NEW QUESTION # 99

What is the configuration required to automatically calculate the Jeopardy Score and priority when an orchestration process is planned or re-planned?

- A. Check the Replan Instantly parameter in the orchestration process.
- B. Schedule the process plan orchestration processes.
- C. Schedule the process refresh and start the order promising server.
- D. Check the change mode parameter to Advanced on the orchestration process.

Answer: A

Explanation:
You can enable the Replan Instantly feature when you define an orchestration process. It replans the orchestration process immediately after this process completes the orchestration process step, and then displays the revised order data according to the replanning work that it does. It is recommended that you use Replan Instantly only for high priority sales orders, or with sales orders that include a jeopardy threshold of less than one day. For performance reasons, it is recommended that you do not use it with an orchestration process step that is long or complex. If Replan Instantly does not contain a check mark, then Order Management updates the planning data only during the scheduled replanning.

NEW QUESTION # 100

Within Oracle Transaction BI Answers, which two tasks would you use the Analysis Editor to perform?

- A. Creating prompts and filters

NEW QUESTION # 101

The order manager in your company likes to monitor order delivery commitments in real time for customers.
Identify the Order Management Oracle Transactional Business Intelligence (OTBI) dashboard that can be used to get all possible root causes for orders that are not fulfilled on time.

- A. Orders on Backorder
- B. Orders on Hold
- C. Orders in Jeopardy
- D. Fulfillment line in Jeopardy
- E. Orders on Past Due

Answer: E

Explanation:
Orders in jeopardy - Details - The Fulfillment Lines in Jeopardy Analysis shows the number of fulfillment lines that are in jeopardy, using a bar for each jeopardy priority that you have defined. For example, a range can indicate high, medium, or low jeopardy priorities. You can click a range bar to drill down to the Manage Fulfillment Lines page, which displays a list of fulfillment lines restricted to the exception type that corresponds to that range, as indicated by an icon in the Exception Type column.
Orders on Past Due - Details and allows filtering based upon :
#Year
#Inventory Organization Name
#Item Name
#Business Unit Name
#Bill-to Customer Name
#Ship-to Customer Name
So Past due seems to give root cause details while Jeopardy gives ranges
