C_S4EWM_2023 Quiz - C_S4EWM_2023 Test Cram Pdf

At Real4test, we strive hard to offer a comprehensive SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management (C_S4EWM_2023) exam questions preparation material bundle pack. The product available at Real4test includes SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management (C_S4EWM_2023) real dumps pdf and mock tests (desktop and web-based). Practice exams give an experience of taking the SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management (C_S4EWM_2023) actual exam.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Sample Questions (Q48-Q53):

NEW QUESTION # 48

Where must a bin be unique in SAP Extended Warehouse Management?

- **A. In the warehouse**
- B. In the storage type
- C. In the storage section
- D. In the activity area

Answer: A

Explanation:

Comprehensive and Detailed In-Depth Explanation:

In SAP EWM, a storage bin must be unique across the entire warehouse number to ensure accurate stock tracking, as defined in SPRO: SCM Extended Warehouse Management > Master Data > Storage Bins. Option D ("In the warehouse") is correct. Options A, B, and C (section, activity area, storage type) are organizational levels within the warehouse, but uniqueness is enforced at the warehouse level.

NEW QUESTION # 49

What can you do with a hot-spot in the warehouse management monitor.

- A. Create a basic measurement service.
- B. Change from the list view to the form view of the selected object.
- **C. Call a method to perform actions on the selected object.**
- D. Call the corresponding user interface on the selected object.

Answer: C

Explanation:

Hot-Spot Functionality in the Warehouse Management Monitor

* A hot-spot is an interactive element in the Warehouse Management Monitor that allows you to trigger predefined actions directly on a selected object.

* Example: Clicking on a hot-spot in the monitor can execute a method such as releasing a warehouse task or reprocessing an object.

Excluded Options

* Option A: Creating a basic measurement service is not a hot-spot function; it is part of cockpit configuration.

* Option C: Switching between list and form views is a UI navigation feature, not specific to hot-spots.

* Option D: Calling a UI interface can be indirectly related but is not the primary function of a hot-spot.

SAP S/4HANA Cloud Private Edition Reference

* Refer to SAP documentation under Warehouse Management Monitor Functions and Features for more details.

NEW QUESTION # 50

Which assignment do you make to create external process steps in process-oriented storage control?

- A. External process step to an internal process step
- B. External process step to a warehouse process type
- **C. External process step to a storage process**
- D. External process step to a warehouse storage type

Answer: C

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Process-oriented storage control (POSC) in SAP EWM manages complex processes with internal and external steps (e.g., deconsolidation, VAS). Option B ("External process step to a storage process") is correct because external steps (e.g., quality check) are assigned to a storage process in SPRO: SCM Extended Warehouse Management > Cross-Process Settings > Process-Oriented Storage Control > Define Storage Process, linking them to the overall flow. Options A, C, and D are incorrect as they don't align with POSC configuration logic.

NEW QUESTION # 51

For what type do you define the replenishment method?

- A. Document type
- B. Warehouse process type
- C. Material type
- **D. Storage type**

Answer: D

NEW QUESTION # 52

Using embedded EWM, what options do you have for the goods receipt posting for external procurement?

Note: There are 2 correct answers to this question.

- A. Use synchronous goods receipt where you post the GR in EWM.
- **B. Use the EWM Inbound Delivery to post goods receipt.**
- C. Use synchronous goods receipt where you post the GR in ERP.
- **D. Use the ERP Inbound Delivery to post goods receipt.**

Answer: B,D

Explanation:

Comprehensive and Detailed In-Depth Explanation:

In embedded EWM within SAP S/4HANA Cloud, Private Edition, goods receipt (GR) for external procurement can be posted using two primary methods. Option B ("Use the ERP Inbound Delivery to post goods receipt") is correct because the ERP inbound delivery (created in SAP ERP/S/4HANA MM) serves as the reference document, which is then replicated to EWM for warehouse processing. Option C ("Use the EWM Inbound Delivery to post goods receipt") is also correct because the inbound delivery in EWM, derived from the ERP document, is where the actual GR is confirmed and posted back to ERP via integration.

Synchronous GR (options A and D) is not a standard feature in embedded EWM for external procurement, as the process relies on asynchronous communication between ERP and EWM via queued remote function calls (qRFC). The GR posting is finalized in ERP based on EWM confirmation, ensuring inventory alignment.

NEW QUESTION # 53

.....

Do you want to obtain the latest information for your exam timely? Then you can choose us, since we can do that for you.

C_S4EWM_2023 study guide of us offers you free update for 365 days, so that you can get the latest information for the exam timely. And the latest version for C_S4EWM_2023 exam materials will be sent to your email automatically. In addition, C_S4EWM_2023 Exam Materials are compiled by experienced experts who are quite familiar with the exam center, therefore the quality can be guaranteed. We have online and offline service, and if you have any questions for C_S4EWM_2023 exam dumps, you can consult us.
