Free PDF Professional Microsoft - GH-100 - New GitHub Administration Study Guide

Customers can start using the Microsoft GH-100 Exam Questions instantly just after purchasing it from our website for the preparation of the GH-100 certification exam. They can also evaluate the GitHub Administration (GH-100) practice test material before buying with a free demo. The users will receive updates 365 days after purchasing. And they will also get a 24/7 support system to help them anytime if they got stuck somewhere or face any issues while preparing for the GH-100 Exam.

Microsoft GH-100 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> • Manage GitHub Actions: This section of the exam measures skills of DevOps Engineers and emphasizes managing workflows, reusable actions, and distribution strategies within the enterprise. It explains configuring organization-level policies, managing self-hosted and GitHub-hosted runners, controlling access through IP allow lists, handling encrypted secrets, and integrating third-party vaults for workflow security.
Topic 2	<ul style="list-style-type: none"> • Manage user identities and GitHub authentication: This section of the exam measures skills of DevOps Engineers and focuses on managing authentication and identity across organizations using SAML SSO, SCIM, and team synchronization. Candidates need to understand identity providers, user membership implications, authorization models, and enforcing security measures such as two-factor authentication.
Topic 3	<ul style="list-style-type: none"> • Enable secure software development and ensure compliance: This section of the exam measures skills of GitHub Enterprise Administrators and deals with applying GitHub's security and compliance capabilities. It covers policies, auditing, scrubbing sensitive data, secret scanning, code scanning with CodeQL, dependency management with Dependabot, and implementing security response plans. It also explores authentication tokens, app security policies, and enterprise managed users.
Topic 4	<ul style="list-style-type: none"> • Manage GitHub Packages: This section of the exam measures skills of GitHub Enterprise Administrators and focuses on managing GitHub Packages, their use in workflows, and how they differ from releases. It involves accessing, writing, and sharing packages across teams while ensuring integration into CI • CD pipelines.
Topic 5	<ul style="list-style-type: none"> • Describe how GitHub is deployed, distributed, and licensed: This section of the exam measures skills of GitHub Enterprise Administrators and highlights the deployment models of GitHub Enterprise Server, Enterprise Cloud, and GitHub AE. It covers licensing structures, billing for seat licenses and metered services, support options, and monitoring license usage across users and machine accounts.

Microsoft GitHub Administration Sample Questions (Q28-Q33):

NEW QUESTION # 28

You are using GitHub-hosted runners and need to securely deploy to an internal system. The security team requires that these runners use IP address ranges that would not be shared with other companies. Which of the following approaches would meet their requirements?

- A. GitHub-hosted standard runners, using the IP addresses provided in "api" from <https://api.github.com/meta>
- B. GitHub-hosted standard runners, using the IP addresses provided in "actions" from <https://api.github.com/meta>
- **C. GitHub-hosted larger runners with static IP addresses**
- D. GitHub-hosted larger runners with Azure private networking

Answer: C

Explanation:

GitHub's larger runners let you reserve dedicated static IP addresses for your workflows - so you can allow-list those IPs in your firewall and be sure they aren't shared with any other tenant.

NEW QUESTION # 29

What needs to be done to ensure that only specific repositories can access the runners in an organization runner group?

- A. Configure the Actions Policies to "Only selected repositories".
- B. Add a label to the runner group.
- **C. Configure repository access in the runner group settings.**
- D. Use GitHub's meta API to configure access.

Answer: C

Explanation:

In the organization's runner group settings, switch the access from "All repositories" to "Selected repositories" and then explicitly choose which repos may use those runners.

NEW QUESTION # 30

Which practice helps avoid service disruption when consuming GitHub APIs at scale?

- A. Caching all API responses permanently
- B. Ignoring secondary rate limits
- C. Using multiple tokens to bypass limits
- D. Designing your application to work within GitHub's rate limits

Answer: D

Explanation:

Designing your integration to stay within GitHub's documented rate limits-by batching requests, using conditional requests, handling 429 responses with back-off, and monitoring the X-RateLimit-* headers - ensures you won't be temporarily throttled or cut off when you hit secondary limits.

NEW QUESTION # 31

What distinguishes Enterprise Managed Users (EMUs) from standard GitHub accounts?

- A. EMUs are managed in GitHub and use GitHub authentication
- B. EMUs can only be created using email invites
- C. EMUs are only available for GitHub Enterprise Server
- D. EMUs are fully controlled by an IdP and cannot log in with personal credentials

Answer: D

Explanation:

EMU accounts are provisioned and authenticated exclusively through your identity provider - users sign in via the IdP and cannot use or manage GitHub-native credentials.

NEW QUESTION # 32

How does Dependabot determine which security update PRs to open?

- A. It reads the GitHub Issues and automatically suggests fixes.
- B. It uses the dependency graph and Dependabot alerts to open PRs for patched versions.
- C. It compares your codebase to the GitHub Trending list.
- D. It waits for manual triage of all CVEs.

Answer: B

Explanation:

Dependabot relies on your repository's enabled Dependency Graph and Dependabot Alerts to identify vulnerable dependencies; it then automatically opens pull requests to update to the patched versions that resolve those alerts.

NEW QUESTION # 33

.....

Each Microsoft certification exam candidate know this certification related to the major shift in their lives. Microsoft Certification GH-100 Exam training materials Dumps4PDF provided with ultra-low price and high quality immersive questions and answersdedication to the majority of candidates. Our products have a cost-effective, and provide one year free update. Our certification training materials are all readily available. Our website is a leading supplier of the answers to dump. We have the latest and most accurate certification exam training materials what you need.
