

CDCP Practice Exams | New CDCP Exam Vce

P.S. Free 2025 EXIN CDCP dumps are available on Google Drive shared by 2Pass4sure: <https://drive.google.com/open?id=1-Y79jZiv3KBtbgHvikLKlIXlrNZ108Wi>

Almost no one likes boring study. Teachers and educationist have tried many ways to solve this problem. Arousing the interest might be the most effective method. So our company is focused on reforming preparation ways of the CDCP exam. Rigid memory is torturous and useless. Our CDCP Study Materials combine the knowledge with the new technology, which could greatly inspire your motivation. And if you click on our CDCP practice questions, you will feel the convenience.

EXIN CDCP Exam Syllabus Topics:

Topic	Details
Topic 1	• Designing a Scalable Network Infrastructure: It covers ANSI • TIA-942 cabling hierarchy, network redundancy, structured Cabling System, and planning considerations.
Topic 2	• Water Supply: This topic is all about water supply techniques and application areas.
Topic 3	• Fire Safety • Protection: This topic gives an understanding of standards for fire suppression, detection systems, total flooding fire suppression techniques, and handheld extinguishers. Additionally, it covers Signage and safety.
Topic 4	• Power Infrastructure: It focuses ATS and STS systems, redundancy levels and techniques, static and dynamic UPS systems, battery types, thermo-graphics, and renewable energy factor (REF).
Topic 5	• Equipment Racks: It discusses power rail • strip options, security considerations, and rack standards, properties and selection criteria.
Topic 6	• Light: This topic covers light fixture types and placement, emergency lighting, and emergency Power Supply (EPS).
Topic 7	• Electro Magnetic Fields: The topic deals with effects of EMF on human health and equipment (H)EMP, standards, and EMF shielding solutions.
Topic 8	• Physical Security and Safety: Sub-topics are about physical security considerations and physical safety considerations.
Topic 9	• Data Centre Location, Building and Construction: It focuses on appropriate sites and components of an effective data centre and supporting facilities setup.

[2025] EXIN CDCP Questions: Fosters Your Exam Passing Abilities

Passing the CDCP exam with least time while achieving aims effortlessly is like a huge dream for some exam candidates. Actually, it is possible with our proper CDCP learning materials. To discern what ways are favorable for you to practice and what is essential for exam syllabus, our experts made great contributions to them. All CDCP Practice Engine is highly interrelated with the exam. You will figure out this is great opportunity for you. Furthermore, our CDCP training quiz is compiled by professional team with positive influence and reasonable price

EXIN Certified Data Centre Professional (CDCP) Sample Questions (Q60-Q65):

NEW QUESTION # 60

What is a potential risk when using floor mounted cool air ducting systems?

- A. The neighboring racks could have a potential cooling impact.
- B. Using floor mounted cool air ducting systems will increase the Computer room relative humidity.
- C. There are no risks when using floor mounted cool air ducting systems.
- D. Using floor mounted cool air ducting systems will increase the Computer room temperature

Answer: A

Explanation:

Floor mounted ducting can cause uneven cooling, potentially leading to overcooling or undercooling of adjacent racks, which affects performance and reliability.

NEW QUESTION # 61

What is a disadvantage of a Dynamic UPS?

- A. It needs a separate back-up generator as their autonomy time is less than 60 seconds.
- B. It needs additional cooling infrastructure as high temperatures reduces the lifetime of a Dynamic UPS.
- C. They are only available for small to medium sized data centres, due to their limited capacity of 200 kVA
- D. They are heavy and more noisy.

Answer: D

NEW QUESTION # 62

Measuring "Business Values" begins first with.

- A. Network
- B. Budget
- C. Physical Infrastructure
- D. Topology

Answer: B

Explanation:

Measuring "Business Values" begins first with budgeting and identifying the costs associated with the project.

This includes understanding the economic impact of the project, such as the cost of labor, materials, and other resources. It is also important to evaluate the return on investment (ROI) of the project, which will help to determine its overall value. Additionally, it is important to consider the long-term impact of the project and its potential to add value to the business in the future.

NEW QUESTION # 63

Which source is used in fiber cable to transmit data?

- A. Electric

- B. Pulse
- **C. Light**
- D. Signals

Answer: C

Explanation:

Fiber-optic cables use light as the source to transmit data. Light pulses are modulated to carry information through an optical fiber. The light is confined in the core of the fiber by total internal reflection at the core-cladding interface. The light travels along the fiber with minimal loss or interference, making it suitable for long-distance and high-bandwidth applications.

NEW QUESTION # 64

What are the four main components of a refrigeration circuit?

- A. Evaporation, membrane filter, monitor sensor, pressure valve
- **B. Evaporator, compressor, condenser, expansion valve**
- C. Condenser, expansion valve, buffer tank, de-icing unit
- D. Thermostat, monitoring interface, indoor unit, outdoor unit

Answer: B

Explanation:

The four main components of a refrigeration circuit are the evaporator, the compressor, the condenser, and the expansion valve, according to the CDCP Preparation Guide¹ and various web sources^{2,3,4}. A refrigeration circuit is a system that transfers heat from a low-temperature region to a high-temperature region, using a working fluid called refrigerant. The refrigeration circuit operates in a closed loop, where the refrigerant changes its state from liquid to vapor and back to liquid, while absorbing and releasing heat. The four main components of the refrigeration circuit perform the following functions:

*The evaporator is a heat exchanger that absorbs heat from the low-temperature region, such as the data centre room, and transfers it to the refrigerant. The refrigerant enters the evaporator as a low-pressure, low-temperature liquid, and leaves the evaporator as a low-pressure, low-temperature vapor.

*The compressor is a mechanical device that increases the pressure and temperature of the refrigerant vapor.

The refrigerant enters the compressor as a low-pressure, low-temperature vapor, and leaves the compressor as a high-pressure, high-temperature vapor.

*The condenser is another heat exchanger that releases heat from the refrigerant to the high-temperature region, such as the outside air or water. The refrigerant enters the condenser as a high-pressure, high-temperature vapor, and leaves the condenser as a high-pressure, low-temperature liquid.

*The expansion valve is a device that reduces the pressure and temperature of the refrigerant liquid. The refrigerant enters the expansion valve as a high-pressure, low-temperature liquid, and leaves the expansion valve as a low-pressure, low-temperature liquid. The expansion valve also controls the flow of the refrigerant into the evaporator, depending on the cooling load.

NEW QUESTION # 65

.....

Our CDCP study materials are willing to stand by your side and provide attentive service, and to meet the majority of customers, we sincerely recommend our study materials to all customers, for our rich experience and excellent service are more than you can imagine. There are a lot of advantages of CDCP training guide for your reference. And there are three versions of different CDCP exam questions for you to choose: the PDF, Soft and APP online. You can free download the demos to decide which one to choose.
