

High-quality Test AZ-104 Centres by RealExamFree

AZ-104 Practice test with complete solutions 100% Correct Answers 2023

Q1. Your company is planning to use Azure Container Instances to deploy simple cloud applications. You are tasked with determining if multi-container groups hosting multiple container instances meet your solution requirements.

You need to identify features and requirements for multi-container groups with each group hosting an application container, a logging container, and a monitoring container. For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Statement:

- 1- Multi-container groups support Linux containers only.
- 2- You can deploy a multi-container group from a Resource Manager template or a YAML file.
- 3- Container groups can scale up as necessary to create additional container instances as necessary. - ANSWER Answer: 1-Yes. 2-Yes. 3-No.

Explanation:

- 1- Yes. Multi-container groups support Linux containers only. This is a current restriction for multi-container groups. Windows Containers are limited to Azure Container Instances that support deployment of a single container instance only.
- 2- Yes. You can deploy a multi-container group from a Resource Manager template or a YAML file. It is recommended that you use a Resource Manager template when you need to deploy additional Azure resources when deploying container instances, and this is the preferred method for deploying multi-container groups.
- 3- No. Container groups and container instances do not support scaling. If additional container groups or container instances are needed, they must be explicitly created.

Q2. You create a FileStorage premium storage account and create a premium tier Azure file share. You plan to mount the file share directly on-premises using the Service Message Block (SMB) 3.0 protocol. You need to ensure that your network is configured to support mounting an Azure file share on-premises. You want to minimize the administrator effort necessary to accomplish this. What should you do?

- A-Create an ExpressRoute circuit.
B-Install and configure Azure File Sync.
C-Configure TCP port 445 as open in your on-premises internet firewall.
D-Configure TCP port 443 as open in your on-premises internet firewall. - ANSWER Answer: C
- Explanation:

P.S. Free 2025 Microsoft AZ-104 dumps are available on Google Drive shared by RealExamFree: https://drive.google.com/open?id=1nBVVKPh2ORk4enzRmllo3_JuvNDYhpN

One of the top features of Microsoft AZ-104 exam dumps is the AZ-104 exam passing a money-back guarantee. In other words, your investments with Microsoft AZ-104 exam questions are secured with the 100 Microsoft Azure Administrator AZ-104 exam passing a money-back guarantee. Due to any reason, if you did not succeed in the final Microsoft AZ-104 exam despite using Microsoft AZ-104 PDF Questions and practice tests, we will return your whole payment without any deduction. While practicing on Microsoft Azure Administrator AZ-104 practice test software you will experience the real-time Microsoft Azure Administrator AZ-104 exam environment for preparation. This will help you to understand the pattern of final Microsoft AZ-104 exam questions and answers.

Microsoft AZ-104 Exam is a comprehensive certification assessment that covers a broad range of topics related to Azure administration. By passing AZ-104 exam, candidates can demonstrate their expertise in managing Azure resources and services, and they can enhance their career prospects in the field of cloud computing.

Microsoft AZ-104 Latest Test Format, AZ-104 Reliable Test Practice

If you are busy with your study or work and have little time to prepare for your exam, choose us, we will do the rest for you. AZ-104 exam bootcamp are edited and verified by professional experts, therefore the quality and accuracy can be guaranteed. You just

need to spend about 48 to 72 hours on practicing, and you can pass the exam in your first attempt by using AZ-104 Exam Braindumps of us. We offer you free demo to have a try before buying. Online and offline chat service are available, and if you have any questions about AZ-104 exam bootcamp, you can have a conversation with us.

Microsoft AZ-104 Practice Test Questions, Microsoft AZ-104 Exam Practice Test Questions

Microsoft Azure is one of the leading Cloud computing platforms around the globe that offers a slew of useful features. Azure is being used by a lot of large-scale companies and this has created many job openings. However, to apply for these positions, the professionals need to get certified. Microsoft offers many certificates related to its Azure technology and the most popular one among them is known as Microsoft Certified: Azure Administrator Associate. To obtain this certification, you will have to pass the Microsoft AZ-104 Exam.

Microsoft Azure Administrator Sample Questions (Q322-Q327):

NEW QUESTION # 322

You have the Azure virtual machines shown in the following table.

Name	Operating system	Subnet	Virtual network
VM1	Windows Server 2019	Subnet1	VNET1
VM2	Windows Server 2019	Subnet2	VNET1
VM3	Red Hat Enterprise Linux 7.7	Subnet3	VNET1

VNET1 is linked to a private DNS zone and named contoso.com that contains the records shown in the following table.

Name	Type	TTL	Value	Auto registered
comp1	TXT	3600	10.0.0.5	False
comp2	A	3600	10.0.0.5	False
comp3	CNAME	3600	comp1.contoso.com	False
comp4	PTR	3600	10.0.0.5	False

You need to ping VM2 from VM1.

Which DNS names can you use to ping VM2.

- A. comp1.contoso.com and comp2.contoso.com only
- B. comp2.contoso.com and comp4.contoso.com only
- C. comp2.contoso.com only
- D. comp1.contoso.com comp2.contoso.com comp3.contoso.com and comp4.contoso.com
- E. comp1.contoso.com, comp2.contoso.com and comp4.contoso.com only

Answer: D

NEW QUESTION # 323

You have an Azure subscription that contains the Azure virtual machines shown in the following table.

Name	Operating system	Subnet	Virtual network
VM1	Windows Server 2019	Subnet1	VNET1
VM2	Windows Server 2019	Subnet2	VNET1
VM3	Red Hat Enterprise Linux 7.7	Subnet3	VNET1

You configure the network interfaces of the virtual machines to use the settings shown in the following table

Name	DNS server
VM1	None
VM2	192.168.10.15
VM3	192.168.10.15

From the settings of VNET1, you configure the DNS servers shown in the following exhibit.

DNS servers ⓘ

☐ Default (Azure-provided)

☒ Custom

Microsoft 193.77.134.10 ...

Add DNS server ...

The virtual machines can successfully connect to the DNS server that has an IP address of 192.168.10.15 and the DNS server that has an IP address of 193.77.134.10.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Microsoft	Yes	No
VM1 connects to 193.77.134.10 for DNS queries.	<input type="radio"/>	<input type="radio"/>
VM2 connects to 193.77.134.10 for DNS queries.	<input type="radio"/>	<input type="radio"/>
VM3 connects to 192.168.10.15 for DNS queries.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Microsoft	Yes	No
VM1 connects to 193.77.134.10 for DNS queries.	<input type="radio"/>	<input checked="" type="radio"/>
VM2 connects to 193.77.134.10 for DNS queries.	<input type="radio"/>	<input checked="" type="radio"/>
VM3 connects to 192.168.10.15 for DNS queries.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION # 324

You have a hybrid deployment of Azure AD that contains the users shown in the following table.

Name	User type	On-premises sync enabled
User1	Member	No
User2	Member	Yes
User3	Guest	No

You need to modify the JobTitle and UsageLocation attributes for the users.

For which users can you modify the attributes from Azure AD? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

JobTitle: User1 and User3 only

User1 only

User1 and User2 only

User1 and User3 only

User1, User2, and User3

UsageLocation: User1, User2, and User3

User1 only

User1 and User2 only

User1 and User3 only

User1, User2, and User3

Answer:

Explanation:

Microsoft

JobTitle: User1 and User3 only ▼

- User1 only
- User1 and User2 only
- User1 and User3 only**
- User1, User2, and User3

UsageLocation: User1, User2, and User3 ▼

- User1 only
- User1 and User2 only
- User1 and User3 only
- User1, User2, and User3**

NEW QUESTION # 325

Your company has an Azure subscription. The subscription contains an Azure Virtual Machine named demovm that is deployed to a resource group named pass4test-rg.

The Virtual Machine is used to run services that can be used to deploy resources to the Resource Group.

You have to ensure that the service running on the Virtual Machine can be used to manage resources in the Resource Group.

Which of the following must you do to fulfil this requirement?

- A. From the Azure portal, modify the Access control settings of the resource group
- B. From the Azure portal, modify the Policies settings of the resource group
- C. From the Azure portal modify the Access control settings of the virtual machine
- **D. From the Azure portal, modify the value of the Managed Service Identity option for the virtual machine**

Answer: D

Explanation:

<https://docs.microsoft.com/en-us/azure/active-directory/managed-identities-azure-resources/qs-configure-portal-windows-vm>
NEW QUESTION # 326

You need to configure the Device settings to meet the technical requirements and the user requirements.

Which two settings should you modify? To answer, select the appropriate settings in the answer area.

Answer Area
