With these innovative content and displays, our company is justified in claiming for offering unique and unmatched CFE-Investigation Study Material to certifications candidates. And you won't regret for your choice if you buy our CFE-Investigation practice engine.

The Certified Fraud Examiner (CFE) credential is a globally recognized certification for professionals who specialize in detecting, deterring, and investigating fraud. The CFE credential is awarded by the Association of Certified Fraud Examiners (ACFE), the world's largest anti-fraud organization. The CFE-Investigation Exam, also known as the CFE-Exam, is one of the three exams required to become a Certified Fraud Examiner.

The CFE-Investigation Certification is geared towards those professionals who are actively involved in the field of fraud investigation. The ACFE recognizes that even with the CFE credential, there is still a need for specialized knowledge in the area of fraud investigations. Therefore, they created a certification that focuses on advanced techniques and skills required to conduct effective fraud investigations.

## ACFE Certified Fraud Examiner - Investigation Exam Sample Questions (Q14-Q19):

### NEW QUESTION # 14

Jana, the controller of XYZ Company, notices that the company's hotel expenses increased substantially from the prior year. She wants to check to see if this increase is reasonable by comparing hotel expenses from both years to the number of days XYZ's

employees traveled. Which of the following data analysis functions would be the MOST USEFUL in helping Jana analyze these two variables?

- A. Benford's Law analysis
- B. Duplicate testing
- C. Verifying multiples of a number
- D. Correlation analysis

**Answer: D**

Explanation:

The 2014 International Fraud Examiners Manual provides:

"Fraud examiners can use a correlation analysis to determine the relationships between different variables in raw data... For example, there should be a strong correlation between the independent and dependent variables because there is a direct relationship between them. Hotel costs should increase as the number of days travelled increases." CFE Prep - Investigations echoes this:

"Using the correlation analysis function, fraud examiners can determine the relationships between different variables in the raw data. For example... Hotel costs should increase as the number of days travelled increases." Thus, the most useful analysis is Correlation analysis.

#### **NEW QUESTION # 15**

Tonya, a suspect in a kickback scheme, is being interviewed by Carlos, a fraud examiner. As the interview progresses. Carlos notices that Tonya is exhibiting signs of stress, such as repeatedly touching her face, crossing and uncrossing her legs, and darting her eyes around the room. Carlos should conclude that Tonya's behavior is the result of deception

- A. False
- B. True

**Answer: B**

#### **NEW QUESTION # 16**

Tonya, a suspect in a kickback scheme, is being interviewed by Carlos, a fraud examiner. As the interview progresses. Carlos notices that Tonya is exhibiting signs of stress, such as repeatedly touching her face, crossing and uncrossing her legs, and darting her eyes around the room. Carlos should conclude that Tonya's behavior is the result of deception

- A. False
- B. True

**Answer: A**

Explanation:

\* "Signs of stress do not always mean that a subject is lying... While lying and deception do cause stress, it is not necessarily true that all stress exhibited during an interview is caused by lying".

\* The Prep guide confirms: "While lying and deception do indeed cause stress, it is not necessarily true that all stress exhibited during an interview is caused by lying".

Therefore, Carlos should not automatically conclude deception from stress behaviors.

#### **NEW QUESTION # 17**

Which of the following is a common characteristic that asset hiders look for in the financial vehicles they use to conceal their assets?

- A. Traceability
- B. Exclusivity
- C. Transparency
- D. Accessibility

**Answer: D**

Explanation:

The 2014 International Fraud Examiners Manual states:

"Asset hiders look for certain characteristics in the financial vehicles they use to conceal assets. Asset hiders want products that are liquid (i.e., items that can be purchased and sold in a short period of time). Moreover, asset hiders want products that are difficult to trace or untraceable. With such instruments, asset hiders can break or muddy links between the initial receipt of the assets and their final disposition. Asset hiders also look for products that are secure and accessible." TheCFE Prep - Investigationsguide confirms: "Asset hiders want products that are liquid, difficult to trace, secure, and accessible... NOT transparent."

#Interpretation:

- \* Accessibility= common desirable trait (correct).
- \* Transparency= opposite of concealment (not desirable).
- \* Exclusivity= not a standard consideration.
- \* Traceability= asset hiders want the opposite (difficult to trace).

## NEW QUESTION # 18

Which of the following is NOT a step a fraud examiner must take before seizing evidence in a digital forensic investigation?

- A. Assemble an investigation team comprised only of outside digital forensic experts.
- B. Obtain and become familiar with any applicable legal orders.
- C. Ensure that any software used in a forensic capacity is legitimate.
- D. Determine whether there are privacy issues related to the items(s) to be searched.

**Answer: D**

## NEW QUESTION # 19

.....
