The PSM-I Exam is designed to test the candidate's understanding of Scrum theory, practices, and principles, and their ability to apply this knowledge in complex situations.

Scrum Professional Scrum Master I Sample Questions (Q239-Q244):

NEW QUESTION # 239

What does it mean for a Scrum Team to be cross-functional? (choose the best answer)

- A. The Scrum Team is a virtual team drawing from separate teams of business analysts, architects, developers, and testers
- B. The Scrum Team includes not only developers but also business analysts, architects, and testers
- **C. The Scrum Team includes skilled individuals who together have all the skills necessary to create value each sprint**
- D. Developers on the Scrum Team work closely with business analysts, architects, developers, and testers who are not on the team

Answer: C

Explanation:

According to the Scrum Guide, a Scrum Team is cross-functional if it includes skilled individuals who together have all the skills necessary to create value each Sprint. This means that the Developers can work on any aspect of the product without depending on others outside the team. The other options are not valid descriptions of cross-functionality, as they either imply that the Developers work in silos or rely on external people (such as business analysts, architects, testers, or separate teams).

NEW QUESTION # 240

Cross-functional teams are optimized to work on one technical layer of a system only (e.g. GUI, database, middle tier, interfaces).

- A. True
- **B. False**

Answer: B

Explanation:

Explanation/Reference:

NEW QUESTION # 241

A Development Team is required to deliver a done Increment by the end of a Sprint. Select two statements that explain what "Done" means. (Choose two.)

- A. Whatever the Product Owner defines as quality.
- **B. All work to create software that is ready to be released to end users.**
- C. All work the Development Team is willing to do.
- **D. No work left from the definition of "Done".**
- E. Ready for integration.

Answer: B,D

Explanation:

The correct answers are B and D, because these statements explain what "Done" means. No work left from the definition of "Done" means that all Product Backlog items selected for a Sprint meet the quality criteria agreed upon by the Scrum Team. All work to create software that is ready to be released to end users means that the Increment is potentially releasable at any time during the Sprint.

NEW QUESTION # 242

Who creates a Product Backlog Item's estimate?

- A. The Product Owner with input from the Development Team
- B. The Scrum Master.
- C. The most senior people in the organization, including architects and subject matter experts.
- D. The Development Team, alone.
- **E. The Development Team after clarifying requirements with the Product Owner.**

Answer: E

Explanation:

According to the Scrum Guide 1, Product Backlog refinement is an ongoing activity in which Product Backlog items are reviewed
