Answers Cisco 100-160 Real Questions | 100-160 Test Dumps Demo

Our website aimed to help you to get through your certification test easier with the help of our valid 100-160 vce braindumps. You just need to remember the answers when you practice 100-160 real questions because all materials are tested by our experts and professionals. Our 100-160 Study Guide will be your first choice of exam materials as you just need to spend one or days to grasp the knowledge points of 100-160 practice exam.

Cisco Certified Support Technician (CCST) Cybersecurity Sample Questions (Q115-Q120):

NEW QUESTION # 115

Which of the following is a common security control measure used to protect applications from unauthorized access?

- A. File compression
- B. Hard disk formatting
- C. Data anonymization
- **D. Biometric authentication**

Answer: D

Explanation:

Biometric authentication is a security control measure that uses physical or behavioral characteristics, such as fingerprint scanning or facial recognition, to verify a user's identity. By implementing biometric authentication, organizations can add an extra layer of protection to their applications and control access to sensitive data. File compression, data anonymization, and hard disk formatting are not directly related to application security measures.

NEW QUESTION # 116

Which of the following is an example of a secure remote access technology?

- A. FTP
- **B. SSH**
- C. SNMP
- D. Telnet

Answer: B

Explanation:

SSH (Secure Shell) is a secure remote access protocol that provides encrypted communication between remote devices. Unlike Telnet, which transmits data in plaintext, SSH encrypts the data, making it more secure for remote access to devices or systems. FTP (File Transfer Protocol) and SNMP (Simple Network Management Protocol) are not specifically designed for remote access and do not provide the same level of security as SSH.

NEW QUESTION # 117

Which of the following features help to secure a wireless SoHo network from unauthorized access?

- A. Weak encryption
- **B. MAC filtering**
- C. Default admin credentials
- D. SSID broadcast

Answer: B

NEW QUESTION # 118

You need to design your company's password policy to adhere to the National Institute of Standards and Technology (NIST) guidelines for user password security.

What is the minimum password length that you should require to be consistent with the NIST guidelines?

- A. 4 characters
- B. 16 characters
- C. No minimum length
- **D. 8 characters**

Answer: D

Explanation:

According to the CCST Cybersecurity course, NIST guidelines (SP 800-63B) recommend a minimum password length of 8 characters for user-generated passwords, without requiring overly complex composition rules, but encouraging longer passphrases for increased security.

"NIST guidelines specify that user-generated passwords must be at least 8 characters in length, and systems should allow passwords

up to at least 64 characters." (CCST Cybersecurity, Essential Security Principles, Authentication Best Practices section, Cisco Networking Academy)

NEW QUESTION # 119

What is the purpose of conducting a hardware inventory assessment on an endpoint system?

- A. To ensure compliance with hardware standards
- B. To track changes made to hardware configurations
- C. To determine software compatibility requirements
- D. To identify potential gaps in security policies

Answer: A

Explanation:

Conducting a hardware inventory assessment helps organizations ensure compliance with their hardware standards. By maintaining an up-to-date inventory of hardware components, organizations can identify any deviations from their standard configurations and take necessary actions to address them.

NEW QUESTION # 120

.....

We strongly recommend using our Cisco 100-160 exam dumps to prepare for the Cisco 100-160 certification. It is the best way to ensure success. With our Cisco Certified Support Technician (CCST) Cybersecurity (100-160) practice questions, you can get the most out of your studying and maximize your chances of passing your Cisco Certified Support Technician (CCST) Cybersecurity (100-160) exam.
