## Vce Palo Alto Networks PSE-Cortex-Pro-24 File & Sample PSE-Cortex-Pro-24 Questions

This is a crucial part of your study to know your mistakes and overcome them before the Palo Alto Networks PSE-Cortex-Pro-24 final test. Customizable test sessions allow you to modify the setting of the PSE-Cortex-Pro-24 mock test according to your training needs. Both Palo Alto Networks PSE-Cortex-Pro-24 Practice Tests desktop and web-based create a scenario that gives an exact feeling of the Palo Alto Networks PSE-Cortex-Pro-24 real test.

## Palo Alto Networks Systems Engineer Professional - Cortex Sample Questions (Q124-Q129):

### NEW QUESTION # 124

Which two types of indicators of compromise (IOCs) are available for creation in Cortex XDR? (Choose two.)

- A. hostname
- B. hash
- C. file path
- D. registry

**Answer: B,C**

### NEW QUESTION # 125

Which feature in Cortex XSIAM extends analytics detections to all mapped network and authentication data?

- A. Automation daybooks
- B. Threat feed integration
- C. Parsing rules
- D. **Data models**

**Answer: D**

Explanation:

Data models in Cortex XSIAM extend analytics detections to all mapped network and authentication data.

These models help structure and normalize data, enabling more effective and comprehensive analysis across various data sources, improving the detection and response capabilities within the platform.

### NEW QUESTION # 126

When preparing for a Cortex XSOAR proof of value (POV), which task should be performed before the evaluation is requested?

- A. **Gathering a list of the different integrations that will need to be configured**
- B. Ensuring that the customer has single sign-on (SSO) configured in their environment
- C. Planning for every different use case the customer has for the solution
- D. Building out an executive-level proposal detailing the product capabilities

**Answer: A**

Explanation:

Before requesting a Cortex XSOAR proof of value (POV) evaluation, it's important to gather a list of the different integrations that will need to be configured. This ensures that the POV can be tailored to the customer's environment and use cases, and allows the evaluation to be based on real-world data and workflows.

### NEW QUESTION # 127

Within Cortex XSIAM, how does the integration of Attack Surface Management (ASM) provide a unified approach to security event management that traditional SIEMs typically lack?

- A. **By enriching incidents with ASM data for all internet-facing assets**
- B. By providing a queryable dataset of ASM data for threat hunting
- C. By offering dashboards on ASM data within the management console
- D. By manually correlating of ASM data with security events

**Answer: A**

Explanation:

The integration of Attack Surface Management (ASM) in Cortex XSIAM enriches incidents with ASM data for all internet-facing assets, providing a unified approach to security event management. This integration helps identify and address vulnerabilities related to external assets, offering more context and enhancing the overall security incident response. Traditional SIEMs typically lack this level of integration with external asset visibility.

### NEW QUESTION # 128

Why is it important to document notes from the Proof of Value (POV) for post-sales hand off?

- A. To certify that the POV was completed and meets all customer requirements
- B. To allow implementation teams to bypass scooping exercises and shorten delivery time
- C. **To ensure the implementation teams understand the customer use cases and priorities**
- D. To generate additional training material for the POV's production implementation

**Answer: C**

Explanation:

Documenting notes from the Proof of Value (POV) is crucial for the post-sales handoff because it helps ensure that implementation teams understand the customer use cases and priorities. This documentation provides context for the customer's specific needs, enabling a smoother and more tailored implementation process.

## NEW QUESTION # 129

.....

The study material is available in three easy-to-access formats. The first one is PDF format which is printable and portable. You can access it anywhere with your smart devices like smartphones, tablets, and laptops. In addition, you can even print PDF questions in order to study anywhere and pass Palo Alto Networks Systems Engineer Professional - Cortex (PSE-Cortex-Pro-24) certification exam.
