With so accurate information of our NCP-US learning questions, we can confirm your success by your first attempt.

Nutanix Certified Professional - Unified Storage v6.5 Sample Questions (Q46-Q51):

NEW QUESTION # 46

An administrator is planning to upgrade all ESXi hypervisors in a cluster hosting Files. When performing one-click hypervisor upgrades, what prerequisite must be performed?

- A. Disable the anti-affinity rules on all FSVMs.
- B. Enable the anti-affinity rules on all FSVMs.
- C. Shutdown the FSVMs.
- D. Manually migrate the FSVMs.

Answer: A

NEW QUESTION # 47

An administrator successfully installed Objects and was able to create a bucket. When using the reference URL to access this Objects store, the administrator is unable to write data in the bucket when using an Active Directory account. Which action should the administrator take to resolve this issue?

- A. Verify Access Keys for the user.
- B. Reset the Active Directory user password.
- C. Replace SSL Certificates at the Objects store level.
- D. Verify sharing policies at the bucket level.

Answer: D

NEW QUESTION # 48

An administrator plans to create a striped volume in a VM using guest-OS tools that will be backed by a volume-group. What configuration must be present for the VM to utilize multiple CVMs to service IO requests?

- A. The volume-group must have more than one vDisk configured.
- B. The volume-group must have flash mode enabled.
- C. The VM must have a virtual RAID controller capable of RAID level 0.
- D. iSCSI MPIO must be configured in the guest OS.

Answer: D

NEW QUESTION # 49

An administrator has created a volume and needs to attach it to a windows host via iSCSI. The data Services IP has been configured in the MS iSCSI Initiator, but no target are visible.

What is most likely the cause this issue?

- A. The host's IP address is not authorized to access the volume.
- B. The CHAP Authentication has not been configured on the client.
- C. The CHAP password configured on the client is incorrect.
- D. The host's IQN is not authorized to access to the volume.

Answer: D

NEW QUESTION # 50

An administrator has deployed a new backup software suite and needs to meet the following requirements:

- A. use S3-compatible storage.
- B. meet regulatory requirements.
- C. provide one-year retention.
- D. protect from deletions or overwrites for one year.

Answer: A

Explanation:

The administrator should use Nutanix Objects as the backup software suite.

Nutanix Objects is a S3-compatible storage solution that provides one-year retention and protection from deletions or overwrites for one year using WORM (Write Once Read Many) policies.
