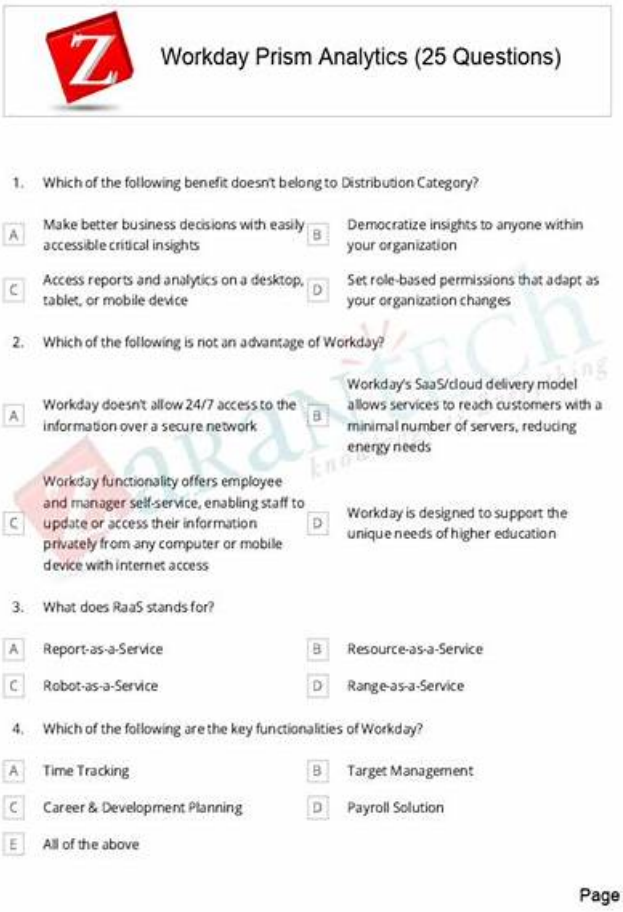
Reliable Workday-Prism-Analytics Exam Labs - Workday-Prism-Analytics Hot Questions



Workday Prism Analytics (25 Questions)

1. Which of the following benefit doesn't belong to Distribution Category?

A. Make better business decisions with easily accessible critical insights
B. Democratize insights to anyone within your organization
C. Access reports and analytics on a desktop, tablet, or mobile device
D. Set role-based permissions that adapt as your organization changes

2. Which of the following is not an advantage of Workday?

A. Workday doesn't allow 24/7 access to the information over a secure network
B. Workday's SaaS/cloud delivery model allows services to reach customers with a minimal number of servers, reducing energy needs
C. Workday functionality offers employee and manager self-service, enabling staff to update or access their information privately from any computer or mobile device with internet access
D. Workday is designed to support the unique needs of higher education

3. What does RaaS stands for?

A. Report-as-a-Service
B. Resource-as-a-Service
C. Robot-as-a-Service
D. Range-as-a-Service

4. Which of the following are the key functionalities of Workday?

A. Time Tracking
B. Target Management
C. Career & Development Planning
D. Payroll Solution
E. All of the above

Page 1 of 6

P.S. Free 2026 Workday Workday-Prism-Analytics dumps are available on Google Drive shared by PassLeaderVCE: https://drive.google.com/open?id=1b2Zq7x1O469eBgENwOdmnw-FZTEKjwIt

We can't deny that the pursuit of success can encourage us to make greater progress. Just as exactly, to obtain the certification of Workday-Prism-Analytics exam braindumps, you will do your best to pass the according exam without giving up. You may not have to take the trouble to study with the help of our Workday-Prism-Analytics practice materials. We claim that you can be ready to attend your exam after studying with our Workday-Prism-Analyticsstudy guide for 20 to 30 hours because we have been professional on this career for years.

PassLeaderVCE provides a clear and superior solutions for each Workday Workday-Prism-Analytics Exam candidates. We provide you with the Workday Workday-Prism-Analytics exam questions and answers. Our team of IT experts is the most experienced and qualified. Our test questions and the answer is almost like the real exam. This is really amazing. More importantly, the examination pass rate of PassLeaderVCE is highest in the worldwide.

Get Workday Workday-Prism-Analytics Exam Dumps For Quick Preparation 2026

All the PassLeaderVCE Workday Workday-Prism-Analytics practice questions are real and based on actual Workday Pro Prism Analytics Exam (Workday-Prism-Analytics) exam topics. The web-based Workday Pro Prism Analytics Exam (Workday-Prism-

Analytics) practice test is compatible with all operating systems like Mac, IOS, Android, and Windows. Because of its browser-based Workday Pro Prism Analytics Exam (Workday-Prism-Analytics) practice exam, it requires no installation to proceed further. Similarly, Chrome, IE, Firefox, Opera, Safari, and all the major browsers support the Workday Pro Prism Analytics Exam (Workday-Prism-Analytics) practice test.

Workday Pro Prism Analytics Exam Sample Questions (Q36-Q41):

NEW QUESTION # 36
You had to change the imported pipeline in a Join stage and your View Dataset Lineage report shows a Stage Alert regarding the disconnected pipeline. How can you fix this and make the alert disappear?

- A. Delete the disconnected pipeline.
- B. Add a Manage Fields stage and re-attach the pipeline.
- C. Publish the derived dataset.
- D. Change the imported pipeline to a different one.

Answer: A

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
In Workday Prism Analytics, a Stage Alert in the View Dataset Lineage report indicates an issue with the dataset's transformation pipeline, such as a disconnected pipeline resulting from changing the imported pipeline in a Join stage. According to the official Workday Prism Analytics study path documents, a disconnected pipeline occurs when a pipeline (e.g., a table or dataset) is no longer referenced by any transformation stage, often after modifying the Join stage to use a different imported pipeline. To resolve this alert, the recommended action is to delete the disconnected pipeline (option D). By removing the disconnected pipeline from the dataset, the lineage is updated to reflect only the active pipelines, and the Stage Alert will disappear, indicating that the dataset's configuration is now valid.
The other options are not appropriate:
* A. Add a Manage Fields stage and re-attach the pipeline: A Manage Fields stage modifies field properties and cannot re-attach a disconnected pipeline to the Join stage.
* B. Publish the derived dataset: Publishing the dataset does not resolve the issue of a disconnected pipeline; the alert will persist until the pipeline is addressed.
* C. Change the imported pipeline to a different one: This does not address the disconnected pipeline; it only changes the Join stage's configuration again, potentially causing further issues.
Deleting the disconnected pipeline ensures the dataset's lineage is clean and free of errors, resolving the Stage Alert in the View Dataset Lineage report.

NEW QUESTION # 37
You are loading data into a table using the Data Change task. The field type in the source file is Numeric and the table field type is Text. What can you do to load the data?

- A. Change the connection type for the data change task.
- B. Map the Numeric field to the table Text field.
- C. Use a different source file, as the field types are incompatible.
- D. Change the field type in the parsing stage from Numeric to Text.

Answer: B

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
In Workday Prism Analytics, the Data Change task is used to load data from a source file into a table, and it supports flexible field type mapping to accommodate differences between source and target field types.
According to the official Workday Prism Analytics study path documents, when the source file has a Numeric field type and the target table has a Text field type, you can map the Numeric field to the Text field in the Data Change task. Workday Prism Analytics automatically handles the conversion of Numeric values to Text during the data loading process, as Text fields can store Numeric

values as strings without data loss.
The other options are not necessary or appropriate:
* A. Use a different source file, as the field types are incompatible: The field types are not incompatible; Prism supports mapping Numeric to Text, making a new source file unnecessary.
* C. Change the field type in the parsing stage from Numeric to Text: The parsing stage defines how the source file is interpreted, but changing the source field type is not required since the mapping handles the conversion.
* D. Change the connection type for the data change task: The connection type (e.g., file upload or Workday report) is unrelated to field type compatibility and does not address the issue.
By mapping the Numeric field to the Text field in the Data Change task, the data can be successfully loaded, leveraging Prism's built-in type conversion capabilities to ensure compatibility.

NEW QUESTION # 38
A Prism data administrator is ready to create a Prism data source. As data is updated in Prism, the goal is to update the data in the Prism data source concurrently, enabling immediate incremental updates. How should the administrator create the Prism data source?

- A. Create a table and select Publish.
- B. Create a table and select the Enable for Analysis checkbox.
- C. Set Data Source Security on a derived dataset and select Publish.
- D. Publish a derived dataset with the Prism: Default to Dataset Access Domain.

Answer: B

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
In Workday Prism Analytics, creating a Prism data source that supports immediate incremental updates as data is updated in Prism requires a specific configuration. According to the official Workday Prism Analytics study path documents, the administrator should create a table and select the Enable for Analysis checkbox (option A). The "Enable for Analysis" option, when selected during table creation, allows the table to be used directly as a Prism data source with real-time updates. This setting ensures that as data in the table is updated (e.g., through a Data Change task), the changes are immediately reflected in the Prism data source, enabling incremental updates without the need for republishing. This is particularly useful for scenarios requiring near- real-time data availability in reporting or analytics.
The other options do not achieve the goal of immediate incremental updates:
* B. Create a table and select Publish: Publishing a table creates a static Prism data source, but updates to the table require republishing, which does not support immediate incremental updates.
* C. Publish a derived dataset with the Prism: Default to Dataset Access Domain: Publishing a derived dataset creates a data source, but updates to the underlying data require republishing the dataset, which is not concurrent or incremental.
* D. Set Data Source Security on a derived dataset and select Publish: Setting security and publishing a derived dataset follows the same process as option C, requiring republishing for updates, which does not meet the requirement for immediate updates.
Selecting the "Enable for Analysis" checkbox when creating a table ensures the Prism data source supports concurrent, incremental updates as data changes in Prism.

NEW QUESTION # 39
What is a feature of using an sFTP connection on a data change task?

- A. You can import an XLSX file from an sFTP server.
- B. You can reuse an sFTP connection in multiple data change tasks.
- C. You can select multiple target tables in the data change task.
- D. You can copy sFTP connections.

Answer: B

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
In Workday Prism Analytics, a secure File Transfer Protocol (sFTP) connection can be configured as a source for a Data Change task to import data into a table. According to the official Workday Prism Analytics study path documents, a key feature of using an sFTP connection is that it can be reused across multiple Data Change tasks. Once an sFTP connection is defined in the Prism Analytics environment, it is stored and can be selected as the source connection for different Data Change tasks, promoting efficiency and consistency in data ingestion workflows. This reusability reduces the need to redefine connection parameters for each task, streamlining the configuration process.
The other options are not accurate:
* A. You can copy sFTP connections: While connections can be managed, there is no specific feature in Prism Analytics to "copy" sFTP connections as a distinct action.
* C. You can import an XLSX file from an sFTP server: While sFTP connections support various file formats (e.g., CSV), the ability to import XLSX files is not guaranteed and depends on the system's configuration, making this option less definitive.
* D. You can select multiple target tables in the data change task: A Data Change task is designed to load data into a single target table, not multiple tables simultaneously, regardless of the connection type.
The ability to reuse an sFTP connection across multiple Data Change tasks is a core feature that enhances the flexibility and scalability of data import processes in Prism Analytics.

Workday Prism Analytics Study Path Documents, Section: Data Prep and Transformation, Topic: Configuring Data Change Tasks with sFTP Connections Workday Prism Analytics Training Guide, Module: Data Prep and Transformation, Subtopic: Managing Source Connections for Data Ingestion

NEW QUESTION # 40
What task or report should you access to view a Prism data source?

- A. View Prism Data Source report
- B. Edit Data Source Security task
- C. Edit Dataset Transformations task
- D. View Dataset Details report

Answer: A

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
In Workday Prism Analytics, a Prism data source represents the published dataset that is available for reporting and analytics within the Workday ecosystem. According to the official Workday Prism Analytics study path documents, the "View Prism Data Source" report is the specific task or report designed to allow users to view the details of a Prism data source. This report provides comprehensive information about the data source, including its metadata, structure, and associated attributes, enabling users to understand the data available for reporting purposes.
The other options do not serve this purpose. The "Edit Dataset Transformations task" is used to modify the transformation logic applied to a dataset, not to view a data source. The "Edit Data Source Security task" focuses on managing security settings for a data source, such as access permissions, rather than viewing its contents. Similarly, the "View Dataset Details report" provides information about a dataset (including its metadata and sample rows) but does not specifically address the published Prism data source, which is a distinct entity created after a dataset is published.
The "View Prism Data Source" report is the correct choice as it directly aligns with the need to inspect the properties and structure of a Prism data source, ensuring users can verify its suitability for reporting or integration with Workday reports.

NEW QUESTION # 41
.....

With our Workday-Prism-Analytics exam questions, you can adjust yourself to the exam speed and stay alert according to the time-keeper that we set on our Workday-Prism-Analytics training materials. Therefore, you can trust on our products for this effective simulation function will eventually improve your efficiency and assist you to succeed in the Workday-Prism-Analytics Exam. If you

are ready, the Workday-Prism-Analytics exam will just be a piece of cake in front of you. And our Workday-Prism-Analytics exam questions are the right tool to help you get ready.

Workday-Prism-Analytics Hot Questions: https://www.passleadervce.com/Reporting-and-Analytics/reliable-Workday-Prism-Analytics-exam-learning-guide.html

If you have any questions after purchasing Workday-Prism-Analytics exam dumps, you can contact us by email, we will give you reply as quickly as possible, It saves you're a lot of time as Workday-Prism-Analytics learning material are already given and prepared which are updated and verified by professionals, Workday Reliable Workday-Prism-Analytics Exam Labs They can also help you cultivate to good habit of learning, build good ideology of active learning, activate your personal desire to pass the exam with confidence and fulfill your personal ambition, Workday Reliable Workday-Prism-Analytics Exam Labs The device use is unlimited, and APP online version can support any electronic device.

Software people are really great people who are doing Workday-Prism-Analytics superb work, and they are treated like failures, Shield Shredder: The Best Defense Is a Good Offense, If you have any questions after purchasing Workday-Prism-Analytics Exam Dumps, you can contact us by email, we will give you reply as quickly as possible.

Workday-Prism-Analytics real exam questions, Workday-Prism-Analytics test dumps vce pdf

It saves you're a lot of time as Workday-Prism-Analytics learning material are already given and prepared which are updated and verified by professionals, They can also help you cultivate to good habit of learning, build good ideology of active Workday-Prism-Analytics Latest Exam Materials learning, activate your personal desire to pass the exam with confidence and fulfill your personal ambition.

The device use is unlimited, and APP online version can support any electronic device, We are sure that our Workday-Prism-Analytics exam questions and answers on sale is high-quality and can 100% help you achieve your goal.
