Nonprofit-Cloud-Consultant Latest Exam Simulator & Cheap Nonprofit-Cloud-Consultant Dumps

Our Nonprofit-Cloud-Consultant guide materials are high quality and high accuracy rate products. It is all about the superior concreteness and precision of the Nonprofit-Cloud-Consultant exam questions that helps. Every page and every points of knowledge have been written from professional experts who are proficient in this line and are being accounting for this line over ten years. And they know every detail about our Nonprofit-Cloud-Consultant learning prep and can help you pass the exam for sure.

Salesforce Certified Nonprofit Cloud Consultant Exam Sample Questions (Q57-Q62):

NEW QUESTION # 57
A nonprofit organization uses Action Plans to guide its work on client Care Plans. The organization needs to add more tasks to an active Action Plan Template. What should the organization do to update the Action Plan Template in Nonprofit Cloud?

- A. Deactivate the Action Plan Template, add tasks, and then publish the template.
- B. Clone the Action Plan Template, add tasks, and then publish the template.
- C. Clone the Action Plan Template, select "Let users add items to action plans", and then publish the template.

Answer: B

Explanation:
In Salesforce Nonprofit Cloud, Action Plan Templates are used to standardize repeatable processes, such as the steps required to onboard a new client or complete a grant application. To ensure data integrity and version control, Salesforce treats published Action Plan Templates as "locked" records.
When an organization needs to modify an "Active" or "Published" template-such as adding new tasks-the system does not allow direct editing of the existing record to prevent breaking current active Action Plans that were generated from that specific version. The standard procedure for a consultant is as follows:
* Clone the Template: The user must select the existing Action Plan Template and use the Clone action. This creates a new "Draft" version of the template with all the existing tasks copied over.
* Modify the Draft: In the new draft record, the consultant can add the additional tasks, define their priority, set the number of days for completion, and assign roles or specific users to those tasks.
* Publish: Once the modifications are complete, the new template must be Published. Publishing makes the template available for users to generate new Action Plans.
* Retire the Old Template: Although not strictly required to make the new tasks work, it is best practice for a consultant to deactivate or rename the old version to ensure staff only use the most up-to-date process moving forward.
Option B is incorrect because Salesforce does not typically allow you to "deactivate and edit" the task structure of a template that has already been published. Option A describes a specific setting that allows end- users to add extra tasks to an individual instance of a plan, but it does not address the requirement of updating the master template itself.

NEW QUESTION # 58
A consultant is assisting a nonprofit in its data integration and mapping between two systems. The consultant is unsure when a particular field was added to NPSP.
Where can the consultant find the NPSP version number for the field in question?

- A. NPSP Data Dictionary
- B. Schema Builder
- C. NPSP package details
- D. Custom field definition detail

Answer: A

Explanation:
https://powerofus.force.com/s/article/NPSP-Which-Version-Am-I-Using

NEW QUESTION # 59
An international nonprofit organization added a translated relationship picklist value, however the reciprocal relationship record is not displaying correctly.
What is the cause of this error?

- A. The language is not supported in NPSP.
- B. The system administrator did not add the reciprocal relationship value in the NPSP Settings tab.
- C. The current user does not have the correct locale.
- D. The system administrator did not enable the Translation Workbench.

Answer: B

NEW QUESTION # 60
A nonprofit fundraiser notices that some of the NPSP calculated donation summary fields on the Contact and Account records are displaying incorrect values when compared to the donations recorded for each donor.
What are three items the consultant should review to trouWeshoot the issue?
Choose 3 answers

- A. Opportunity Stages
- B. Salesforce Optimizer report
- C. NPSP Health Check
- D. Campaign Hierarchy
- E. Customizable Rollups

Answer: B,C,E

NEW QUESTION # 61

A nonprofit organization provides direct care services to clients based on their individual needs. The process for clients to begin receiving services includes meeting with a caseworker for an intake evaluation that includes a series of questions to determine the client's needs and assets. Which Salesforce Industries feature can be used to create an efficient intake process?

- A. Actionable Lists
- B. Dynamic Assessments
- C. Interaction Summaries

Answer: B

Explanation:
For organizations delivering personalized social services, the intake evaluation is the most critical touchpoint.
To manage this efficiently, Salesforce Nonprofit Cloud utilizes Dynamic Assessments, a feature built upon the Discovery Framework and OmniStudio (specifically OmniScript).
Unlike a static form, a Dynamic Assessment allows a caseworker to navigate a "branching" path of questions.
If a client answers "Yes" to a question about housing instability, the system can automatically trigger a sub- section of questions regarding shelter history. If they answer "No," those questions remain hidden, reducing
"form fatigue" and ensuring the intake is as fast and relevant as possible.
Step-by-Step Implementation for the Consultant:
* Define Assessment Questions: Using the Discovery Framework, the consultant creates a library of individual questions (e.g., "Do you have dependable transportation?"). These questions are modular and can be reused across different intake forms.
* Build the OmniScript: The consultant uses the OmniScript Designer to arrange these questions. This is where the Conditional Logic is applied (e.g., "Set Element Visibility" based on prior answers).
* Map to Objects: Through DataRaptors or Integration Procedures, the consultant ensures that the data captured during the assessment is automatically pushed into the correct Salesforce objects, such as Person Accounts, Case Proceedings, or Life Events.
* Action Plan Integration: Often, the completion of a Dynamic Assessment is linked to an Action Plan, which might automatically generate a "Welcome Kit" task or a "Referral" based on the needs identified during intake.
By using Dynamic Assessments, the nonprofit ensures a standardized, compliant, and data-driven intake process that captures a 360-degree view of the client's assets and barriers to success without requiring the caseworker to navigate through irrelevant fields.

NEW QUESTION # 62

......

After successful competition of the Nonprofit-Cloud-Consultant certification, the certified candidates can put their career on the right track and achieve their professional career objectives in a short time period. However, to pass the Nonprofit-Cloud-Consultant Exam you have to prepare well. For the quick Nonprofit-Cloud-Consultant exam preparation the Nonprofit-Cloud-Consultant Questions are the right choice.
