

Perfect HP HPE7-A11 Exam Review & Authoritative ValidExam - Leading Provider in Qualification Exams

HP HPE7-A01 Practice Questions

Aruba Certified Campus Access Professional Exam

Order our HPE7-A01 Practice Questions Today and Get Ready to Pass with Flying Colors!

HPE7-A01 Practice Exam Features | QuestionsTube

- Latest & Updated Exam Questions
- Subscribe to FREE Updates
- Both PDF & Exam Engine
- Download Directly Without Waiting

<https://www.questionstube.com/exam/hpe7-a01/>

At QuestionsTube, you can read HPE7-A01 free demo questions in pdf file, so you can check the questions and answers before deciding to download the HP HPE7-A01 practice questions. These free demo questions are parts of the HPE7-A01 exam questions. Download and read them carefully, you will find that the HPE7-A01 test questions of QuestionsTube will be your great learning materials online. Share some HPE7-A01 exam online questions below.

1. What is true regarding 802.11k?

HPE7-A11 exam certification is considered as a standard in measuring your professional skills in your industry. Besides, those possessing the HP HPE7-A11 certification are more likely to receive higher salaries. So it is very necessary to get HPE7-A11 certification. Here, ValidExam HPE7-A11 free pdf download can give you some reference. First, you should have preview about the content of HPE7-A11 real test. HP HPE7-A11 contains the comprehensive contents with explanations where is available. With the assist of HPE7-A11 training material, you will get success.

If you are going to purchasing the HPE7-A11 exam bootcamp online, you may pay more attention to the pass rate. With the pass rate more than 98%, our HPE7-A11 exam materials have gained popularity in the international market. And we have received many good feedbacks from our customers. In addition, we offer you free demo to have a try before buying HPE7-A11 Exam Braindumps, so that you can have a deeper understanding of what you are going to buy. You can also enjoy free update for one year, and the update version for HPE7-A11 will be sent to your email automatically.

New HPE7-A11 Test Pattern, Latest HPE7-A11 Test Fee

The HPE7-A11 certification verifies that you are a skilled professional. ValidExam product is designed by keeping all the rules and regulations in focus that HP publishes. Our main goal is that you can memorize the actual HP HPE7-A11 Exam Question to complete the HPE Network Campus Access Professional Architect Exam (HPE7-A11) test in time with extraordinary grades.

HPE Network Campus Access Professional Architect Exam Sample Questions (Q132-Q137):

NEW QUESTION # 132

It has been identified that the client's existing network is having to retransmit packets due to possible hardware or configuration issues. A review of hardware configuration and transport reliability will need to be assessed prior to completing the new design. What should this phenomenon be classified as?

- A.
- B.
- C.

Answer: C

Explanation:

The phenomenon where packets have to be retransmitted due to possible hardware or configuration issues is classified as "Loss," depicted in Option B. Packet loss occurs when one or more packets of data traveling across a network fail to reach their destination, which can be caused by errors in data transmission, typically resulting from network congestion, hardware failure, or configuration errors. When packet loss occurs, protocols like TCP ensure that the data is retransmitted so that the integrity of the communication is maintained. In a network design, ensuring the reliability of hardware and proper configuration is critical to minimize packet loss.

NEW QUESTION # 133

Which documentation resources can be used for finding validated information on HPE Aruba Networking products that assist the architect in building the solution design? (Choose three.)

- A. product reviews (CNET, Network World)
- B. **data sheets**
- C. competitive documentation
- D. **configuration guides**
- E. Gartner annual reports
- F. **validated Solution Guide**

Answer: B,D,F

Explanation:

When seeking validated information on Aruba products to assist in building a solution design, the most reliable resources include configuration guides (Option B), datasheets (Option C), and validated Solution Guides (Option F). Configuration guides provide detailed instructions and best practices for setting up and optimizing Aruba products, ensuring their proper integration into the network infrastructure. Datasheets offer concise overviews of product specifications, features, and capabilities, allowing architects to assess product suitability for specific requirements.

Validated Solution Guides compile comprehensive information on deploying Aruba solutions in various scenarios, ensuring that the solution design is based on proven methodologies and recommended practices, thereby enhancing the reliability and performance of the network solution.

NEW QUESTION # 134

A large multinational financial institution has contracted you to design a new full-stack wired and wireless network for their new 6-story regional office building. The bottom two floors of this facility will be retail space for a large banking branch. The upper floors will be carpeted office space for corporate users, each floor being approximately 100,000 sq ft (9290 sq m). Data centers are all offsite and will be out of scope for this project. The customer is underserved by its existing L2-based network infrastructure and would like to take advantage of modern best practices in the new design. The network should be fully resilient and fault-tolerant, with dynamic segmentation at the edge.

The retail space will include public guest Wi-Fi access. Retail associates will have corporate tablets for customer service, and there will be a mix of wired and wireless devices throughout the retail floors. The corporate users will primarily use wireless for connectivity, but several wired clients, printers, and hard VoIP phones will be in use.

The customer is also planning on renovating the corporate office space in order to take advantage of 'smart office' technology. These improvements will drive blue-dot wayfinding, presence analytics, and other location-based services.

The client would like to include Blue Dot wayfinding for their carpeted office space. The retail floors are not currently in scope.

What would be needed to ensure proper licensing of the solution?

- A. Qty 4 Meridian Map subscriptions
Qty 4 Meridian Blue Dot subscriptions
- **B. Qty 1 Meridian Blue Dot subscription**
- C. Qty 1 Meridian Tracking subscription
Qty 1 Meridian Blue Dot subscription
- D. Qty 4 Meridian Blue Dot subscriptions

Answer: B

Explanation:

For implementing Blue Dot wayfinding in the carpeted office space of the multinational financial institution, a Meridian Blue Dot subscription is essential. Meridian's Blue Dot wayfinding technology allows for real-time indoor navigation, which can enhance the experience of employees and visitors by providing turn-by-turn directions within the office space. Given that the requirement is specifically for the carpeted office space and not for the retail floors, a single Meridian Blue Dot subscription would be the starting point to enable this functionality. This subscription would cover the deployment of the Blue Dot technology across the specified office floors, allowing for the integration of this feature into the institution's app or digital platform for indoor navigation. Additional subscriptions, such as Meridian Map subscriptions, might be required for more extensive mapping needs, but based on the provided options and the specific request for Blue Dot functionality, a single Blue Dot subscription would be the most direct answer.

NEW QUESTION # 135

A global cruise line company needs to refresh its current fleet. They will refresh the 'insides' of the ship to be cost-effective and increase their sustainability. They will replace the complete WLAN/LAN hardware of the ship. In this refresh, the company will not refresh its current security requirements. The CIO also wants to limit the number of unused ports in the switches. Future expansion will always mean a refresh of hardware. They start with the smallest ship with a maximum of 800 guests.

Each ship has a LAN infrastructure consisting of two core switches, up to 10 redundant distribution switches, and up to 500 access switches (400 cabins, 100 technical rooms). The Core switches are located in the MDF of the ship and the distribution switches are located in the IDFs of the ship. Each cabin and technical room gets one single access switch.

The cabling structure of the ship will not be refreshed. Each IDF is connected to the MDF by SMF, of which two pairs are available for the interconnect between the core and distribution. The length of SM fiber between MDF and IDF is less than 300 meters (980 ft) and the type used is OS1. Each cabin is connected by a single OM2 pair to the IDF, the maximum length is 60 meters (200 ft). Each technical room is connected by a single OM2 pair to the IDF, with lengths between 100 and 150 meters (320 and 500 ft).

For each cabin/technical room the customer is looking to replace their current fan-less 2530/2540 without changing the requirements, except they need to upgrade the uplink to distribution switch to 10GbE to handle the increased network traffic, and the technical rooms need redundant power.

The WLAN infrastructure will be 1:1 refreshed without new cabling or new AP locations. Their WLAN infrastructure is based on the 200/300 series indoor and outdoor APs running InstantOS (less than 300 APs), the customer has no change in WLAN requirements.

The cruise line company will replace its current internet connection before the LAN/WLAN refresh. The new Internet connection will provide a 99.8% uptime, which is needed to ensure the paid guest Wi-Fi is always operational. With this new Internet connection, the CIO of the cruise line wants to base the design on the ESP architecture from Aruba because internet connection is guaranteed.

Based on the best practices and customer requirements, what is the correct LAN approach?

- **A. management and user VLANs in the underlay**
- B. management and user VLANs in the overlay
- C. management VLAN in the overlay, user VLANs in the underlay
- D. management VLAN in the underlay, user VLANs in the overlay

Answer: A

Explanation:

Underlay Network: This approach is ideal for maintaining simplicity and efficiency in a ship's network environment, where there is a clear need for robust connectivity for both management and user traffic. By keeping both types of VLANs in the underlay, the network can ensure better performance and easier troubleshooting. The underlay provides the foundational connectivity, which is crucial for handling the expected increase in network traffic due to the upgrade.

Overlay Networks: While overlay networks can provide flexibility and segmentation, they are generally more complex and may not be necessary in this scenario, especially given the focus on cost-effectiveness and the existing cabling structure.

NEW QUESTION # 136

A global furniture retail company called 'No-Stair Inc.' requests you design their new WLAN infrastructure for a global footprint. Each location of 'No-Stair Inc.' has a similar layout: three small manager offices, a warehouse, and a 'retail' area. The 'retail' area and the warehouse together amount to 95% of the location. The IT department of the company is minimally engaged in their LAN refresh so the CTO of the company has shared the information below. Current WLAN infrastructure is based on the 802.11n "WiFi4Less" access-points series (both model 2013-INT (2.4 only Internal antenna) and model 2019-EXT (dual-band external antenna only)). These AP models are standalone without any centralized management. Last year 'No-Stair Inc.' ran a project called 'secure'. It's ensuring that all needed network security was implemented to be fully compliant with their security standards. During this project, they also upgraded the AAA infrastructure to handle the increased AAA requests. No additional Wi-Fi or security requirements are listed for this WLAN refresh, which means that 'No-Stair Inc.' will continue to use bridged SSIDs, with local breakout into different VLANs.

The CTO of 'No-Stair Inc.' understands the need for you to ask additional questions to deliver the design. The questions may be sent in written form and will be answered within two weeks. What additional question needs to be answered in order to collect needed information for the WLAN design?

- A. Is there enough cooling in the MOF?
- B. Who is the campus switch vendor?
- C. Does the existing wired network support enough drops for an upgraded Wi-Fi Network?
- D. What type or fiber connection is used between the core and access layer switches?

Answer: C

Explanation:

When upgrading a WLAN infrastructure, it's important to ensure that the existing wired network can support the new wireless access points (APs) in terms of connectivity and power (if using Power over Ethernet, PoE). For 'No-Stair Inc.', which is planning a WLAN refresh without specific changes to the Wi-Fi or security requirements but potentially with new AP models and configurations, verifying the capacity of the wired network is crucial. The question about whether the existing wired network has enough drops (ethernet connections) for the upgraded Wi-Fi network addresses this concern. It's essential to ensure that there are sufficient ethernet ports available in the right locations to connect the new APs, and that these ports can provide the necessary power and data rates required by modern APs. This information will help in planning the deployment of the new APs, avoiding potential bottlenecks and ensuring that the upgraded WLAN can deliver the desired performance and coverage.

NEW QUESTION # 137

.....

The emerging field of information technology has created a vast space for HP HPE7-A11 certification exam holders to get promotions and high-paying jobs. Thousands of candidates don't clear the HPE Network Campus Access Professional Architect Exam (HPE7-A11) exam because they have short time and they don't prepare for the HPE7-A11 exam questions. It results in a loss of time, money, and confidence. ValidExam is here to save you from this unfortunate situation with its Real HPE7-A11 Exam Questions. These HP HPE7-A11 Exam Questions are enough to ace the HPE7-A11 exam and move forward into the HP sector with full ease and confidence.

New HPE7-A11 Test Pattern: <https://www.validexam.com/HPE7-A11-latest-dumps.html>

ValidExam New HPE7-A11 Test Pattern accepts Visa, Master Card, Maestro, etc., Different from all other bad quality practice materials that cheat you into spending much money on them, our HPE7-A11 practice materials are the accumulation of professional knowledge worthy practicing and remembering. In other words, almost all of our customers of HPE7-A11 training materials have passed the exam as well as getting the related certification, Within several minutes, you will receive our HPE7-A11 study guide!

is the former executive editor of PC Computing magazine, where he developed HPE7-A11 the popular How It Works illustration to explain the new technologies that were emerging in computing at a prodigious rate.

Hot HPE7-A11 Exam Review 100% Pass | Professional HPE7-A11: HPE Network Campus Access Professional Architect Exam 100% Pass

Managing the Spelling Dictionaries, ValidExam accepts Latest HPE7-A11 Test Fee Visa, Master Card, Maestro, etc., Different from all other bad quality practice materials that cheat you into spending much money on them, our HPE7-A11 practice materials are the accumulation of professional knowledge worthy practicing and remembering.

In other words, almost all of our customers of HPE7-A11 training materials have passed the exam as well as getting the related certification, Within several minutes, you will receive our HPE7-A11 study guide!

The contents of HPE7-A11 study materials are all compiled by industry experts based on the examination outlines and industry development trends over the years.
