Topic 5	<ul style="list-style-type: none"><li>TOGAF Business Scenario method: The focal point of this OGBA-101 Exam Topic is the application of the TOGAF Business Scenario method.</li></ul>
Topic 6	<ul style="list-style-type: none"><li>Organization Mapping: In this topic of the TOGAF Business Architecture Foundation exam, TOGAF business architects learn how to apply organization mapping when developing a Business Architecture.</li></ul>
Topic 7	<ul style="list-style-type: none"><li>Introduction to TOGAF Business Architecture Foundation: This topic gives aspiring TOGAF business architects basic knowledge about the Business Architecture Foundation.</li></ul>

## The Open Group TOGAF Business Architecture Foundation Exam Sample Questions (Q19-Q24):

### NEW QUESTION # 19

What are the four architecture domains that the TOGAF standard deals with?

- A. Capability, Segment, Enterprise, Federated
- B. Application, Data, Information, Knowledge
- C. Baseline, Candidate, Transition, Target
- D. Business, Data, Application, Technology**

### Answer: D

Explanation:

TOGAF defines four core architecture domains: Business, Data, Application, and Technology. These domains collectively represent the key areas covered in enterprise architecture, where the Business Architecture defines business strategy and organizational goals; Data Architecture addresses data management and structure; Application Architecture focuses on system and software applications; and Technology Architecture outlines the IT infrastructure.

References: TOGAF Standard, Architecture Domains (Chapter 3).

TOGAF, as a comprehensive Enterprise Architecture framework, divides the architecture landscape into four interrelated domains:

- \* **Business Architecture:** This domain focuses on the organization's strategic goals, business processes, and organizational structure. It defines how the business operates and creates value.
- \* **Data Architecture:** This domain deals with the structure, organization, and management of data assets within the enterprise. It includes logical and physical data models, data storage, and data security.
- \* **Application Architecture:** This domain describes the applications used to support the business, their interactions, and their alignment with business processes. It provides a blueprint for the application portfolio.
- \* **Technology Architecture:** This domain covers the technology infrastructure that supports the applications and data. It includes hardware, software, networks, and IT services.

These four domains provide a holistic view of the enterprise and how its different components work together.

### NEW QUESTION # 20

Which of the following can be used to help define information concepts in an information map?

- A. Statement of business goals and drivers
- B. Stakeholder Map
- C. Value streams
- D. Organization Map

**Answer: A**

Explanation:

A statement of business goals and drivers can be used to help define information concepts in an information map. Here's a detailed explanation:

Information Map:

Definition: An information map represents the structure and interaction of information assets that support key business functions and processes. It is used to visualize how information flows within the enterprise.

Role of Business Goals and Drivers:

Business Goals: These are the strategic objectives that the business aims to achieve. They provide direction and context for defining the information needs of the organization.

Business Drivers: These are the factors that influence the business strategy and operations. They help in understanding the priorities and requirements for information management.

Using Goals and Drivers to Define Information Concepts:

Alignment: By aligning information concepts with business goals and drivers, architects can ensure that the information map reflects the strategic priorities of the organization.

Relevance: Business goals and drivers help in identifying the most relevant information assets and understanding how they support the achievement of business objectives.

TOGAF Reference:

Phase A: Architecture Vision: During this phase, business goals and drivers are identified and used to shape the architecture vision and requirements.

Phase C: Information Systems Architectures: In this phase, the data architecture is developed, and business goals and drivers are used to define the information concepts and data structures needed to support the business.

In summary, a statement of business goals and drivers helps define information concepts in an information map by ensuring that the information assets are aligned with the strategic priorities and needs of the organization.

## NEW QUESTION # 21

Which of the following supports the need to govern Enterprise Architecture?

- A. The stakeholder preferences may go beyond the architecture project scope and needs control.
- B. The TOGAF standard cannot be used without executive governance.
- C. The Architecture Project mandates the governance of the target architecture.
- D. Best practice governance enables the organization to control value realization.

**Answer: D**

Explanation:

One of the reasons that supports the need to govern Enterprise Architecture is that best practice governance enables the organization to control value realization. Value realization is the process of ensuring that the expected benefits from implementing an Enterprise Architecture are achieved and sustained over time. Best practice governance provides a framework and mechanisms for monitoring and evaluating the performance and outcomes of Enterprise Architecture initiatives, as well as ensuring alignment with strategic objectives and stakeholder expectations.

[https://pubs.opengroup.org/togaf-standard/adm-practitioners/adm-practitioners\\_15.html](https://pubs.opengroup.org/togaf-standard/adm-practitioners/adm-practitioners_15.html) In short, the implementation team is directed to create changes with intentional value-based outcomes. Best practice governance enables the organization to control value realization.

## NEW QUESTION # 22

What is the purpose of the Standards Library within the Architecture Repository?

- A. It defines the parameters, structures, and processes to support governance.
- B. It provides standard templates and patterns that must be used to create new architectures.
- C. It provides a record of the governance activity across the enterprise.

- D. It lists the set of specifications to which architectures must conform

**Answer: D**

#### NEW QUESTION # 23

What component of the Architecture Repository is an architectural representation of SBBs supporting the Architecture Landscape?

- A. Solutions Repository
- B. **Solutions Landscape**
- C. Solutions Continuum
- D. Solutions Library

**Answer: B**

Explanation:

The TOGAF Architecture Repository is a key resource for managing architectural artifacts and information.

It's structured to hold different types of architectural assets, and the Solutions Landscape plays a specific role within it.

Here's why option C is correct:

\* **Solutions Landscape Definition:** This component of the repository specifically houses the Solution Building Blocks (SBBs). SBBs are reusable components that represent a specific function or capability.

They can be combined and configured to deliver solutions that meet business needs.

\* **Supporting the Architecture Landscape:** The Architecture Landscape provides a broad view of the organization's architecture at specific points in time. The Solutions Landscape supports this by showing how SBBs are deployed or planned to realize the architectures defined in the Architecture Landscape.

\* **Visual Representation:** The Solutions Landscape offers a visual representation of the relationships between SBBs and how they contribute to the overall architecture. This helps stakeholders understand the implementation of the architecture.

#### NEW QUESTION # 24

.....

With limited time for your preparation, many exam candidates can speed up your pace of making progress. Our OGBA-101 practice materials will remedy your faults of knowledge understanding for our OGBA-101 exam questions contain everything you need in the real OGBA-101 exam. You won't regret your decision of choosing our OGBA-101 training guide. In contrast, they will inspire your potential without obscure content to feel. After getting our OGBA-101 exam prep, you will not live under great stress during the exam period.
