CyberArk Defender - PAM Sample Questions (Q39-Q44):

NEW QUESTION # 39

Match each permission to where it can be found.

Add Accounts	Drag answer here	Vault
Initiate CPM account management operations	Drag answer here	Safe
Add/Update Users	Drag answer here	
Add Safes	 CYBERARK The Identity Security Company	

Answer:

Explanation:

Add Accounts	Safe	Vault
Initiate CPM account management operations	Safe	Safe
Add/Update Users	Vault	
Add Safes	 CYBERARK The Identity Security Company	

Explanation

- * Add Accounts --> Safe
- * Initiate CPM account management operations -> Safe
- * Add/Update Users -> Vault
- * Add Safes -> Vault

Comprehensive Explanation:

- * Add Accounts: This permission is associated with the ability to add new accounts to the CyberArk Vault. It is typically found in the Vault's administrative settings where account management is handled.
- * Initiate CPM account management operations: This permission allows users to initiate operations related to the Central Policy Manager (CPM) for account management within a Safe. It is found in the Safe's permissions settings.
- * Add/Update Users: This permission enables the addition or updating of user information in the Vault. It is found in the Vault's user management settings.
- * Add Safes: This permission is related to the creation of new Safes in the Vault. It is found in the Vault's administrative settings

where Safe management is conducted.

References:

* The permissions and their locations can be referenced in the CyberArk Defender PAM course materials and official documentation, which provide detailed information on the management of permissions within the CyberArk solution.

NEW QUESTION # 40

You want to generate a license capacity report.

Which tool accomplishes this?

- A. Password Vault Web Access
- B. RestAPI
- C. DiagnoseDB Report
- D. **PrivateArk Client**

Answer: D

Explanation:

Explanation

The license capacity report is a tool that provides information about the licensed user types and objects in the Vault. It enables users to see the maximum number of licenses for each user type or object, and the number of used licenses for each one. Only user types and objects that are limited by the license are displayed in this report. To generate a license capacity report, users need to use the PrivateArk Client, which is a graphical user interface that allows users to manage safes and their properties. Users can access the report from the Tools menu in the PrivateArk Client. References: Reporting License Usage, Manage the CyberArk License

NEW QUESTION # 41

You received a notification from one of your CyberArk auditors that they are missing Vault level audit permissions. You confirmed that all auditors are missing the Audit Users Vault permission.

Where do you update this permission for all auditors?

- A. PVWA> Administration > Configuration Options > LDAP integration > Vault Auditors Mapping > Vault Authorizations
- B. PVWA User Provisioning > LDAP integration > Vault Auditors Mapping > Vault Authorizations
- C. **Private Ark Client > Tools > Administrative Tools > Users and Groups > Auditors > Authorizations tab**
- D. Private Ark Client > Tools > Administrative Tools > Directory Mapping > Vault Authorizations

Answer: C

NEW QUESTION # 42

A newly created platform allows users to access a Linux endpoint. When users click to connect, nothing happens.

Which piece of the platform is missing?

- A. UnixProcess.ini
- B. PSM-RDP Connection Component
- C. UnixPrompts.ini
- D. **PSM-SSH Connection Component**

Answer: D

Explanation:

Explanation

A platform is a set of parameters that defines how CyberArk manages passwords and sessions for a specific type of account or system. To allow users to access a Linux endpoint, the platform needs to have a PSM-SSH connection component, which enables transparent connections to Linux machines using the SSH protocol. The PSM-SSH connection component is configured in the Master Policy and defines the settings for the PSM connection, such as the port, the authentication method, and the terminal type. If the platform is missing the PSM-SSH connection component, the users will not be able to click to connect to the Linux endpoint. References: Connection Components, PSM-SSH Connection Component

NEW QUESTION # 43

Platform settings are applied to _____.

- A. The entire vault.
- **B. Safes**
- C. Individual Accounts
- D. Network Areas

Answer: B

NEW QUESTION # 44

• • • • •
