## Salesforce Certified Heroku Architect Sample Questions (Q145-Q150):

### NEW QUESTION # 145

Universal Containers experienced an outage with their production Heroku Postgres database due to a fault with the underlying infrastructure. The database was unavailable for an hour. The database is on the Standard-0 plan.

Which two actions should an Architect recommend to mitigate such database failures and outages in the future? (Choose two.)

- A. Migrate the database to a Premium-tier plan.
- **B. Create a follower database that uses the same plan as the leader.**
- **C. Migrate the database to a larger Standard-tier plan.**
- D. Create a fork of the database that uses the same plan as the leader.

**Answer: B,C**

#### NEW QUESTION # 146

A customer wants to sync data between their Salesforce org and Heroku Postgres. Which two limitations should an Architect remember when recommending Heroku Connect? (Choose two.)

- A. HerokuConnect can only access fields and objects that its associated Salesforce integration user can access.
- B. Heroku Connect cannot sync custom objects.
- C. Heroku Connectdoes not provide an API.
- D. Heroku Connect does not support all Salesforce objects and fields.

**Answer: A,C**

#### NEW QUESTION # 147

Universal Containers has recently experienced a higher volume of traffic on their mobile app hosted on Heroku. When Universal Containers was running 4standard-2x dynos with 1 GB RAM each, they encountered multiple H12 ("request timeout") errors. The app never consumed more than 800 MB of RAM. They then switched to performance-m dynos, with 2.5 GB RAM, and set autoscaling to a maximum of 2 dynos.

However, they still encountered H12 ("request timeout") errors.

What remediation should an Architect recommend to alleviate this problem?

- A. Replace autoscaling with a manual scaling option of 2.
- B. Add a logging add-on from the Elements marketplace.
- C. Upgrade to performance-L dynos with 14 GB RAM.
- D. Move long-running tasks to worker dynos.

**Answer: D**

#### NEW QUESTION # 148

What are the three access levels a user can have in a Heroku Organization account?

- A. Admin, Member, and Viewer
- B. Jedi, Padawan, and Co-pilot
- C. Owner, Author and Viewer
- D. Admin, Programmer, and Operator

**Answer: A**

#### NEW QUESTION # 149

Universal Containers wants to limit the total cost of their Heroku usage while they're getting started on the platform. To accomplish this, they are considering replacing certain add-ons with comparable open-source components, but the development team doesn't want to lose access to certain features that the add-ons provide.

Which option should an Architect recommend for reducing add-on costs without affecting feature availability?

- A. Remove data store add-ons from the staging and development versions of the applications.
- B. Remove aliases for high-cost add-ons.
- C. Migrate add-ons to free plans.
- D. Share a single instance of a compatible paid add-on across multiple applications.

**Answer: A**
