

# New Release AIGP PDF Dumps [2026] - AIGP IAPP Certified Artificial Intelligence Governance Professional Exam Questions

BTW, DOWNLOAD part of ExamPrepAway AIGP dumps from Cloud Storage: [https://drive.google.com/open?id=1jpLyDmOuNxAc\\_zwAU2Uh8DU1VigmZhr5](https://drive.google.com/open?id=1jpLyDmOuNxAc_zwAU2Uh8DU1VigmZhr5)

In this high-speed world, a waste of time is equal to a waste of money. As an electronic product, our AIGP real study dumps have the distinct advantage of fast delivery. Once our customers pay successfully, we will check about your email address and other information to avoid any error, and send you the AIGP prep guide in 5-10 minutes, so you can get our AIGP Exam Questions at first time. And then you can start your study after downloading the AIGP exam questions in the email attachments. High efficiency service has won reputation for us among multitude of customers, so choosing our AIGP real study dumps we guarantee that you won't be regret of your decision.

To some extent, to pass the AIGP exam means that you can get a good job. The AIGP exam materials you master will be applied to your job. The possibility to enter in big and famous companies is also raised because they need outstanding talents to serve for them. Our AIGP Test Prep is compiled elaborately and will help the client a lot. To get a better and full understanding of our AIGP quiz torrent, please read the introduction of the features and the advantages of our product as follow.

## AIGP Braindumps Downloads Exam Instant Download | Updated AIGP Reliable Exam Questions

If you are very busy, you can only take two or three hours a day to study our AIGP study engine. Then I tell you this is enough! After ten days you can go to the exam. With such an efficient product, you really can't find the second one! In any case, many people have passed the exam after using AIGP Training Materials. This is a fact that you must see. As long as you are still a sensible person, you will definitely choose AIGP practice quiz. Don't hesitate! Time does not wait!

### IAPP AIGP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Understanding How to Govern AI Deployment and Use: This section of the exam measures skills of technology deployment leads and covers the responsibilities associated with selecting, deploying, and using AI models in a responsible manner. It includes evaluating key factors and risks before deployment, understanding different model types and deployment options, and ensuring ongoing monitoring and maintenance. The domain applies to both proprietary and third-party AI models, emphasizing the importance of transparency, ethical considerations, and continuous oversight throughout the model's operational life.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>• <b>Understanding the Foundations of AI Governance:</b> This section of the exam measures skills of AI governance professionals and covers the core concepts of AI governance, including what AI is, why governance is needed, and the risks and unique characteristics associated with AI. It also addresses the establishment and communication of organizational expectations for AI governance, such as defining roles, fostering cross-functional collaboration, and delivering training on AI strategies. Additionally, it focuses on developing policies and procedures that ensure oversight and accountability throughout the AI lifecycle, including managing third-party risks and updating privacy and security practices.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Understanding How Laws, Standards, and Frameworks Apply to AI:</b> This section of the exam measures skills of compliance officers and covers the application of existing and emerging legal requirements to AI systems. It explores how data privacy laws, intellectual property, non-discrimination, consumer protection, and product liability laws impact AI. The domain also examines the main elements of the EU AI Act, such as risk classification and requirements for different AI risk levels, as well as enforcement mechanisms. Furthermore, it addresses the key industry standards and frameworks, including OECD principles, NIST AI Risk Management Framework, and ISO AI standards, guiding organizations in trustworthy and compliant AI implementation.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Understanding How to Govern AI Development:</b> This section of the exam measures the skills of AI project managers and covers the governance responsibilities involved in designing, building, training, testing, and maintaining AI models. It emphasizes defining the business context, performing impact assessments, applying relevant laws and best practices, and managing risks during model development. The domain also includes establishing data governance for training and testing, ensuring data quality and provenance, and documenting processes for compliance. Additionally, it focuses on preparing models for release, continuous monitoring, maintenance, incident management, and transparent disclosures to stakeholders.</li> </ul>

## IAPP Certified Artificial Intelligence Governance Professional Sample Questions (Q124-Q129):

### NEW QUESTION # 124

Scenario:

A company using AI for resume screening understands the risks of algorithmic bias and the evolving legal requirements across jurisdictions. It wants to implement the right governance controls to prevent reputational damage from misuse of the AI hiring tool. Which of the following measures should the company adopt to best mitigate its risk of reputational harm from using the AI tool?

- **A. Test the AI tool pre- and post-deployment**
- B. Ensure the vendor provides indemnification for the AI tool
- C. Continue to require the company's hiring personnel to manually screen all applicants
- D. Require the procurement and deployment teams to agree upon the AI tool

**Answer: A**

Explanation:

The correct answer is A. Pre- and post-deployment testing ensures bias, accuracy, and fairness are evaluated and corrected as needed, which is essential for reputational risk mitigation.

From the AIGP Body of Knowledge:

"Testing AI systems before and after deployment is critical to ensure performance, fairness, and compliance.

Failing to do so may result in reputational damage and legal exposure." AI Governance in Practice Report 2025 (Bias/Fairness and Risk Sections):

"System impact assessments, testing, and post-deployment monitoring are necessary to identify and mitigate risks... This supports both compliance and public trust." Testing is proactive, unlike indemnification (which transfers risk after damage), or requiring manual review (which defeats automation).

### NEW QUESTION # 125

CASE STUDY

Please use the following to answer the next question:

A local police department in the United States procured an AI system to monitor and analyze social media feeds, online marketplaces and other sources of public information to detect evidence of illegal activities (e.g., sale of drugs or stolen goods). The

AI system works by surveying the public sites in order to identify individuals that are likely to have committed a crime. It cross-references the individuals against data maintained by law enforcement and then assigns a percentage score of the likelihood of criminal activity based on certain factors like previous criminal history, location, time, race and gender.

The police department retained a third-party consultant to assist in the procurement process, specifically to evaluate two finalists. Each of the vendors provided information about their system's accuracy rates, the diversity of their training data and how their system works. The consultant determined that the first vendor's system has a higher accuracy rate and based on this information, recommended this vendor to the police department.

The police department chose the first vendor and implemented its AI system. As part of the implementation, the department and consultant created a usage policy for the system, which includes training police officers on how the system works and how to incorporate it into their investigation process.

The police department has now been using the AI system for a year. An internal review has found that every time the system scored a likelihood of criminal activity at or above 90%, the police investigation subsequently confirmed that the individual had, in fact, committed a crime. Based on these results, the police department wants to forego investigations for cases where the AI system gives a score of at least 90% and proceed directly with an arrest.

Which AI risk would NOT have been identified during the procurement process based on the categories of information requested by the third-party consultant?

- A. Discrimination.
- B. Accuracy.
- C. Security.
- D. Explainability.

**Answer: C**

Explanation:

The consultant evaluated accuracy, training data diversity (related to discrimination), and system workings (explainability), but security risks were not assessed during procurement.

## NEW QUESTION # 126

### CASE STUDY

Please use the following answer the next question:

Good Values Corporation (GVC) is a U.S. educational services provider that employs teachers to create and deliver enrichment courses for high school students. GVC has learned that many of its teacher employees are using generative AI to create the enrichment courses, and that many of the students are using generative AI to complete their assignments.

In particular, GVC has learned that the teachers they employ used open source large language models ("LLM") to develop an online tool that customizes study questions for individual students. GVC has also discovered that an art teacher has expressly incorporated the use of generative AI into the curriculum to enable students to use prompts to create digital art.

GVC has started to investigate these practices and develop a process to monitor any use of generative AI, including by teachers and students, going forward.

What is the best reason for GVC to offer students the choice to utilize generative AI in limited, defined circumstances?

- A. To enable students to learn about practical applications of AI.
- B. To enable students to learn how to use AI as a supportive educational tool.
- C. To enable students to learn about performing research.
- D. To enable students to learn how to manage their time.

**Answer: B**

Explanation:

The best reason for GVC to offer students the choice to utilize generative AI in limited, defined circumstances is to enable students to learn how to use AI as a supportive educational tool. By integrating AI in a controlled manner, students can learn the practical applications of AI and develop skills to use AI responsibly and effectively in their educational pursuits.

Reference: The AIGP Body of Knowledge highlights the importance of teaching students about AI's practical applications and the responsible use of AI technologies. This aligns with the goal of fostering a better understanding of AI's role and its potential benefits in various contexts, including education.

## NEW QUESTION # 127

The best practice to manage third-party risk associated with AI systems is to create and implement policies that?

- A. Require third-party AI systems to undergo a comprehensive audit by an external cybersecurity firm every six months.
- B. Focus on the financial stability of third-party vendors as the primary criterion for risk assessment.
- C. Focus on the technical aspects of AI systems, such as data security, while ethical risks are addressed through suitable contracts.
- **D. Provide for an appropriate level of due diligence and ongoing monitoring based on the defined risk.**

**Answer: D**

Explanation:

Third-party risk management for AI systems should be proportional and risk-based, involving initial due diligence and ongoing monitoring that reflects the level of risk posed by the third party's AI system.

From the AI Governance in Practice Report 2024:

"Third-party due diligence assessments to identify possible external risk and inform selection." (p. 11)

"Legal due diligence may include verification of the personal data's lawful collection by the data broker, review of contractual obligations..." (p. 19)

\* A focuses too narrowly on financial stability.

\* C is excessive and not scalable or aligned with best practices.

\* D inappropriately separates ethical and technical risks; both must be evaluated holistically.

## NEW QUESTION # 128

### CASE STUDY

Please use the following answer the next question:

A local police department in the United States procured an AI system to monitor and analyze social media feeds, online marketplaces and other sources of public information to detect evidence of illegal activities (e.g., sale of drugs or stolen goods). The AI system works by surveilling the public sites in order to identify individuals that are likely to have committed a crime. It cross-references the individuals against data maintained by law enforcement and then assigns a percentage score of the likelihood of criminal activity based on certain factors like previous criminal history, location, time, race and gender.

The police department retained a third-party consultant assist in the procurement process, specifically to evaluate two finalists. Each of the vendors provided information about their system's accuracy rates, the diversity of their training data and how their system works. The consultant determined that the first vendor's system has a higher accuracy rate and based on this information, recommended this vendor to the police department.

The police department chose the first vendor and implemented its AI system. As part of the implementation, the department and consultant created a usage policy for the system, which includes training police officers on how the system works and how to incorporate it into their investigation process.

The police department has now been using the AI system for a year. An internal review has found that every time the system scored a likelihood of criminal activity at or above 90%, the police investigation subsequently confirmed that the individual had, in fact, committed a crime. Based on these results, the police department wants to forego investigations for cases where the AI system gives a score of at least 90% and proceed directly with an arrest.

When notifying an accused perpetrator, what additional information should a police officer provide about the use of the AI system?

- A. Information about the accuracy of the AI system.
- **B. Information about how the individual was identified by the AI system.**
- C. Information about the composition of the training data of the system.
- D. Information about how the accused can oppose the charges.

**Answer: B**

Explanation:

When notifying an accused perpetrator, the police officer should provide information about how the individual was identified by the AI system. This transparency is crucial for maintaining trust and ensuring that the accused understands the basis of the charges against them. Information about the accuracy, how to oppose the charges, and the composition of the training data, while potentially relevant, do not directly address the immediate need for the accused to understand the specific process that led to their identification.

AIGP Body of Knowledge on AI Transparency and Explainability.

## NEW QUESTION # 129

.....

A good deal of researches has been made to figure out how to help different kinds of candidates to get AIGP certification. We

revise and update the AIGP test torrent according to the changes of the syllabus and the latest developments in theory and practice. We base the AIGP Certification Training on the test of recent years and the industry trends through rigorous analysis. Therefore, for your convenience, more choices are provided for you, we are pleased to suggest you to choose our AIGP exam question for your exam.
