

# Pass Guaranteed JN0-253 - Newest Mist AI, Associate (JNCIA-MistAI) Test Result

BONUS!!! Download part of Exams-boost JN0-253 dumps for free: [https://drive.google.com/open?id=1Vq6lh8HkzGMz8RNIEg8p\\_rrcKRSK5Fxr](https://drive.google.com/open?id=1Vq6lh8HkzGMz8RNIEg8p_rrcKRSK5Fxr)

Our JN0-253 training materials have won great success in the market. Tens of thousands of the candidates are learning on our JN0-253 practice engine. First of all, our JN0-253 study dumps cover all related tests about computers. It will be easy for you to find your prepared learning material. If you are suspicious of our JN0-253 Exam Questions, you can download the free demo from our official websites.

## Juniper JN0-253 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Juniper Mist Monitoring and Analytics: This domain focuses on monitoring tools including service-level expectations, packet captures, AI-driven insights, automated alerts, and audit logs for comprehensive network visibility.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Juniper Mist Cloud Fundamentals: This domain covers Juniper's cloud-native platform architecture, focusing on AI and machine learning capabilities for intelligent network management and real-world deployment scenarios.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Marvis Virtual Network Assistant AI: This domain introduces Marvis, an AI-powered assistant providing automated troubleshooting through intelligent actions, natural language queries, and specialized analytical tools for proactive issue resolution.</li></ul>

## New JN0-253 Exam Answers & JN0-253 Questions Pdf

Our website has focused on the study of JN0-253 vce braindumps for many years and created latest JN0-253 dumps pdf for all level of candidates. All questions and answers are tested and approved by our IT professionals who are specialized in the JN0-253 Pass Guide. You can completely trust the accuracy of our JN0-253 exam questions because we will full refund if you failed exam with our training materials.

## Juniper Mist AI, Associate (JNCIA-MistAI) Sample Questions (Q37-Q42):

### NEW QUESTION # 37

How does Marvis detect a bad cable problem?

- A. Marvis randomly performs packet captures on various APs to find bad cables in your network.
- B. Marvis randomly performs cable tests on every cable in your network.
- C. Marvis constantly sends ping packets to remote end hosts to determine whether there is a failure in the path.

- **D. Marvis analyzes metrics, such as interface errors, that match a bad cable pattern.**

**Answer: D**

Explanation:

Marvis, the AI-driven Virtual Network Assistant in Juniper Mist, uses continuous telemetry analysis and AI correlation to identify bad cable conditions. It does this by examining interface-level statistics gathered from switches and access points through Wired Assurance.

According to the Juniper Mist Marvis Operations and Troubleshooting Guide:

"Marvis detects bad cable issues by analyzing telemetry patterns such as CRC errors, FCS errors, packet drops, and link flaps that collectively match a known cable fault signature." When such patterns are detected, Marvis automatically generates an AI Action indicating a Bad Cable issue and identifies whether the problem is with the port or the cable. This proactive detection allows administrators to replace faulty hardware before it impacts network users.

Options A, B, and C are incorrect because Marvis does not perform active pinging, random packet captures, or random cable testing. Its detection is entirely AI and telemetry-based.

Therefore, the correct answer is **D. Marvis analyzes metrics, such as interface errors, that match a bad cable pattern.**

### NEW QUESTION # 38

Using the Mist UI, where do you look for high priority end-user issues on the network?

- **A. Marvis Actions**
- B. Premium Analytics
- C. Occupancy Analytics
- D. Network Analytics

**Answer: A**

### NEW QUESTION # 39

How does Mist determine the location of clients in an indoor setting?

- A. triangulation
- B. trilateration
- **C. probability surface**
- D. GPS

**Answer: C**

Explanation:

Mist builds location from "Probability Surfaces" not triangulation. The more directional RSSI beam information your client hears, the more data for the location engine to work with creating the probability surfaces, which provides the best possible location accuracy with sub second latency.

### NEW QUESTION # 40

Which two subscriptions are required to use Marvis Minis? (Choose two.)

- A. Premium Analytics
- **B. Marvis for Wireless**
- **C. WiFi Management and Assurance**
- D. vBLE Engagement

**Answer: B,C**

Explanation:

To use Marvis Minis, both the WiFi Management and Assurance and Marvis for Wireless subscriptions are required. According to the official Juniper documentation, Marvis Minis "does not require a separate subscription. Any organization with an active Marvis for Wireless subscription is automatically entitled for Marvis Minis support." However, the Marvis for Wireless subscription operates on

top of the foundational WiFi Management and Assurance subscription, which is necessary to operate APs and the wireless network within the Mist Cloud. As stated: "In addition to your base Assurance subscriptions (Wireless Assurance, WAN Assurance, or Wired Assurance), you also need Marvis subscriptions for each device..." Therefore, both are prerequisites for using Marvis Minis, ensuring full wireless management with AI-powered digital twin validation.

#### NEW QUESTION # 41

Your existing environment has Cisco wireless access points (APs) that use preshared keys to authenticate wireless users. You are asked to enable Juniper Mist Access Assurance for 802.1X (RADIUS) user authentication on these Cisco APs. How would you accomplish this task?

- A. Use only third-party access points with Juniper Mist Access Assurance.
- B. Configure a new 802.1X SSID on the Cisco AP and configure a RADSEC tunnel from the AP to Juniper Mist Access Assurance. Add an authentication rule to permit user access in Access Assurance.
- **C. Configure a new 802.1X SSID on the Cisco AP that references your Juniper Mist Edge as the RADIUS server. Add an authentication rule to permit user access in Access Assurance.**
- D. Configure a new 802.1X SSID on the Cisco AP that references Juniper Mist Access Assurance as the RADIUS server. Add an authentication rule to permit user access in Access Assurance.

**Answer: C**

Explanation:

To enable Juniper Mist Access Assurance for 802.1X (RADIUS) authentication with Cisco APs, the correct approach is to configure a new 802.1X SSID on the Cisco AP referencing your Juniper Mist Edge as the RADIUS server (option C). According to Juniper Mist's official documentation and architecture guides: "Mist Access Assurance supports end-client authentication on third-party infrastructure by leveraging the Mist Auth Proxy application running on a Mist Edge platform. Third-party devices, such as Cisco APs, are added as RADIUS clients at Mist Edge. The Mist Edge proxy handles all RADIUS authentication traffic from the APs, wraps these authentication requests into a secure RadSec tunnel, and relays them to the Mist Access Assurance cloud for validation against configured authentication rules." This deployment does not require direct RADSEC tunneling from Cisco APs to Mist Access Assurance (since Cisco APs are not natively RADSEC capable) but uses Mist Edge as an intermediary RADIUS server and authentication proxy. "Add an authentication rule in Access Assurance to permit user access," enabling centralized management and policy enforcement in the Mist Cloud.

#### NEW QUESTION # 42

.....

The JN0-253 exam prepare of our website is completed by experts who has a good understanding of real exams and have many years of experience writing JN0-253 study materials. They know very well what candidates really need most when they prepare for the exam. They also understand the real exam situation very well. So they compiled JN0-253 Exam prepare that they hope to do their utmost to help candidates pass the exam and get what job they want. They apply to exam candidates of different level of computer industry. So whichever degree you are at, you can utilize our JN0-253 study materials tool with following traits.
