Scaled Agile SAFe-SPC 認定試験の出題範囲：

トピック	出題範囲

トピック 1	• Coaching ART Execution: This section of the exam measures skills of the Agile Coach and covers coaching the train and the teams during execution. It explains the value of continuous improvement and presents the Inspect and Adapt process in a simplified manner. Lesson 11 reinforces how coaching improves team performance and overall ART outcomes.
トピック 2	• Launching an Agile Release Train: This section of the exam measures skills of the Scrum Master and focuses on the activities required to launch an Agile Release Train. It explains the preparation work, the training of teams, and the launch activities that bring the ART to life. Lesson 10 emphasizes readiness and alignment between teams.
トピック 3	• Thriving in the Digital Age and Business Agility: This section of the exam measures skills of the Agile Team Member and covers the foundations of thriving in a digital environment. It introduces how SAFe functions as an operating system for Business Agility and highlights the essential core competencies needed for modern enterprises. Lesson 1 guides learners on how organizations adapt, innovate, and remain competitive in fast changing markets.
トピック 4	• Accelerating to Business Agility: This section of the exam measures skills of the Organizational Development Specialist and presents the key practices that accelerate Business Agility. It explains how to establish organizational agility and create a continuous learning culture. This final section helps learners understand how enterprises sustain improvement and adapt to future challenges.
トピック 5	• Reaching the SAFe Tipping Point: This section of the exam measures skills of the Transformation Champion and addresses the earliest stages of change. It explains how to establish a clear vision for change and how to build a strong guiding coalition. Lesson 8 highlights the importance of commitment and sponsorship at the start of a transformation journey.
トピック 6	• Becoming a Lean Agile Leader: This section of the exam measures skills of the Team Leader and focuses on the mindset required to lead with Lean Agile values. It explains the Lean Agile mindset, reviews SAFe core values, and presents SAFe principles in simple and practical terms. Lesson 2 helps leaders understand how their actions influence team culture and continuous improvement.
トピック 7	• Exploring Lean Portfolio Management: This section of the exam measures skills of the Portfolio Manager and covers the structure of the SAFe portfolio. It explains how to connect the portfolio to enterprise strategy, maintain the portfolio vision, and manage this vision through epics. It also presents Lean budgets and guardrails and introduces the concept of portfolio flow. Lesson 5 shows how strategic alignment supports value delivery.
トピック 8	• Leading the Change: This section of the exam measures skills of the Change Leader and focuses on guiding transformation. It reviews how to lead by example, how to lead organizational change, and how to apply the SAFe implementation roadmap. Lesson 6 provides a simple view of the leadership behaviors needed to support enterprise level change.
トピック 9	• Establishing Team and Technical Agility: This section of the exam measures skills of the Agile Practitioner and introduces the characteristics of cross functional Agile teams. It explains the importance of built in quality and describes how Agile Release Trains are organized around the flow of value. Lesson 3 emphasizes the ability of teams to deliver reliable outcomes through technical discipline.
トピック 10	• Designing the Implementation: This section of the exam measures skills of the Release Train Engineer and covers the steps for designing a SAFe implementation. It introduces the identification of value streams and Agile Release Trains and describes how to create an implementation plan. Lesson 9 shows how structure and planning support a smooth transformation process.
トピック 11	• Building Solutions with Agile Product Delivery: This section of the exam measures skills of the Product Owner and focuses on delivering customer centric value. It explains design thinking, backlog prioritization, and program increment planning in a clear manner. It also covers developing on cadence and releasing on demand, followed by an overview of the continuous delivery pipeline with DevOps. Lesson 4 guides learners on building solutions that align with user needs.

Scaled Agile SAFe Practice Consultant SPC (6.0) 認定 SAFe-SPC 試験問題 (Q40-Q45):

質問 # 40
'Visualize work' aligns with which SAFe Core Value?

- A. Alignment
- B. Respect for People
- C. Relentless Improvement
- D. Transparency

正解：D

解説：
"Visualize work" is specifically called out as a practice that supports the SAFe Core Value of Transparency.
Making work visible allows teams, ARTs, and stakeholders to see progress, manage flow, and surface issues early, all of which build trust and foster a culture of openness.
References:
SAFe 6.0, "Core Values" (Transparency)
SPC 6.0 Guide, "Thriving in the Digital Age and Business Agility"

質問 # 41
What is true about Epic implementation?

- A. Agile Release Trains are empowered to decide whether or not they proceed with a Portfolio Epic.
- B. Once pulled into implementation, the Epic needs to be finished.
- C. A budget reserve is established that can be used to fund Epics.
- D. Re-prioritization happens at every PI boundary, and the rest of the Epic can be postponed or canceled if there are more important new initiatives.

正解：D

質問 # 42
What are the primary responsibilities of Program Portfolio Management (PPM)?

- A. Governance, strategy and investment funding, program management.
- B. Lightweight business case, Epic specification workshop, Budget allocation.
- C. Program management, stakeholder management, PI Planning.
- D. Governance, investment funding, product strategy.

正解：A

解説：
Program Portfolio Management (now commonly referred to as Lean Portfolio Management in SAFe 6.0) is accountable for:
Strategy and Investment Funding: Ensuring the portfolio's investments align with the enterprise's business strategy.
Agile Portfolio Operations (Program Management): Supporting program execution, including coordination and support across value

streams.

Governance: Assuring compliance, monitoring progress, and evaluating outcomes.

SAFe 6.0 documentation emphasizes these three pillars as the core responsibilities of LPM/PPM.

Option D omits program management, while B and C list activities or deliverables but not the full scope of responsibilities.

References:

SAFe 6.0 Website: Lean Portfolio Management

SPC 6.0 Guide: "Strategy and Investment Funding, Agile Portfolio Operations, and Lean Governance are the primary responsibilities of Lean Portfolio Management."

質問 # 43

Velocity is a good measure of team performance.

- A. True
- B. False

正解：B

解説：

Velocity is a measure of how much work a team completes in an iteration, but it is not a measure of performance. Velocity helps teams plan and forecast, but it should not be used to compare teams or assess individual performance. Using velocity as a performance metric can lead to gaming and diminished quality.

"Velocity is a planning tool, not a performance metric. Comparing velocities between teams or using velocity to assess team performance is discouraged." (Source: SAFe 6.0 Framework: Team Metrics; SPC 6.0 Guide, "Establishing Team and Technical Agility")

質問 # 44

What is Cost of Delay?

- A. Cost incurred when system integration appears too late in the PI.
- B. Cost of not addressing risk early on.
- C. Opportunity cost and deferred revenue.
- D. Penalty for nonperformance.

正解：A

質問 # 45
