact field must appear on the form.
- * An error message must display if a follow-up date is not within seven days of the opportunity creation date.

You need to recommend tools to meet the client requirements.

What should you recommend? To answer, drag the appropriate tools to the correct requirement. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Tools	Requirement	Tool
Business Rule	Users must follow the same set of steps each time they process opportunities.	
Business process flow	For opportunities with values greater than \$20,000, a follow-up date and second contact field must appear on the form.	
Workflows	An error message must display if a follow-up date is not within seven days of the opportunity creation date.	

Answer:

Explanation:

Tools	Requirement	Tool
Business Rule	Users must follow the same set of steps each time they process opportunities.	Business process flow
Business process flow	For opportunities with values greater than \$20,000, a follow-up date and second contact field must appear on the form.	Business Rule
Workflows	An error message must display if a follow-up date is not within seven days of the opportunity creation date.	Workflows

Explanation

Tools	Requirement	Tool
Business Rule	Users must follow the same set of steps each time they process opportunities.	Business process flow
Business process flow	For opportunities with values greater than \$20,000, a follow-up date and second contact field must appear on the form.	Business Rule
Workflows	An error message must display if a follow-up date is not within seven days of the opportunity creation date.	Workflows

NEW QUESTION # 93

You need to recommend technology for accessing historical job placement data.

What should you recommend?

- A. Virtual tables
- B. Power BI

- C. Power Automate flows
- D. Power Virtual Agents chatbots

Answer: A

Explanation:

A virtual table is a custom table in Microsoft Dataverse that has columns containing data from an external data source. Virtual tables appear in your app to users as regular table rows, but contain data that is sourced from an external database, such as an Azure SQL Database. Rows based on virtual tables are available in all clients including custom clients developed using the Dataverse web services.

Scenario:

First Up uses an on-premises system to manage current and historical patient data including medications and medical visits.

The company plans to reference historical data in the existing system. The records held in these systems will not be migrated to the new solution except for medication information.

The solution must provide a worker appointment booking system that can access worker historical job placement data.

First Up staff members must be able to view and update worker records. They must be able to see current and historical job placement data on the same form in the new solution.

Topic 3, Fabrikam, inc.

Overview

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Background

Fabrikam, Inc. manufactures industrial metal cutting machines. The company installs and services the machines for customers.

Fabrikam has manufacturing plants in Canada, France, and China

a. The company also has regional service organizations that are responsible for installation and maintenance of the machines.

Current environment

Overview

Operations for the company are managed very informally. Only a small number of long-term employees are aware of all manufacturing processes. The company has been experiencing quality issues associated with its manufacturing operations and installations.

The company wants to implement a way to capture quality inspection results for each machine produced. Current inspection checklists are stored in the Files section of a Teams channel for inspectors. Inspectors commonly print the incorrect inspection checklist.

The company has specific inspection stations for certain inspection steps. Each station has the gauges and equipment required for related inspection steps. There is often a backlog at specific inspection stations. This results in delays in shipping machines to customers.

Accounting system

The current system does not handle shop floor or manufacturing planning functionality.

Machines are assigned serial numbers and placed in stock until they are shipped to customers.

Employee information is maintained only within the accounting system. Access to the information is strictly controlled due to privacy regulations and company policies.

Other systems

The company has an enterprise Microsoft 365 subscription. The company uses Microsoft 365 only for sending and receiving email.

The company uses photos of employees to generate employee badges. Photos are uploaded into Microsoft 365 user profiles.

The company recently started using Dynamics 365 Field Service to manage and maintain the machines that it installs for its customers. The app has not been customized.

The company has added roles, skills, and certification proficiencies to Dynamics 365 Field Service resources to support both

customer onsite inspections and final manufacturing inspections.

Requirements

Quality inspection app

Fabrikam is evaluating Microsoft Power Platform to determine whether it can meet the company's requirements for a manufacturing defect and quality inspection solution. Each machine produced must be subjected to a quality inspection at various points during production. Each machine must undergo a more extensive quality inspection before the machine can be shipped to the customer.

Inspection orders

Inspection orders must:

Allow entry of quality ratings of passed or failed for each quality metric identified for the machine being rated.

Include information about the person who performed each inspection step and any comments made by the inspector.

Be automatically marked as failed if one inspection step rating is marked as failed.

Be automatically marked for re-inspection should a machine fail inspection. The new inspection order must be created by using the originating inspection order as a template.

Inspectors must fill in findings comments and upload at least one photo for any inspection step that is marked as failed.

Inspection standardization

Standardized checklists must be stored in the solution for use by inspectors. A copy must be created when a new inspection is initiated. The solution must:

Prevent an inspector from proceeding to the next step of the checklist until required information for a step is entered.

Support the addition of steps to inspections to support custom features added to a machine for a customer.

Support the direct input of measurements from testing gauges to avoid incorrect readings being entered by inspectors.

Provide a visual representation of the testing measurement limits for each step. Include an indication of how the measured value compares to measurement limits and whether the measurement is within tolerance. Users must be able to configure the visualizations to display the minimum value and maximum value, and whether the reading is within the tolerance of a single targeted value. It must also be able to be used for maintenance inspections once the machine has been installed.

Support the ability to store photo references within each inspection step to document defects found during inspections.

Security

Users must be active employees of Fabrikam.

When a user signs into the inspection solution, the solution must display a picture of the employee who has signed in.

Supervisors must be able to modify standard checklists. Other employees must be prevented from modifying checklists.

You must prevent users from changing inspection order data once an inspection is marked as final.

Analytics and reporting

The solution must:

Provide metrics including existing and upcoming demand by inspection station, average time spent per user at a station, and average time a machine spends at each inspection point.

Provide metrics per inspector including number of inspections performed by month, and number of inspections per rating type (pass, fail).

Provide a printed quality certificate to be included with each machine.

Issues

During initial testing of the solution, testers report that they cannot see the photos taken during a previously failed inspection.

NEW QUESTION # 94

An animal welfare organization wants to track the movement of wolf packs in a region. Cameras at specific locations capture images when motion is detected within the camera sensor range. Staff upload the images manually to a shared drive and then analyze the images.

The organization wants to automate image capture and analysis. The organization has the following requirements:

Save captured images in an appropriate location.

Analyze saved images by using an image recognition process.

Display data in real-time dashboards.

You need to recommend the correct technology for the requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Technology option
Save captured images in an appropriate location.	<div>▼</div> <div>Business process flow</div> <div>Desktop flow</div> <div>Instant cloud flow</div> <div>Automated cloud flow</div>
Analyze saved images by using an image recognition process.	<div>▼</div> <div>Instant cloud flow and AI Builder</div> <div>Automated cloud flow and AI Builder</div> <div>Desktop flow and AI Builder</div>
Display data in real-time dashboards.	<div>▼</div> <div>Dynamics 365 interactive experience dashboard</div> <div>Model-driven app dashboard with native graphs</div> <div>Model-driven app dashboard with Power BI</div>

Answer:

Instant cloud flow and AI Builder

Automated cloud flow and AI Builder

Desktop flow and AI Builder

Display data in real-time dashboards.

▼

Dynamics 365 interactive experience dashboard

Model-driven app dashboard with native graphs

Model-driven app dashboard with Power BI

Box 1: Automated cloud flow.

Create a cloud flow when you want your automation to be triggered either automatically, instantly, or via a schedule.

Automated flows: Create an automation that is triggered by an event such as arrival of an email from a specific person, or a mention of your company in social media.

Box 2: Desktop flow and AI Builder

Desktop flows are used to automate tasks on the Web or the desktop. Using Power Automate Desktop you can automate tasks on the desktop as well as the Web.

Box 3: Model-driven app dashboard with Power BI

The Power BI cloud service works with Microsoft Dataverse apps to provide a self-service analytics solution.

Power BI automatically refreshes the app's data displayed.

NEW QUESTION # 95

A company uses Dynamics 365 Sales and Power BI.

Sales managers must be able to keep track of changes to their pipeline in the following ways:

- * Notify the sales managers when an Opportunity changes sales stage.
- * Notify the sales managers when the pipeline drops below 2.5M USD.
- * When reviewing the pipeline in Power BI, a sales executive must be able to add a Playbook to an Opportunity.

You need to recommend a solution that meets the company requirements.

Which combination of solutions should you recommend? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

Notify the sales manager when an Opportunity changes sales stage.

Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft Office 365 Outlook connector
Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft Office 365 users
Microsoft Power Automate, data alerts, and Microsoft Office 365 connector

Notify the sales managers when the pipeline drops below 2.5 USD.

Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft Office 365 Outlook connector
Microsoft Power Automate, Power BI data alerts, and Microsoft Office 365 connector
Microsoft Power Automate, Power BI, Power Apps, and Microsoft Dataverse connector

When reviewing the pipeline in Power BI, a sales executive must be able to add a Playbook to an Opportunity.

Power BI, Power Apps, Microsoft Dataverse connector, and Microsoft Office 365 Outlook connector
Microsoft Power Automate, Data alerts, Microsoft Dataverse connector, and Microsoft Office 365 users
Microsoft Power Automate, Data alerts, and Microsoft Office 365 connector
Microsoft Power Automate, Power BI, Power Apps, and Microsoft Dataverse connector

Answer:

Explanation:

Notify the sales manager when an Opportunity changes sales stage.

Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft Office 365 Outlook connector
Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft Office 365 users
Microsoft Power Automate, data alerts, and Microsoft Office 365 connector

Notify the sales managers when the pipeline drops below 2.5 USD.

Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft Office 365 Outlook connector
Microsoft Power Automate, Power BI data alerts, and Microsoft Office 365 connector
Microsoft Power Automate, Power BI, Power Apps, and Microsoft Dataverse connector

When reviewing the pipeline in Power BI, a sales executive must be able to add a Playbook to an Opportunity.

Power BI, Power Apps, Microsoft Dataverse connector, and Microsoft Office 365 Outlook connector
Microsoft Power Automate, Data alerts, Microsoft Dataverse connector, and Microsoft Office 365 users
Microsoft Power Automate, Data alerts, and Microsoft Office 365 connector
Microsoft Power Automate, Power BI, Power Apps, and Microsoft Dataverse connector

Explanation:

Notify the sales manager when an Opportunity changes sales stage.	<div>Microsoft</div> <table><tr><td>Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft Office 365 Outlook connector</td></tr><tr><td>Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft Office 365 users</td></tr><tr><td>Microsoft Power Automate, data alerts, and Microsoft Office 365 connector</td></tr></table>	Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft Office 365 Outlook connector	Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft Office 365 users	Microsoft Power Automate, data alerts, and Microsoft Office 365 connector

Microsoft Power Automate, data alerts, and Microsoft Office 365 connector					
Notify the sales managers when the pipeline drops below 2.5 USD.	<table><tr><td>Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft Office 365 Outlook connector</td></tr><tr><td>Microsoft Power Automate, Power BI data alerts, and Microsoft Office 365 connector</td></tr><tr><td>Microsoft Power Automate, Power BI, Power Apps, and Microsoft Dataverse connector</td></tr></table>	Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft Office 365 Outlook connector	Microsoft Power Automate, Power BI data alerts, and Microsoft Office 365 connector	Microsoft Power Automate, Power BI, Power Apps, and Microsoft Dataverse connector	
Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft Office 365 Outlook connector					
Microsoft Power Automate, Power BI data alerts, and Microsoft Office 365 connector					
Microsoft Power Automate, Power BI, Power Apps, and Microsoft Dataverse connector					
When reviewing the pipeline in Power BI, a sales executive must be able to add a Playbook to an Opportunity.	<table><tr><td>Power BI, Power Apps, Microsoft Dataverse connector, and Microsoft Office 365 Outlook connector</td></tr><tr><td>Microsoft Power Automate, Data alerts, Microsoft Dataverse connector, and Microsoft Office 365 users</td></tr><tr><td>Microsoft Power Automate, Data alerts, and Microsoft Office 365 connector</td></tr><tr><td>Microsoft Power Automate, Power BI, Power Apps, and Microsoft Dataverse connector</td></tr></table>	Power BI, Power Apps, Microsoft Dataverse connector, and Microsoft Office 365 Outlook connector	Microsoft Power Automate, Data alerts, Microsoft Dataverse connector, and Microsoft Office 365 users	Microsoft Power Automate, Data alerts, and Microsoft Office 365 connector	Microsoft Power Automate, Power BI, Power Apps, and Microsoft Dataverse connector
Power BI, Power Apps, Microsoft Dataverse connector, and Microsoft Office 365 Outlook connector					
Microsoft Power Automate, Data alerts, Microsoft Dataverse connector, and Microsoft Office 365 users					
Microsoft Power Automate, Data alerts, and Microsoft Office 365 connector					
Microsoft Power Automate, Power BI, Power Apps, and Microsoft Dataverse connector					

Box 1: Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft 365 Outlook connector Use Microsoft Dataverse as the data source.

While Power Automate is a robust tool with ever-expanding capabilities, it also handles simple tasks with grace. A universal business need for many organizations is the ability to automate email notifications based on certain criteria: an opportunity is won, send an email to the sales manager; a case is closed, send an email to the customer; a work order is completed, send an email to the customer.

Power Automate can easily accommodate this using the Microsoft 365 Outlook connector.

Box 2: Microsoft Power Automate, Power BI data alerts, and Microsoft 365 connector Data alerts in the Power BI service: Set alerts to notify you when data in your dashboards changes beyond limits you set.

Box 3: Microsoft Power Automate, Power BI, Power Apps, and Microsoft Dataverse connector Reference:

<https://www.velosio.com/blog/2021/01/27/tracking-emails-the-right-way-with-power-automate/>

<https://docs.microsoft.com/en-us/power-bi/create-reports/service-set-data-alerts>

NEW QUESTION # 96

You need to design a Power Platform solution that meets the following requirements:

* Capture data from a row during deletion to be used in an automated process.

* Use AI to process forms and automate data entry from paper-based forms.

Which requirements can be met by using out-of-the box Power Platform components?

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

	Yes	No
Capture data from a row during deletion to be used in an automated process.	<input type="radio"/>	<input type="radio"/>
Use AI to process forms and automate data entry from paper-based forms.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

	Yes	No
Capture data from a row during deletion to be used in an automated process.	<input checked="" type="radio"/>	<input type="radio"/>
Use AI to process forms and automate data entry from paper-based forms.	<input checked="" type="radio"/>	<input type="radio"/>

Explanation:

	Yes	No
Capture data from a row during deletion to be used in an automated process.	<input type="radio"/>	<input type="radio"/>
Use AI to process forms and automate data entry from paper-based forms.	<input type="radio"/>	<input type="radio"/>

Box 1: Yes

This can be done with Dataverse flows: The When a row is added, modified or deleted trigger runs a flow whenever a row of a selected table and scope changes or is created.

Box 2: Yes

AI Builder is a Microsoft Power Platform capability that provides AI models that are designed to optimize your business processes. AI Builder enables your business to use AI to automate processes and glean insights from your data in Power Apps and Power Automate.
