Besides, the PL-600 Exam Dumps contain both quality and certain quantity, it is good for you to practice and pass the exam successfully.

Microsoft Power Platform Solution Architect Sample Questions (Q76-Q81):

NEW QUESTION # 76

You are designing forms for a Microsoft Power Platform solution.

Each person must see only the columns required for their department.

You need to ensure that the forms open correctly, display only the fields needed, and that data can be entered quickly.

How should you design the form?

- A. Create a shared form for all departments. Add all the columns. Add column-level security to columns not needed for each department.
- B. Create one form for each department. Add all columns needed for all departments. Use business rules to hide columns.
- **C. Create one form for each department. Add only columns needed on the form for each department. Assign the appropriate security role to each form.**
- D. Add new columns to an existing form. Grant all departments security roles for that form.

Answer: C

NEW QUESTION # 77

You are designing a data model for a Microsoft Power Platform solution.

The data model must meet the following requirements:

* When an account is assigned to a new salesperson, all opportunities that are associated with the account must be assigned to the new salesperson.

* When a salesperson assigns a lead to another salesperson, all phone call activities related to the lead must be assigned to the new salesperson.

You need to recommend cascading strategies for the data model.

Which cascading strategy should you recommend? To answer, drag the appropriate cascading strategies to the correct requirements. Each cascading strategy may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 78

You are designing a Microsoft Power Platform solution that will include multiple applications.

You have the following requirements:

- * Support agents managing cases.
- * Project managers reviewing and updating their projects.
- * Stock managers managing warehouses.
- * New site visitors self-registering.
- * Employees tracking time entries.

Which three requirements can you meet by implementing role-based applications? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Stock managers managing warehouses.
- B. Project managers reviewing and updating their projects.
- C. New site visitors self-resisting.
- D. Support agents managing cases.
- E. Staff tracking time entries.

Answer: A,B,D

NEW QUESTION # 79

A company plans to integrate a model-driven app with external data sources. The company has the following requirements:

- * Consume data in its data warehouse from Microsoft Dataverse.
 - * Use a plug-in to retrieve information from an external service.
- You need to recommend a Microsoft Azure component for each requirement.

Which Azure components should you recommend? To answer, drag the appropriate Azure components to the correct requirements. Each Azure component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 80

You need to ensure that the solution meets the data security and compliance requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Assign: Cascade None

Scenario: Worker still records must be archived after ten years and are then removed from the main system.

Assign: The referenced table record owner is changed.

Cascade None: Do nothing.

Topic 2, Relecloud

Case study

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Background

Relecloud provides regional air service in North America. The company uses a variety of systems, apps, and services to manage the business. You are hired to design a new solution to manage passenger information, reservations, and maintenance.

Current environment

- * The company uses Microsoft Office 365.
- * The company has a custom app for managing and tracking passenger luggage. The app uses Microsoft Dataverse.
- * For flights longer than four hours, passengers receive a meal. Customers can select a meal when they make a reservation and can save the meal choices as a customer preference.
- * The company offers two types of meals: standard and vegetarian. Meal types can be temporarily unavailable. The airline is considering offering other meal types, such as gluten-free and low-sodium options.
- * The company uses paper-based reservation checklists to help ensure that all the steps for a reservation are complete.
- * The company uses vendors to service aircraft.

Environment

- * Ensure that employees can sign in to all Microsoft apps by using one set of credentials per employee.
- * Minimize the use of third-party products and custom development.
- * Reduce customer support call volumes by having the system automatically resolve common issues.
- * The security rule for agents must contain the privileges in the default Customer Service Representative security role.
- * Log issues as cases. The case form must show variable sections based on the case type. Include a custom entity named Seats and grant agents access to the entity.
- * Application use layout should be role specific.

Agents

- * You must standardize the format used by agents to enter customer phone numbers.
- * Agents need a solution to replace paper reservation checklists.
- * Agents need dashboards to show a current count of all reservations on the entity.
- * Agents need a way to track reservation issues.
- * Agents need a visual indicator in the interface to determine the reservation step to provide a seamless customer experience.
- * Agents need different versions of cancellation policies to send customers. One version must be controllable within the system.
- * Agents need to view which pieces of luggage match to each passenger, and then need to add the total on the passenger record.

IT

- * IT staff needs a mobile solution to see IT cases at the top of the menu since this is their primary focus.
- * IT staff needs a system that is easy to navigate to active cases.
- * IT specialists want to design Power BI reports. They need to understand the underlying table relationships of the system.
- * IT specialists need a solution that is visual rather than text-based so they can quickly complete their tasks.

Management

- * Management requires paginated reports for stakeholders.
- * Management wants to provide frequent flyers with better service when the flyers call.
- * Managers need to see all customer dashboards at the top of their menu on their mobile device.

Maintenance

- * Maintenance supervisors must not have access to Dynamics 365 Customer Service. The supervisors must be able to communicate with the contracts team about contracts.
- * Aircraft maintenance vendors must have only view and upload privileges to their invoices and receipts.
- * Contracts with maintenance companies must be stored in Dynamics 365 Customer Service.

NEW QUESTION # 81

.....

For years our team has built a top-ranking brand with mighty and main which bears a high reputation both at home and abroad.
