

Reliable Dynatrace-Associate Test Topics & Dynatrace-Associate Certification Exam

d. Resource

e. Custom

f. Info

DT synthetic supports three types of synthetic monitoring, they are... -

ANSWER a. Single-URL browser monitor

b. Browser clickpath

c. HTTP monitor

Why is it a best practice to define extra metadata, and not tags, on a host system? - ANSWER Tags defined on the system can be cumbersome to change and require pre-planning, but DT can use the metadata to define tags and management zones, or use the metadata dynamically within charts and dashboard

What options are available for adjusting anomaly detection for database services? - ANSWER a. Response time degradations

b. Increases in failure rate

c. Service load drops

d. Service load spikes

e. Failed database connects

Why is it important to include Dynatrace network monitoring metrics as part of a performance analysis? - ANSWER a. The network is part of your application's underlying infrastructure

b. Network performance can be a root cause for an application problem

Our Dynatrace-Associate study materials are regarded as the most excellent practice materials by authority. Our company is dedicated to researching, manufacturing, selling and service of the Dynatrace-Associate study materials. Also, we have our own research center and experts team. So our products can quickly meet the new demands of customers. That is why our Dynatrace-Associate Study Materials are popular among candidates. We really take their requirements into account. Perhaps you know nothing about our Dynatrace-Associate study materials. Our free demo will help you know our study materials comprehensively.

On one hand, we adopt a reasonable price for you, ensures people whoever is rich or poor would have the equal access to buy our useful Dynatrace-Associate real study dumps. On the other hand, we provide you the responsible 24/7 service. Our candidates might meet so problems during purchasing and using our Dynatrace-Associate prep guide, you can contact with us through the email, and we will give you respond and solution as quick as possible. With the commitment of helping candidates to Pass Dynatrace-Associate Exam, we have won wide approvals by our clients. We always take our candidates' benefits as the priority, so you can trust us without any hesitation.

Dynatrace-Associate Certification Exam - Dynatrace-Associate Valid Study Notes

In this high-speed world, a waste of time is equal to a waste of money. As an electronic product, our Dynatrace-Associate real study dumps have the distinct advantage of fast delivery. Once our customers pay successfully, we will check about your email address and other information to avoid any error, and send you the Dynatrace-Associate prep guide in 5-10 minutes, so you can get

our Dynatrace-Associate Exam Questions at first time. And then you can start your study after downloading the Dynatrace-Associate exam questions in the email attachments. High efficiency service has won reputation for us among multitude of customers, so choosing our Dynatrace-Associate real study dumps we guarantee that you won't be regret of your decision.

Dynatrace Dynatrace-Associate Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Automation: Covers workflows, event-driven automation, and integrations that enable teams to automate remediation and operational tasks.
Topic 2	<ul style="list-style-type: none"> Kubernetes Infrastructure: Covers monitoring and observability of Kubernetes clusters, workloads, and containerized environments within Dynatrace.
Topic 3	<ul style="list-style-type: none"> Synthetics: Covers the creation and monitoring of synthetic tests to simulate user interactions and proactively detect availability or performance issues.
Topic 4	<ul style="list-style-type: none"> Business Analytics: Covers capturing and correlating business metrics with technical data to measure the impact of application performance on business outcomes.
Topic 5	<ul style="list-style-type: none"> Foundational Platform Capabilities: Covers the core features and navigation of the Dynatrace platform, including entity relationships, tagging, and how data is collected.
Topic 6	<ul style="list-style-type: none"> Infrastructure Observability: Covers monitoring and visibility into hosts, services, and infrastructure components to detect and analyze performance issues.
Topic 7	<ul style="list-style-type: none"> Log Investigation: Covers querying, filtering, and analyzing log data within Dynatrace to troubleshoot and identify root causes of problems.

Dynatrace Associate Certification Exam Sample Questions (Q54-Q59):

NEW QUESTION # 54

Which options does Dynatrace support for Tracing? (Select all that apply)

- A. OpenTracing
- B. Dynatrace OneAgent SDK
- C. Dynatrace Operator
- D. OpenTelemetry
- E. Dynatrace RUM

Answer: A,B,D

Explanation:

Dynatrace supports multiple approaches for distributed tracing:

* OpenTracing is supported as an open standard for instrumenting applications and sending trace data

* OpenTelemetry is the modern, preferred open standard for collecting and exporting traces, metrics, and logs into Dynatrace

* Dynatrace OneAgent SDK enables custom instrumentation for tracing in cases where automatic instrumentation is not sufficient

Dynatrace RUM focuses on capturing real user interactions and frontend performance, not distributed tracing.

Dynatrace Operator is used for deploying OneAgent in Kubernetes environments and does not provide tracing capabilities itself.

These supported tracing methods allow Dynatrace to capture end-to-end distributed traces across modern, cloud-native, and custom environments.

Reference: Based on official Dynatrace University training materials covering distributed tracing and instrumentation.

NEW QUESTION # 55

I want to view versioning metadata of the components I monitor in Dynatrace. Which options do I have for configuring this data? (Select all that apply)

- A. Smartscape

- B. Environment variables
- C. Security vulnerability
- D. Kubernetes labels
- E. Events ingestion

Answer: B,D,E

Explanation:

Dynatrace allows adding versioning and metadata to monitored entities through multiple configurable inputs:

Events ingestion can be used to push deployment and version information into Dynatrace, which is then associated with entities

Kubernetes labels allow attaching version metadata (such as app version or build number) to workloads and pods

Environment variables can be used to define version information that OneAgent automatically captures and associates with services or processes

Smartscape is a visualization tool and does not configure metadata.

Security vulnerability relates to application security findings, not version metadata configuration.

Reference: Based on official Dynatrace University training materials on metadata, tagging, and deployment tracking.

NEW QUESTION # 56

Which of the following data points can be found within a User Session?

- A. Server side code level insights
- B. User Tags
- C. User Actions
- D. JavaScript and Request errors
- E. Session and Action Properties

Answer: B,C,D,E

Explanation:

A User Session in Dynatrace contains detailed information about user interactions and experience:

* User Tags - custom identifiers assigned to users

* Session and Action Properties - metadata describing session behavior

* JavaScript and Request Errors - frontend and backend errors impacting the session

* User Actions - all interactions such as clicks, page loads, and XHR calls Server-side code-level insights are not directly part of the user session view; they belong to service-level and distributed tracing analysis.

Reference: Based on official Dynatrace University training materials on Real User Monitoring and user sessions.

NEW QUESTION # 57

What is the default retention period for Logs?

- A. 10 years
- B. 10 days
- C. 35 days
- D. 5 years

Answer: C

Explanation:

Dynatrace stores logs with a default retention period of 35 days .

This provides:

* Sufficient time for analysis

* Balance between storage and cost

Reference: Based on official Dynatrace University training materials on log management.

NEW QUESTION # 58

A problem opened with the event category of "Slowdown". Assuming Dynatrace is using the default anomaly detection settings, what entity types can be the root cause of this problem? (Select all that apply)

- A. Processes

- B. Applications
- C. Services
- D. Hosts
- E. Cloud Providers

Answer: A,C,D

Explanation:

In Dynatrace, "Slowdown" problems are typically triggered by performance degradation detected through anomaly detection on monitored entities.

With default settings, the root cause of slowdown problems is usually identified at:

Services, where response time degradation is detected

Processes, where CPU, memory, or other resource bottlenecks occur

Hosts, where infrastructure-level issues impact performance

Applications are higher-level aggregations and are not typically identified as the root cause entity.

Cloud Providers are not treated as root cause entities in anomaly detection.

Dynatrace's AI (Davis) correlates these entities to pinpoint the most likely root cause in the topology.

Reference: Based on official Dynatrace University training materials covering problem detection and Davis AI root cause analysis.

NEW QUESTION # 59

.....

No company in the field can surpass us on the Dynatrace-Associate exam questions. So we still hold the strong strength in the market as a leader. At present, our Dynatrace-Associate guide materials have applied for many patents. We attach great importance on the protection of our intellectual property. And our website is so famous that it is easily recognised by the candidates as a popular brand among all of the webistes. And a lot of our loyal customers only trust our Dynatrace-Associate Study Guide for their exam as well.
