

CDCP Lernressourcen & CDCP Zertifizierungsfragen

Vielleicht mit zahlreichen Übungen fehlt Ihnen noch die Sicherheit für EXIN CDCP Prüfung. Falls Sie nach dem Kauf unserer Prüfungsunterlagen leider nicht EXIN CDCP bestehen, bieten wir Ihnen eine volle Rückerstattung. Aber wir glauben, dass unsere Prüfungssoftware, die unseren Kunden eine Bestehensrate von fast 100% angeboten hat, wird Ihre Erwartungen nicht enttäuschen!

EXIN CDCP Prüfungsplan:

Thema	Einzelheiten
Thema 1	• Electro Magnetic Fields: The topic deals with effects of EMF on human health and equipment (H)EMP, standards, and EMF shielding solutions.
Thema 2	• Power Infrastructure: It focuses ATS and STS systems, redundancy levels and techniques, static and dynamic UPS systems, battery types, thermo-graphics, and renewable energy factor (REF).
Thema 3	• Physical Security and Safety: Sub-topics are about physical security considerations and physical safety considerations.
Thema 4	• Equipment Racks: It discusses power rail • strip options, security considerations, and rack standards, properties and selection criteria.
Thema 5	• Water Supply: This topic is all about water supply techniques and application areas.
Thema 6	• Raised Floor • Suspended Ceiling: The topic discusses applicable standards, signal reference grid, and disability act and regulations.
Thema 7	• Light: This topic covers light fixture types and placement, emergency lighting, and emergency Power Supply (EPS).

CDCP Zertifizierungsfragen, CDCP Probesfragen

Fast2test zusammengestellt EXIN CDCP Fragen und Antworten mit originalen Prüfungsfragen und präzisen Antworten, wie sie in der eigentlichen Prüfung erscheinen. Wir aktualisieren regelmäßig diese qualitativ hochwertigen CDCP Prüfung Certified Data Centre Professional (CDCP). Fast2test ernennt nur die besten und kompetentesten Autoren für unsere Produkte, daher sind die CDCP Prüfungsfragen und Antworten (Certified Data Centre Professional (CDCP)) aus Fast2test sicherlich perfekt.

EXIN Certified Data Centre Professional (CDCP) CDCP Prüfungsfragen mit Lösungen (Q53-Q58):

53. Frage

The expected time to Recover/Repair from a system from a failure is defined as.

- A. MCBF
- B. MTBF
- C. MLBF
- **D. MTTR**

Antwort: D

Begründung:

The expected time to recover or repair from a system from a failure is defined as MTTR (mean time to recovery or mean time to repair). MTTR is the average time it takes to restore a system or product to its normal operation after a failure. MTTR includes the time spent on detecting, diagnosing, and fixing the problem. MTTR is an important metric for measuring the reliability and availability of a system or product, as well as the efficiency and effectiveness of the incident management process. A lower MTTR indicates a faster and more reliable recovery or repair process.

54. Frage

The termination of the ability of a product to perform its required function can be defined as.

- **A. Failure**
- B. Obstacle
- C. Hindrance
- D. Termination

Antwort: A

Begründung:

According to the EPI Data Centre Professional (CDCP®) Preparation Guide, failure is defined as "the termination of the ability of a product to perform its required function" (page 9). Failure can occur due to various reasons, such as wear and tear, design flaws, human errors, environmental factors, or external events.

Failure can affect the availability, reliability, and performance of a product, system, or service.

55. Frage

Which one of the following represents the three elements (oxygen, heat and fuel) to interact in order for the fire to exist?

- **A. The Fire Triangle**
- B. The Fire Technology
- C. The Fire Hexagon
- D. The Fire Class

Antwort: A

Begründung:

The fire triangle is a simple model that illustrates the three elements a fire needs to ignite: heat, fuel, and an oxidizing agent (usually oxygen). A fire naturally occurs when the elements are present and combined in the right mixture. A fire can be prevented or extinguished by removing any one of the elements in the fire triangle.

56. Frage

Which Class of Fires involves energized electrical equipment?

- A. Class K
- B. Class B
- C. Class A
- **D. Class C**

Antwort: D

Begründung:

Class C fires involve energized electrical equipment, such as computers, servers, switches, cables, and wiring.

These fires require the use of non-conductive extinguishing agents, such as carbon dioxide, dry chemical, or clean agent, to prevent electrical shock and damage to the equipment. Water-based extinguishers, such as Class A or K, are not suitable for Class C fires, as water can conduct electricity and cause electrocution or short circuits.

57. Frage

Which one of the following is used in Measuring Business Value?

- A. Reliability
- B. Regeneration Cost
- C. Upfront Cost
- **D. Scalability**

Antwort: D

Begründung:

Measuring business value is the process of assessing the benefits and costs of IT investments and initiatives in relation to the strategic objectives and priorities of the organization. One of the factors that can be used to measure business value is scalability, which is the ability of a system or component to handle increasing workloads or demands without compromising performance, quality, or functionality. Scalability is important for business value because it enables the organization to adapt to changing market conditions, customer expectations, and growth opportunities. Scalability can also reduce operational costs, increase efficiency, and improve customer satisfaction. Therefore, scalability is one of the factors that can be used in measuring business value.
