- **E. Performance: Leverage the power of SAP HANA Cloud**

**Answer: A,C,D,E**

#### NEW QUESTION # 66

Which of the following activities does SAP Business Data Cloud cockpit support? Note: There are 2 correct answers to this question.

- **A. Configure SAP Business Data Cloud**
- **B. Discover and activate data products**
- C. Enhance Analytic Models
- D. Debug authorization issues

**Answer: A,B**

Explanation:

The SAP Business Data Cloud (BDC) Cockpit serves as the central administrative and operational interface for managing the BDC environment. Among its core functionalities, it directly supports the ability to configure SAP Business Data Cloud. This includes setting up connections, managing spaces, configuring system parameters, and generally overseeing the platform's infrastructure. It provides administrators with the necessary tools to tailor the BDC environment to specific organizational needs. Additionally, the cockpit is instrumental in allowing users to discover and activate data products. Data products are pre-built, semantically rich data assets that encapsulate business logic and data from various sources, offered within the BDC ecosystem. The cockpit acts as a

marketplace or catalog where users can find relevant data products, understand their content, and activate them for use in their analytics and applications. While "Enhance Analytic Models" is done in tools like SAP Datasphere's Data Builder and debugging authorization issues might involve various tools, direct configuration and data product management are key features of the BDC Cockpit.

#### NEW QUESTION # 67

If you schedule a publication, what management options do you have for the schedule?

There are 2 correct answers to this question.

Response:

- A. Discontinue
- B. Reschedule
- C. Modify
