## Latest Valid Slack-Admn-201 Exam Duration – First-Grade Trustworthy Practice for Slack-Admn-201: Salesforce Certified Slack Administrator

To go beyond basic knowledge and truly excel, it is essential to utilize the Salesforce Practice Test software. This Slack-Admn-201 software offers a range of modes, allowing you to practice and sharpen your skills. By engaging in learning modes and Slack-Admn-201 test modes, you can effectively enhance your understanding of the Slack-Admn-201 exam and build the confidence needed to succeed.

### Salesforce Certified Slack Administrator Sample Questions (Q63-Q68):

#### NEW QUESTION # 63

You're a Workspace Owner introducing Slack to your organization for the first time.

In order to encourage employees to use Slack, you've organized a contest to see who can send the most messages in Slack channels in a week.

What's the best way to determine the winner?

(Select the best answer.)

- A. View the Channels tab in the Slack analytics dashboard.
- B. Export messages from your workspace to view message data offline.
- **C. View the Members tab in the Slack analytics dashboard.**
- D. Install a custom bot in each channel to count all messages.

**Answer: C**

Explanation:

Slack's analytics dashboard provides detailed activity metrics per user:

"The Members tab in the analytics dashboard shows the number of messages sent by each member, making it easy to track individual engagement." The Channels tab tracks activity per channel, not per user.

Installing a bot (option B) or exporting messages (option D) would be unnecessary and complex when Slack's native analytics already provide this data.

(Reference: Slack Administration Study Guide - Analytics and Reporting)

-

#### NEW QUESTION # 64

What is true when public file sharing is enabled?

- **A. Your organization's file sharing settings will apply to all files uploaded to a Slack Connect channel by any of the up to 250 organizations that have joined the channel.**
- B. Integrated data loss prevention (DLP) solutions can monitor files in private channels and direct messages (DMs).
- C. In a public channel, only admins can create an external link for a file.
- D. File upload permissions to Slack Connect channels can't be restricted.

**Answer: A**

Explanation:

Slack documentation states:

"When public file sharing is enabled, file sharing settings apply to files uploaded by any organization participating in a Slack Connect channel." DLP monitoring (A) is separate and applies differently. File upload permissions (C) can be restricted through Slack Connect settings. Any user, not just admins (D), can create external file links if allowed.

(Reference: Slack Administration Study Guide - Managing Public File Sharing in Slack)

-

#### NEW QUESTION # 65

Jason, an Org Owner on the Enterprise Grid plan, wants to enable additional mobile security features for users who have unmanaged devices.

Which of the following mobile security features is available to Jason?

- A. Make VPN mandatory
- B. Block Workspace access
- **C. Block message copying and the downloads**
- D. Restrict access based on IP

**Answer: C**

Explanation:

Slack's mobile security features on Enterprise Grid allow:

"Blocking the ability to copy messages and download files on unmanaged devices to protect sensitive data." IP restrictions (Option B) and VPN enforcement (Option D) are broader network security strategies but not specific mobile device security features.

Blocking workspace access completely is not the goal; securing content on devices is.

(Reference: Slack Administration Study Guide - Mobile Security Features and Compliance Settings)

-

#### NEW QUESTION # 66

In which two scenarios would SCIM provisioning be the best method of adding users to a workspace? (Select the TWO best answers.)

- A. You are the Slack admin for a multinational networking corporation and want users to have Slack accounts only if they plan to use the accounts.
- B. Your pet food company works closely with a packaging supplier, and you want all employees of the companies to communicate seamlessly in Slack.
- **C. Your delivery company has multiple workspaces in its Slack Enterprise Grid plan for each of its subsidiaries, and you need to be able to assign users to specific workspaces.**
- **D. Your environmental services company plans to launch Slack to all employees in a single day and sunset its former communication platform.**
- E. You need to preserve all users' apps and integrations (bot users, slash commands, incoming webhooks, etc.) when they are deprovisioned.

**Answer: C,D**

Explanation:

Slack's official documentation states:

"SCIM provisioning is ideal for automatically managing large user populations, assigning them to workspaces, and ensuring immediate onboarding or deactivation through integration with your Identity Provider (IdP)." It is perfect for multiple workspaces (A) and large, one-time onboarding events like a company-wide Slack launch (E).

Options B and C relate to Slack Connect and app behavior, not SCIM. Option D refers to "Just-in-Time" provisioning, not SCIM. (Reference: Slack Administration Study Guide - SCIM Provisioning)

-

#### NEW QUESTION # 67

You're a Workspace Owner. You notice employees are breaking corporate policy by sharing business-issued credit card numbers in channel when booking their travel for an upcoming customer meeting. Your information security team identifies this as a risk. What recommendation should you make to prevent this from happening in the future?

(Select the best answer.)

- A. Use the Admin APIs to create a custom script to flag credit card numbers.
- B. Use Workflow Builder to allow people to report policy violations.
- **C. Integrate with a Data Loss Prevention (DLP) solution using Slack's Discovery API.**
- D. Integrate with a Discovery solution using Slack's Discovery API.

**Answer: C**

Explanation:

According to Slack's official security recommendations:

"For organizations needing to prevent sensitive data from being shared in Slack, the recommended approach is to integrate Slack with a Data Loss Prevention (DLP) solution using the Discovery API." DLP integrations can monitor messages and files, detect patterns like credit card numbers, and take automated actions to prevent or alert on policy violations.

Option A (Discovery solution) is related to data retention and eDiscovery, not proactive DLP enforcement.

Option B would require custom development and is not the standard or scalable approach. Option D (Workflow Builder) is not intended for monitoring sensitive data.
