## SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q12-Q17):

### NEW QUESTION # 12

Which of the following actions does the lead configuration expert carry out during the content deployment phase in the SAP S/4HANA Cloud starter system? Note: There are 3 correct answers to this question.

- A. Create two projects
- B. Confirm primary logistics settings
- C. Confirm primary finance settings
- D. Define the scope
- E. Confirm primary HCM settings

**Answer: A,B,D**

Explanation:

For implementing SAP S/4HANA Cloud Public Edition for a customer, the following systems are commonly used:

\* Sandbox system: This system is used in the very early stages of the project for exploration and trying out different configurations without affecting the development or production environments. It's a safe space for experimentation.

\* Development system: This system is where the initial setup and customizations are made. Configuration changes, custom development, and extensions are carried out here before being moved to the test system for further testing.

\* Test system: After configurations and developments are done in the development system, they are transported to the test system. This environment is used for rigorous testing to ensure that everything works as expected and to identify any issues before moving to the production environment.

These systems play crucial roles in the implementation process, allowing for a structured and phased approach to setting up, customizing, testing, and finally deploying SAP S/4HANA Cloud Public Edition.

### NEW QUESTION # 13

What are some characteristics of public cloud? Note: There are 2 correct answers to this question.

- A. Software installation on customer site
- B. Perpetual license
- C. Multi-tenant server
- D. Lower total cost of ownership

**Answer: C,D**

Explanation:

A public cloud is a type of cloud computing in which a third-party service provider makes computing resources available to users over the public Internet. Some characteristics of public cloud are:

\* Multi-tenant server: Public cloud uses shared infrastructure, where multiple users or organizations can access the same resources, such as compute, storage, or applications. The data and applications of each user are isolated and secured from others. This allows for efficient utilization of resources and scalability.

\* Lower total cost of ownership: Public cloud reduces the upfront and operational costs of IT, as users do not need to purchase, install, or maintain hardware or software. Users only pay for the resources they use, and can benefit from the economies of scale and continuous innovation of the cloud service provider.
