NEW QUESTION # 58

Why would you use level 3 Business Driven Configuration Questionnaires (BDCQs)?

- A. To validate customer scopes and requirements against SAP S/4HANA Cloud Public Edition best practices
- B. They build a consolidated backlog during the Realize phase
- C. To validate customer scopes during Fit-To-Standard workshops and provide the required configuration values for the Realize phase.

Answer: C

Explanation:

Level 3 Business Driven Configuration Questionnaires (BDCQs) are detailed tools used in the SAP Activate methodology to collect configuration data and validate the solution fit for SAP S/4HANA Cloud Public Edition.

* Option A: They build a consolidated backlog during the Realize phaseIncorrect. BDCQs are used in the Explore phase to gather configuration data, not to build a backlog in the Realize phase. TheSAP S

/4HANA Cloud Implementation Guidestates, "BDCQs are utilized in the Explore phase to collect configuration values, while

backlogs are managed separately in SAP Cloud ALM during the Realize phase."

* Option B: To validate customer scopes during Fit-to-Standard workshops and provide the required configuration values for the Realize phase. Correct. Level 3 BDCQs are used during Fit-to-Standard workshops to validate scope and collect detailed configuration values for the Realize phase.

The SAP Activate Methodology Guide explains, "Level 3 BDCQs are employed during Fit-to-Standard workshops to validate customer scopes and gather detailed configuration values, which are then used to configure the solution in the Realize phase."

* Option C: To validate customer scopes and requirements against SAP S/4HANA Cloud Public Edition best practices. Incorrect. While BDCQs validate scopes, their primary role is to collect configuration data, not to validate requirements against best practices, which is done during Fit-to-Standard workshops. The SAP S/4HANA Cloud Study Guide clarifies, "BDCQs focus on configuration data collection, while best practice validation occurs through process demonstrations in Fit-to-Standard workshops." Extract from Official Documentation:

Their role in validating scope ensures alignment with customer needs while maintaining cloud compliance.

* Option A: Assign business catalogs to a business role. Correct. Business catalogs group applications and are assigned to business roles to grant access. The SAP S/4HANA Cloud Security Guide states, "In the Maintain Business Roles app, administrators can assign business catalogs to roles to define the scope of applications available to users."

- A. During the Deployment phase
- B. After the Realize phase
- C. After each upgrade
- **D. During the Discover phase**

Answer: D

Explanation:

The Digital Discovery Assessment (DDA) is a strategic tool used early in the SAP S/4HANA Cloud Public Edition implementation to align customer requirements with SAP capabilities and plan the project effectively.

* Option A: After each upgradeIncorrect. DDAs are not used post-upgrade, as they focus on initial project planning. TheSAP S/4HANA Cloud Implementation Guidestates, "The Digital Discovery Assessment is a pre-implementation tool, not used for post-upgrade evaluations, which rely on testing and monitoring."

* Option B: After the Realize phaseIncorrect. The Realize phase focuses on configuration and testing, not discovery. TheSAP Activate Methodology Guidenotes, "The DDA is conducted before the implementation begins, not after the Realize phase, which is for solution build and validation."

* Option C: During the Discover phaseCorrect. The DDA is run during the Discover phase to assess requirements and define the project scope. TheSAP S/4HANA Cloud Implementation Guideexplains,

"The DigitalDiscovery Assessment is conducted during the Discover phase to capture customer requirements, integration needs, and project timelines, forming the foundation for the implementation."

* Option D: During the Deployment phaseIncorrect. The Deploy phase focuses on go-live and cutover, not discovery activities. TheSAP S/4HANA Cloud Study Guideclarifies, "The Deploy phase is for system activation, not for running assessments like the DDA, which occurs pre-project." Extract from Official Documentation:

* SAP S/4HANA Cloud Implementation Guide(SAP Help Portal,<https://help.sap.com>): "The Digital Discovery Assessment is a critical activity in the Discover phase, used to gather requirements, assess solution fit, and plan the SAP S/4HANA Cloud Public Edition implementation."
