Quiz 2026 Oracle 1z0-1057-25: Oracle Project Management Cloud 2025 Implementation Professional Marvelous Latest Mock Test

You may be not quite familiar with our 1z0-1057-25 test materials and we provide the detailed explanation of our 1z0-1057-25 certification guide as functions that can help the learners adjust their learning arrangements and schedules to efficiently prepare the 1z0-1057-25 exam. The clients can record their self-learning summary and results into our software and evaluate their learning process, mastery degrees and learning results in our software. According their learning conditions of our 1z0-1057-25 Certification guide they can change their learning methods and styles.

Oracle Project Management Cloud 2025 Implementation Professional Sample Questions (Q101-Q106):

NEW QUESTION # 101

Your customer wants to automatically allocate unassigned asset lines and common costs across multiple assets based on the construction-in-process cost of each asset. Identify the asset allocation method that you must use as the default method while configuring project types to meet this requirement. (Choose the best answer.)

- A. Estimated Cost
- B. Spread Evenly
- C. Standard Unit Cost
- D. Actual Unit
- E. Current Cost

Answer: E

Explanation:

Ref: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19a/oapfm/project-foundation-configuration-manage-project-types.html#OAPFM220111> Topic - Asset Cost Allocation Methods: Explained The asset cost allocation method determines how indirect or common costs incurred on a project are allocated to multiple assets.

You can specify an asset cost allocation method to enable Oracle Fusion Project Costing to automatically allocate unassigned asset lines and common costs across multiple assets. Unassigned asset lines typically occur when more than one asset is assigned to an asset grouping level.

Projects and project templates inherit a default asset cost allocation method from the associated project type.

You can override the default at the project level. If you use capital events to allocate costs, then you can also override the asset cost allocation method at the event level.

The following table describes the available asset cost allocation methods.

Method

Basis of Cost Allocation

Actual Units

Number of units defined for each asset

Current Cost

Construction-in-process (CIP) cost of each asset

Estimated Cost

Estimated cost of each asset

Standard Unit Cost

Combination of the standard unit cost and the number of units defined for each asset Spread Evenly Equal allocation of cost to each asset

NEW QUESTION # 102

Which setup option is common to both financial and project plan types?

- A. Enable the entry of plan amounts in currencies other than the project currency.
- B. Enable the use of a workflow for managing budget or forecasting status changes.
- C. Identify whether the plan type is the default selection when you create budget or forecast versions.
- D. Manage the options for creating control budgets in Oracle Fusion Budgetary Control.

Answer: A

Explanation:

Ref: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19b/oapfm/project-control-configuration-manage-financial-and-project-plan-types.html#OAPFM75315> Financial and Project Plan Setup Options The following table describes the basic budget, forecast, or project plan setup options that determine how a plan type is used in the context of a project. Except for third-party scheduling, you can't edit these options at the project level.

Option

Location

Description

Planning amounts

Financial plan type

Indicates that the financial plan type supports the creation of versions with the following amounts:

- * Cost amounts
- * Revenue amounts
- * Both cost and revenue amounts

* Either cost or revenue amounts

Approved budget or primary forecast

Financial plan type

Determines whether a financial plan type is used for creating approved budget versions or primary forecast versions that are used for plan comparison or project performance reporting.

Default financial plan type

Financial plan type

Determines whether the financial plan type is the default selection when you create budget or forecast versions.

Workflows

Financial plan type

Enables the use of a workflow for managing budget or forecast status changes.

Third-party scheduling software

Project plan type

Indicates whether project planning is performed in Microsoft Project.

If third-party scheduling is disabled in the project plan type, you can use the associated project or project template to create a project in Microsoft Project. However, you can't export the new project or link it to one created in Oracle Fusion Project Portfolio Management.

Multiple transaction currencies

Financial and project plan type

Enables entry of plan amounts in currencies other than the project currency.

Budgetary control settings

Financial plan type

Manages options for creating control budgets in Oracle Fusion Budgetary Control.

NEW QUESTION # 103

Your customer has implemented Oracle Project Portfolio Management Cloud recently and they have hired new employees for their Professions Services business. These employees are set up in Oracle Human Capital Management Cloud, but the Project Administrators are unable to add them as resources in the Planning Resource Breakdown Structure.

What are three conditions for new employees to show up in the list? (Choose three.)

- A. All new employees created as persons must have an active project role.
- B. All new employees created as persons must be assigned to a department.
- C. Current date is before the effective date of the resource, and you did not enable the "Include people with future-dated effective start dates" option during the search.
- D. All new employees created as persons must have an active assignment.
- E. All new employees created as persons must have an active supervisor.

Answer: B,C,D

Explanation:

Ref: https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19b/oapfm/project-foundation-configuration-define-project-resource-breakdown-structures.html#OAPFM180158_2 Why can't I find persons in the list of resources when I enter team members, planning resources, or person rate schedules?

You can't find persons in the list of resources when you enter team members, planning resources, or person rate schedules in the following situations:

* The administrator didn't assign a department while creating users. Persons must have an active assignment and be assigned to a department in Oracle Fusion Human Capital Management before they can be added as team members or entered as resources on the planning resource breakdown structure or person rate schedule.

* The resource isn't active in Oracle Fusion Human Capital Management because the current date is before the effective date of the resource. If you want to include persons who will start in the future, select the Include people with future-dated effective start dates option when you search for the person.

* Persons assigned as project managers aren't active as of the project start date.

* The assignment of the person is terminated, and an appropriate value isn't set for the number of days to display people with terminated assignments. You can set the profile value appropriately at the site profile level using the Specify Number of Days to Display People with Terminated Assignments task in the Setup and Maintenance work area.

NEW QUESTION # 104

Which three features are part of Oracle Fusion Functional Setup Manager?

- A. modifying an existing implementation project task list by selecting more functional areas when needed
- **B. guided task list for end-to-end setup requirements**
- C. updating an implementation project task list by changing the opt-in configuration to suit the latest requirements
- **D. feature opt-in for a best fit configuration**
- **E. export and import services for setup data migration between environments**

Answer: B,D,E

Explanation:

<https://docs.oracle.com/en/cloud/saas/applications-common/r13-update17d/oafsm/applications-cloud-using-functional-setup-manager.pdf> Functional Setup Manager offers the following:

- * Standardized application configuration and setup experience
- * Feature opt-in for a best fit configuration
- * Flexible processes for managing setup:
 - # Setup by functional areas for an adopt-as-you-go approach
 - # Implementation projects to manage setup
 - # Upload file to enter setup data in bulk
- * Guided task list for end-to-end setup requirements
- * Export and import services for setup data migration between environments
- * Comprehensive reporting on setup data

NEW QUESTION # 105

Identify the valid approval group type applicable to Oracle Project Financial Management Cloud. (Choose the best answer.)

- A. Job
- **B. Static**
- C. Flexfield
- D. Dynamic
- E. Position

Answer: B

Explanation:

Ref: <https://docs.oracle.com/en/cloud/saas/applications-common/19b/facia/define-approval-management.html#FACIA3124477>

Topic Approval Groups

Each approval group includes a set of users that you configure to act on tasks in a certain pattern. Tasks can be defined to get routed to an approval group instead of an individual user. You can nest approval groups within approval groups.

You have two options for defining the group:

- * Static: Select the specific users to include in the group.
- * Dynamic: Provide the logic to use to determine the users in the group.

NEW QUESTION # 106

.....

Studying for attending Oracle Project Management Cloud 2025 Implementation Professional exam pays attention to the method. The good method often can bring the result with half the effort, therefore we in the examination time, and also should know some test-taking skill.
