In the process of your study, we have always been behind you and are your solid backing. This will ensure that once you have any questions you can get help in a timely manner.

### Salesforce Certified Data Architect Sample Questions (Q159-Q164):

#### NEW QUESTION # 159

Universal Containers has implemented Salesforce for its operations. In order for customers to be created in their MDM solution, the customer record needs to have the following attributes:

1. First Name
2. Last Name
3. Email

Which option should the data architect recommend to mandate this when customers are created in Salesforce?

- A. Configure Page Layout marking attributes as required fields.
- B. Mark Fields for the attributes as required under Setup.
- C. **Create validation rules to check If the required attributes are entered.**
- D. Build validation in Integration with MDM to check required attributes.

**Answer: C**

Explanation:

Creating validation rules to check if the required attributes are entered is the best option to mandate this when customers are created in Salesforce. Validation rules allow you to specify criteria that must be met before a record can be saved. You can use validation rules to ensure that customers have a first name, last name, and email when they are created in Salesforce. This way, you can prevent incomplete or invalid data from being sent to your MDM solution.

#### **NEW QUESTION # 160**

Universal Containers (UC) is implementing Salesforce and will be using Salesforce to track customer complaints, provide white papers on products, and provide subscription-based support.

Which license type will UC users need to fulfill UC's requirements?

- A. Sales Cloud License
- B. Salesforce License
- C. **Service Cloud License**
- D. Lightning Platform Starter License

**Answer: C**

Explanation:

Service Cloud License (option C) is the license type that UC users need to fulfill UC's requirements, as it allows them to track customer complaints, provide white papers on products, and provide subscription-based support. Sales Cloud License (option A) is mainly for managing sales processes and leads, Lightning Platform Starter License (option B) is for building custom apps and workflows, and Salesforce License (option D) is a generic term that does not specify a particular license type.

#### **NEW QUESTION # 161**

As part of a phased Salesforce rollout, there will be 3 deployments spread out over the year. The requirements have been carefully documented. Which two methods should an architect use to trace back configuration changes to the detailed requirements? Choose 2 answers

- A. Review the setup audit trail for configuration changes.
- B. Use the Force.com IDE to save the metadata files in source control.
- C. **Put the business purpose in the Description of each field.**
- D. Maintain a data dictionary with the justification for each field.

**Answer: C,D**

#### **NEW QUESTION # 162**

How can an architect find information about who is creating, changing, or deleting certain fields within the past two months?

- A. **Export the setup audit trail and find the fields in question.**
- B. Create a field history report for the fields in question.
- C. Remove "customize application" permissions from everyone else.
- D. Export the metadata and search it for the fields in question.

**Answer: A**

#### **NEW QUESTION # 163**

NTO need to extract 50 million records from a custom object everyday from its Salesforce org. NTO is facing query timeout issues while extracting these records.

What should a data architect recommend in order to get around the time out issue?

- A. Ask SF support to increase the query timeout value.
- B. Use a custom auto number and formula field and use that to chunk records while extracting data.
- C. The REST API to extract data as it automatically chunks records by 200.
- D. Use ETL tool for extraction of records.

**Answer: D**

#### **NEW QUESTION # 164**

.....

You can practice all the difficulties and hurdles which could be faced in an actual Salesforce exam. It also assists you in boosting confidence and reducing problem-solving time. The Pass4future designs Data-Architect desktop-based practice software for desktops, so you can install it from a website and then use it without an internet connection.
