Those who obtain the certification are regarded as experts in the field and are highly sought after by employers who require their services.

ISACA Certified Data Privacy Solutions Engineer Sample Questions (Q66-Q71):

NEW QUESTION # 66

An online business posts its customer data protection notice that includes a statement indicating information is collected on how products are used, the content viewed, and the time and duration of online activities. Which data protection principle is applied?

- A. System use requirements
- B. Lawfulness and fairness
- **C. Data integrity and confidentiality**
- D. Data use limitation

Answer: C

NEW QUESTION # 67

An organization wishes to deploy strong encryption to its most critical and sensitive databases. Which of the following is the BEST way to safeguard the encryption keys?

- A. Ensure the keys are stored in a remote server.
- **B. Ensure the keys are stored in a cryptographic vault.**
- C. Ensure key management responsibility is assigned to the privacy officer.
- D. Ensure all access to the keys is under dual control.

Answer: B

Explanation:

The best way to safeguard the encryption keys is to ensure that they are stored in a cryptographic vault. A cryptographic vault is a secure hardware or software module that provides cryptographic services and protects the keys from unauthorized access, modification, or disclosure. A cryptographic vault can also provide other functions, such as key generation, key backup, key rotation, key destruction, and key auditing. A cryptographic vault can enhance the security and privacy of the encrypted data by preventing key compromise, leakage, or misuse. A cryptographic vault can also comply with the security standards and best practices for key management, such as the ISO/IEC 27002, NIST SP 800-57, or PCI DSS. Reference:

NEW QUESTION # 68

Which of the following poses the GREATEST privacy risk for client-side application processing?

- A. An employee loading personal information on a company laptop
- B. Failure of a firewall protecting the company network
- C. A distributed denial of service attack (DDoS) on the company network
- **D. A remote employee placing communication software on a company server**

Answer: D

NEW QUESTION # 69

Which of the following BEST ensures an effective data privacy policy is implemented?

- A. Incorporating data privacy regulations from all jurisdictions
- B. Developing a clear privacy statement with documented objectives
- **C. Aligning regulatory requirements with business needs**
- D. Providing a comprehensive review of the policy for all business units

Answer: C

Explanation:

Explanation

The best way to ensure an effective data privacy policy is implemented is to align regulatory requirements with business needs, because this will help achieve compliance while also supporting the organization's objectives, values, and strategies. A data privacy policy should reflect the legal obligations and expectations of the organization, as well as the needs and preferences of its
