DSCI Certified Privacy Lead Assessor DCPLA certification Sample Questions (Q35-Q40):

NEW QUESTION # 35

"Evaluate the state of awareness of the organization with respect to privacy, privacy principles, privacy regulations and preparedness." This is an imperative of which DPF practice area?

- A. Personal Information Security (PIS)
- B. Privacy Awareness and Training (PAT)
- C. Privacy Policy and Processes (PPP)
- D. Visibility over Personal Information (VPI)

Answer: B

Explanation:

The DSCI Privacy Framework clearly places the responsibility of evaluating organizational awareness about privacy laws, principles, and operational readiness under the "Privacy Awareness and Training (PAT)" practice area. This includes assessing:

- * Employee understanding of privacy responsibilities
- * Organization-wide preparedness
- * Scope and effectiveness of training initiatives

PAT ensures that individuals at all levels of the organization are informed and competent in handling privacy matters.

NEW QUESTION # 36

What is a Data Subject? (Choose all that apply.)

- A. An individual who provides his/her data/information for availing any service
- B. A company providing PI of its employees for processing
- C. An individual whose data/information is processed
- D. An individual who processes the data/information of individuals for providing necessary services
- E. An individual who collects data from illegitimate sources

Answer: A,C

Explanation:

According to the DSCI Privacy Framework and aligned international frameworks such as GDPR and APEC, a "Data Subject" refers to:

"An identified or identifiable natural person to whom the personal data relates." This includes individuals whose data is being collected, held, or processed by any entity. Thus:

- * A (an individual providing their data to avail a service) is a data subject because the data is about them.
- * C (an individual whose data/information is processed) directly matches the definition.

Options B, D, and E refer to entities or persons involved in processing or handling the data, not the individuals to whom the data belongs.

NEW QUESTION # 37

Certification once granted, will be valid for period of _____ years subject to surveillance assessments.

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

Explanation:

As per DAF#P guidelines, the certification issued by DSCI remains valid for a period of three years, during which surveillance assessments are conducted to verify continued compliance. These surveillance checks help ensure the privacy program maintains its effectiveness over time.

NEW QUESTION # 38

"Data which cannot be attributed to a particular data subject without use of additional information." Which of the following best describes the above statement?

- A. None of the above
- **B. Pseudonymized Data**
- C. Anonymized Data
- D. Metadata

Answer: B

NEW QUESTION # 39

FILL BLANK

PIS

The company has a well-defined and effectively implemented security policy. As in case of access control, the security controls vary in different client relationships based on the client requirements but certain basic or hygiene security practices / controls are implemented organization wide. The consultants have advised the information security function to realign the company's security policy, risk assessment, data classification, etc to include privacy aspects. But the consultants are struggling to make information security function understand what exact changes need to be made and the security function itself is unable to figure it out.

(Note: Candidates are requested to make and state assumptions wherever appropriate to reach a definitive conclusion) Introduction and Background XYZ is a major India based IT and Business Process Management (BPM) service provider listed at BSE and NSE. It has more than 1.5 lakh employees operating in 100 offices across 30 countries. It serves more than 500 clients across industry verticals - BFSI, Retail, Government, Healthcare, Telecom among others in Americas, Europe, Asia-Pacific, Middle East and Africa. The company provides IT services including application development and maintenance, IT Infrastructure management, consulting, among others. It also offers IT products mainly for its BFSI customers.

The company is witnessing phenomenal growth in the BPM services over last few years including Finance and Accounting including credit card processing, Payroll processing, Customer support, Legal Process Outsourcing, among others and has rolled out platform based services. Most of the company's revenue comes from the US from the BFSI sector. In order to diversify its portfolio, the company is looking to expand its operations in Europe. India, too has attracted company's attention given the phenomenal increase in domestic IT spend esp. by the government through various large scale IT projects. The company is also very aggressive in the cloud and mobility space, with a strong focus on delivery of cloud services. When it comes to expanding operations in Europe, company is facing difficulties in realizing the full potential of the market because of privacy related concerns of the clients arising from the stringent regulatory requirements based on EU General Data Protection Regulation (EU GDPR).

To get better access to this market, the company decided to invest in privacy, so that it is able to provide increased assurance to potential clients in the EU and this will also benefit its US operations because privacy concerns are also on rise in the US. It will also help company leverage outsourcing opportunities in the Healthcare sector in the US which would involve protection of sensitive medical records of the US citizens.

The company believes that privacy will also be a key differentiator in the cloud business going forward. In short, privacy was taken up as a strategic initiative in the company in early 2011.

Since XYZ had an internal consulting arm, it assigned the responsibility of designing and implementing an enterprise wide privacy program to the consulting arm. The consulting arm had very good expertise in information security consulting but had limited expertise in the privacy domain. The project was to be driven by CIO's office, in close consultation with the Corporate Information Security and Legal functions.

Can you please guide the information security function to realign company's security initiatives to include privacy protection, keeping in mind that the client security requirements would vary across relationships?

(250 to 500 words)

Answer:

Explanation:

See the answer in explanation below.
