It is a generally accepted fact that the DEP-2025 exam has attracted more and more attention and become widely acceptable in the past years.

## Apple Deployment and Management Exam Sample Questions (Q239-Q244):

NEW QUESTION # 239

What feature can you use to protect a lost or stolen iPad device?

- A. FileVault Lock
- **B. Managed Lost Mode**
- C. Managed Find My
- D. Recovery Lock

**Answer: B**

Explanation:

For iPads under organizational control, the correct feature to protect a lost or stolen device is Managed Lost Mode. Apple Learning specifies that when Managed Lost Mode is activated via MDM, the iPad is immediately locked and displays a custom message defined by IT, such as contact details for return.

Importantly, Lost Mode does not require the user to have enabled Find My; MDM can enable location tracking temporarily to assist recovery. FileVault is a macOS-only disk encryption feature, not available on iPad. Recovery Lock is designed for Apple silicon Macs to protect Recovery mode, not iPad. "Managed Find My" is not an Apple feature. Thus, the documented method for iPad protection under enterprise control is Managed Lost Mode.

References: Apple Platform Deployment - "Lost Mode for supervised iPhone and iPad."

#### NEW QUESTION # 240

Your organization bought new iPhone devices from Apple. You have Automated Device Enrollment configured, but the iPhone devices aren't asked to enroll. What might be the cause?

- A. The iPhone devices are waiting for approval in Apple Business Manager before they can enroll in MDM.
- B. Someone in your organization must manually reset the iPhone devices before they can enroll in MDM.
- **C. The iPhone devices don't have a default MDM server assignment.**
- D. Someone in your organization added the iPhone devices to the wrong location in Apple Business Manager.

**Answer: C**

Explanation:

ADE requires devices to be assigned to an MDM server in ABM. The Apple Business Manager User Guide states, "For devices to automatically enroll via ADE, they must be assigned to an MDM server in Apple Business Manager. Without this assignment, the enrollment process will not initiate during setup." Options A, B, and D don't apply as devices from Apple are auto-added, don't need resets, and location issues don't block enrollment without assignment.

Reference:

Apple Business Manager User Guide, "Assign Devices to MDM" section.

Apple Platform Deployment Guide, "Automated Device Enrollment" section.

#### NEW QUESTION # 241

What does Apple Business Manager use to identify devices purchased from Apple or an authorized reseller?

- **A. Serial number**
- B. UDID
- C. UUID
- D. Order number

**Answer: A**

Explanation:

Apple Business Manager (ABM) uses a device's serial number to identify devices purchased from Apple or an authorized reseller for enrollment in Automated Device Enrollment (ADE). Serial numbers are unique to each device and linked to purchase records, allowing ABM to verify eligibility. Order numbers (option A) track purchases but aren't device-specific identifiers in ABM. UDID (option C) and UUID (option D) are unique identifiers for devices or instances, but they're not used for purchase verification in ABM. The Apple Platform Deployment Guide confirms serial numbers as the key identifier in ABM.

#### NEW QUESTION # 242

Which feature can you use with Shared iPad?

- A. Sidecar
- B. Universal Control
- C. Continuity Camera
- **D. AirDrop**

**Answer: D**

Explanation:

AirDrop works with Shared iPad. The iOS Deployment Reference states, "Shared iPad supports features like AirDrop that don't require a single user's Apple ID, unlike Continuity features such as Universal Control or Sidecar." Reference: iOS Deployment Reference, "Shared iPad Features" section. Apple Platform Deployment Guide, "Shared iPad" section.

### NEW QUESTION # 243

What provides a consistent set of management tools for Apple devices to all MDM vendors?

- A. Automated Device Enrollment
- B. Apple Push Notification service
- **C. Apple's MDM framework**
- D. Managed service configuration files

**Answer: C**

Explanation:

Apple's MDM framework standardizes tools. The Mobile Device Management Protocol Reference states, "Apple's MDM framework provides a consistent set of APIs and management tools that all MDM vendors use to manage Apple devices." Option D supports communication, not tools.

Reference:

Mobile Device Management Protocol Reference, "Overview" section.

Apple Platform Deployment Guide, "MDM Framework" section.

### NEW QUESTION # 244

.....

Our DEP-2025 study materials do our best to find all the valuable reference books, then, the product we hired experts will carefully analyzing and summarizing the related materials, such as: DEP-2025 DEP-2025 exam, eventually form a complete set of the review system. Experts before starting the compilation of "the DEP-2025 study materials", has put all the contents of the knowledge point build a clear framework in mind, though it needs a long wait, but product experts and not give up, but always adhere to the effort, in the end, they finished all the compilation. So, you're lucky enough to meet our DEP-2025 Study Materials I, and it's all the work of the experts.
